PUBLIC BUILDING COMMISSION OF CHICAGO

Contract No. 1482

- B. It is the current intention of the Commission to award one (1) or more Job Order Contract(s) under this solicitation. The Commission reserves the right to make additional awards under this solicitation for a period of 210 days after bid opening; if an unexpected increase in volume of work occurs which will exceed the capacity of the Contractor(s) to whom the Contract was awarded; or, if the Contractor(s) to whom the Contract was awarded fails to perform the Contract. The Commission reserves the right to reject any and all bids and to waive any informality in bids received whenever it determines such rejection or waiver is in its interest.
- C. If additional awards are made, the awards will be made in sequence beginning with the next lowest responsive, responsible Bidder.
- D. Unbalanced Bid: Bids that the Commission considers in its sole opinion to be materially unbalanced or not responsible will be rejected.
- E. Bidders must submit four (4) sets of adjustment factors plus an additional **Adjustment Factor to be applied to work not included in the (CTC®)**. Each factor must take into consideration all the direct costs and indirect costs of doing business with the Commission.
 - 1. The first adjustment factor in each set is to be applied against the prices in the CTC® for work to be accomplished during normal working hours. The Commission encourages Contractors to bid as competitively as possible, however the Commission reminds the Bidders that there is no opportunity during the course of the Contract to make up for an unrealistic low bid. Therefore the Bidder must document on Bid Form 3 the methodology used to arrive at the adjustment factor amount to the satisfaction of the Commission. Failure to provide such justification will result in the bid being declared unbalanced and Article 8.D will apply. The Bidder must first of all evaluate the Direct Cost Unit Prices contained in the CTC® against the Bidder's Direct Costs. Secondly, the Bidder must demonstrate to the satisfaction of the Commission that the Bidder's adjustment factors have taken into account all the costs associated with the project as outlined below and all other costs that the Bidder anticipates.
 - a. The bidder must be aware that there are numerous business and construction related costs not included in the unit costs and must be considered in the adjustment factors. Following is a synopsis of some of these costs which are shown more completely and in more detail in Book 3 the Construction Task Catalog® pages 00-1 to 00-8.
 - (1) Business costs, including but not limited to:

(3) Price variations.

- (a) Any price variations or fluctuations anticipated over the year must be taken into account in the Bidder's adjustment factors.

- 2. The second adjustment factor in each set is to be applied against the prices in the CTC[®] for work to be accomplished during other than normal working hours. This factor must take into account all the additional costs of working on overtime, shift work and double time basis. **The Other Than Normal Working Hours Adjustment Factor must be greater than the Normal Hours Adjustment Factor. Bid Form 3 must contain adequate description of the methodology, data and information to justify the Other Than Normal Working Hours Adjustment Factor. Failure to provide such justification will result in the bid being declared unbalanced and Article 7.D will apply.**
- 3. An additional adjustment factor is to be bid which will applied to work tasks that are considered non pre-priced. Bidders must be cautioned that the Non Pre-priced Adjustment Factor must take into account all the costs the Bidder would experience above and beyond the direct cost of the work performance, such as, but not limited to overheads and profits. **Bid Form 3 must contain adequate description of the methodology, data and information to justify the Non Pre-priced Adjustment Factor. Failure to provide such justification will result in the bid being declared unbalanced and Article 8.D will apply.**

9. ASSIGNMENT OF WORK

If multiple awards are made, the assignment of the work is at the discretion of the Commission. However the Commission intends to assign work as equal as possible among the awarded Contracts taking into account the Contractor's bid and the performance of the Contractor in accordance with the Standards of Performance of Article IX of the JOC General Conditions.

Such modifications must be submitted in a sealed envelope and marked in the same manner as a bid. IN ADDITION, the envelope must state "BID MODIFICATIONS TO SEALED PROPOSAL" on the lower left-hand corner of the envelope in which the bid modification is enclosed, so that the modification will be recognized to prevent its being opened prior to the scheduled public opening of bids. Telephonic or oral modifications will not be considered. Bidders are cautioned that modifications which are not explicit and which are in any sense subject to misinterpretation shall make the bid so modified or amended subject to rejection.

18. WITHDRAWAL OF BIDS BEFORE BID OPENING

Any Bidder may withdraw its bid by letter, facsimile, telegraphic request, or by personally securing, with proper identification, the submitted bid proposal at any time prior to the time fixed for opening of bids. A telephonic request to withdraw a bid will not be considered.

- B. The insurance requirements for this project are as follows: The Contractor must provide and maintain at Contractor's own expense, the minimum insurance coverage and requirements specified below, insuring all operations related to the Contract. The insurance must remain in effect from: the date of the notice to proceed until Substantial Completion of the project, during completion of Punch List, as well as any time Contractor returns to perform additional work regarding warranties or for any other purpose.
- C. Upon approval by the Commission to award, and within five (5) days after being given notice, the successful Bidder shall execute and deliver to the Commission the Performance and Payment Bond in the form included in the Contract Documents and evidence of the required insurance coverage.
- D. The Performance and Payment Bond shall be in the form herein and in the amount shown in Section One, Paragraph N herein and shall be security for the faithful performance of the Contract and payment of all persons, firms, or corporations to whom the Contractor may become legally indebted for labor, material, facilities or services of any nature, employed or used by it in performing the Work. The current power of attorney for the persons who sign for any surety company shall be attached to such bond. Such power of attorney shall be sealed and certified with a "first hand signature" by an officer of the surety. A facsimile signature will not be accepted by the Commission. The Commission reserves the right to approve the surety company.
- E. The failure of the successful Bidder to supply the required Performance and Payment Bond or evidence of the required insurance coverage within five (5) days of notice, or within such extended period as the Commission may grant based upon reasons determined sufficient by the Commission, shall constitute a default and the Commission may either award the Contract to the next lowest responsible bidder or re-advertise for bids. The difference between the amount of its bid and the amount for which a contract for the work is subsequently executed may be charged against the Bidder, irrespective of whether the amount thus due exceeds the amount of the bid security. If a more favorable bid is received by re-advertising, the defaulting Bidder

PUBLIC BUILDING COMMISSION OF CHICAGO
CONTRACT No. 1482

shall have no claim against the Commission for a refund. Because of the difficulty of ascertaining the damage caused to the Commission, such sum shall be considered liquidated damages and shall not constitute a penalty. The election by the Commission to grant an extension to the period allowed for the bidder to provide an acceptable performance and payment bond and/or evidence of insurance coverage shall not entitle the bidder to an extension of time required to complete the Work.

23. ORDER OF PRECEDENCE OF COMPONENTS OF THE CONTRACT DOCUMENTS

- A. The order of precedence of the components of the Contract Documents shall be as follows:
1. Book 2 - Standard Terms and Conditions and JOC Special Conditions;

The Contractor must submit evidence of insurance to the Public Building Commission prior to Contract award. The failure of the Commission to obtain certificates or other insurance evidence

PUBLIC BUILDING COMMISSION OF CHICAGO
Contract No. 1482

from Contractor is not a waiver by the Commission of any requirements for the Contractor to obtain and maintain the specified insurance. The Contractor will advise all insurers of the Contract provisions regarding insurance. Non-conforming insurance does not relieve Contractor of the obligation to provide insurance as specified in this contract. Nonfulfillment of the insurance conditions may constitute a breach of the Contract, and the Commission retains the right to stop work until proper evidence of insurance is provided, or the Contract may be terminated.

The Commission reserves the right to obtain copies of insurance policies and records from the Contractor and/or its subcontractors at any time upon written request.

The insurance must provide for 60 days prior written notice to be given to the Commission in the event coverage is substantially changed, canceled, or non-renewed.

The Contractor agrees that insurers waive their rights of subrogation against the Public Building Commission and the User Agency, their respective Board members, employees, elected officials, officers, or representatives.

The insurance coverage and limits furnished by Contractor in no way limit the Contractor's liabilities and responsibilities specified within the Contract or by law.

Any insurance or self-insurance programs maintained by the Public Building Commission and the User Agency do not contribute with insurance provided by the Contractor under the Contract.

The required insurance to be carried is not limited by any limitations expressed in the indemnification language in this Contract or any limitation placed on the indemnity in this Contract given as a matter of law.

If contractor is a joint venture or limited liability company, the insurance policies must name the joint venture or limited liability company as a named insured.

The Contractor must require all subcontractors to provide the insurance required herein, or Contractor may provide the insurance for subcontractors. All subcontractors are subject to the same insurance requirements of Contractor unless otherwise specified in this Contract.

If Contractor or subcontractor desires additional coverage, the party desiring the additional coverage is responsible for the acquisition and cost.

The Public Building Commission maintains the rights to modify, delete, alter or change these requirements.

Bid Form 3 – Calculation of the Bid Adjustment Factors

Part 1: Calculation of the Normal Working Hours Adjustment Factor:

1.1 Work Order Value \$0 - \$500,000

Please see the attached spreadsheet for this factor which is based upon actual subcontractor and supplier pricing with the listed line items in this range and criteria. The spreadsheet shows a factor of 1.1024 which is representative of actual subcontractor and supplier pricing on projects that are less than \$500,000 in total value.

In order to accurately determine a factor for this size of a proposal for the PBC JOC Contract #1482, Pacific Construction Services took a sampling of CTC items from the CTC book that have been typically utilized on current and previous JOC projects from other contracts as well as obtained current pricing from subcontractors and suppliers. The projects selected were all within the range of \$0 to \$500,000 and a wide variety of projects were researched. We also gathered current unit pricing from subcontractors and suppliers for various items within this range. We then entered the most current subcontractor pricing information for each item based upon the criteria. The spreadsheet also reflects the added business costs for PCS including but not limited to overhead, general conditions and fee. The overhead includes but is not limited to bonds, training, management, supervision, mobilization, vehicles, taxes (if applicable), fringe benefits, payroll taxes, worker's compensation and insurance. The general conditions includes but is not limited to permits, LEED requirements, environmental consultant fees, design services, engineering services, job staffing, safety requirements, traffic control, site protection, and cleanup costs. The fee is part of the anticipated profit of the project. All of these items are taken into consideration in the final determination of the factor.

1.2 Work Order Value \$500,001-\$1,000,000

Please see the attached spreadsheet for this factor which is based upon actual subcontractor and supplier pricing with the listed line items in this range and criteria. The spreadsheet shows a factor of 1.0918 which is representative of larger line item quantities and thus, more of a subcontractor/supplier discount, in comparison to \$0 to \$500,000 projects performed under normal working hours.

In order to accurately determine a factor for this size of a proposal for the PBC JOC Contract #1482, Pacific Construction Services as listed above, took a sampling of CTC items from the CTC that have been typically utilized on current and previous JOC projects from other contracts as well as obtained current pricing from subcontractors and suppliers. The projects selected were all within the range of \$500,001 to \$1,000,000 and a wide variety of projects were researched. We also gathered current unit pricing from subcontractors and suppliers for various items within this range. We then entered the

most current subcontractor pricing information for each item based upon the criteria. The spreadsheet also reflects the added business costs for PCS including but not limited to overhead, general conditions and fee. The overhead includes but is not limited to bonds, training, management, supervision, mobilization, vehicles, taxes (if applicable), fringe benefits, payroll taxes, worker's compensation and insurance. 1.3 Work Order Value \$1,000,001 - \$5,000,000

Please see the attached spreadsheet for this factor which is based upon actual subcontractor and supplier pricing with the listed line items in this range and criteria. The spreadsheet shows a factor of 1.0377 which is representative of larger line item quantities and thus, more of a subcontractor/supplier discount, in comparison to \$500,001 to \$1,000,000 projects performed under normal working hours.

In order to accurately determine a factor for this size of a proposal for the PBC JOC Contract #1482, Pacific Construction Services as listed above, took a sampling of CTC items from the CTC book that have been typically utilized on current and previous JOC projects from other contracts as well as obtained current pricing from subcontractors and suppliers. The projects selected were all within the range of \$1,000,001 to \$5,000,000. We also gathered current unit pricing from subcontractors and suppliers for various items within this range. We then entered the most current subcontractor pricing information for each item based upon the criteria. The spreadsheet also reflects the added business costs for PCS including but not limited to overhead, general conditions and fee. 1.4 Work Order Value > \$5,000,000

Please see the attached spreadsheet for this factor which is based upon actual subcontractor and supplier pricing with the listed line items in this range and criteria. The spreadsheet shows a factor of 1.0303 which is representative of larger line item quantities and thus, more of a subcontractor/supplier discount, in comparison to \$1,000,001 to \$5,000,000 projects performed under normal working hours.

In order to accurately determine a factor for this size of a proposal for the PBC JOC Contract #1482, Pacific Construction Services as listed above, took a sampling of CTC items from the CTC book that have been typically utilized on current and previous JOC projects from other contracts as well as obtained current pricing from subcontractors and suppliers. The projects selected were all within the range of being greater than \$5,000,000. We also gathered current unit pricing from subcontractors and suppliers for various items within this range. We then entered the most current subcontractor pricing information for each item based upon the criteria. The spreadsheet also reflects the added business costs for PCS including but not limited to overhead, general conditions and fee. The overhead includes but is not limited to bonds, training, management, supervision, mobilization, vehicles, taxes (if applicable), fringe benefits, payroll taxes, worker's compensation and insurance. The general conditions includes but is not limited to permits, LEED requirements, environmental consultant fees, design services, engineering services, job staffing, safety requirements, traffic control, site protection, and cleanup costs. The fee is part of the anticipated profit of the project. All of these items are taken into consideration in the final determination of the factor.

Part 2: Calculation of the Other Than Normal Working Hours Adjustment Factor:

2.1 Work Order Value \$0 - \$500,000

Please see the attached spreadsheet for this factor which is based upon actual subcontractor and supplier pricing with the listed line items in this range and criteria. The spreadsheet shows a factor of 1.1342 which is representative of subcontractor and supplier pricing on projects that are less than \$500,000 in total value.

In order to accurately determine a factor for this size of a proposal for the PBC JOC Contract #1482, Pacific Construction Services as listed above, took a sampling of CTC items from the CTC book that have been typically utilized on current and previous JOC projects from other contracts as well as obtained current pricing from subcontractors and suppliers. The projects selected were all within the range of \$0 to \$500,000 and performed during other than normal working hours. We also gathered current unit pricing from subcontractors and suppliers for various items within this range. We then entered the most current subcontractor pricing information for each item based upon the criteria.

This factor shows an increase over normal working hours performed under the criteria (\$0 to \$500,000) based upon subcontractor and supplier information. The increase is reflective of premium increases for labor, material and equipment rates on various items for the other than normal work hours. The majority of the added costs come from the labor due to the premium put on these rates for performing work during other than

normal working hours. Most of the materials being acquired are at the same costs as normal working hours and the equipment costs are typically minimal.

The spreadsheet also reflects the added business costs for PCS including but not limited to overhead, general conditions and fee. The overhead includes but is not limited to bonds, training, management, supervision, mobilization, vehicles, taxes (if applicable), fringe benefits, payroll taxes, worker's compensation and insurance. The general conditions includes but is not limited to permits, LEED requirements, environmental consultant fees, design services, engineering services, job staffing, safety requirements, traffic control, site protection, and cleanup costs. The fee is part of the anticipated profit of the project. All of these items are taken into consideration in the final determination of the factor.

2.2 Work Order Value \$500,001 - \$1,000,000

Please see the attached spreadsheet for this factor which is based upon actual subcontractor and supplier pricing with the listed line items in this range and criteria. The spreadsheet shows a factor of 1.1236 which is representative of larger line item quantities and thus, more of a subcontractor/supplier discount, in comparison to \$0 to \$500,000 projects that are performed under other than normal working hours.

In order to accurately determine a factor for this size of a proposal for the PBC JOC Contract #1482, Pacific Construction Services as listed above, took a sampling of CTC items from the CTC book that have been typically utilized on current and previous JOC projects from other contracts as well as obtained current pricing from subcontractors and suppliers. traffic control, site protection, and cleanup costs. The fee is part of the anticipated profit of the project. All of these items are taken into consideration in the final determination of the factor.

2.3 Work Order Value \$1,000,001 - \$5,000,000

Please see the attached spreadsheet for this factor which is based upon actual subcontractor and supplier pricing with the listed line items in this range and criteria. The spreadsheet shows a factor of 1.0695 which is representative of larger line item quantities and thus, more of a subcontractor/supplier discount, in comparison to \$500,001 to \$1,000,000 projects that are performed under other than normal working hours.

In order to accurately determine a factor for this size of a proposal for the PBC JOC Contract #1482, Pacific Construction Services as listed above, took a sampling of CTC items from the CTC book that have been typically utilized on current and previous JOC projects from other contracts as well as obtained current pricing from subcontractors and suppliers. The fee is part of the anticipated profit of the project. All of these items are taken into consideration in the final determination of the factor.

2.4 Work Order Value Greater than \$5,000,000

Please see the attached spreadsheet for this factor which is based upon actual subcontractor and supplier pricing with the listed line items in this range and criteria. The spreadsheet shows a factor of 1.0557 which is representative of larger line item quantities and thus, more of a subcontractor/supplier discount, in comparison to \$1,000,001 - \$5,000,000 projects that are performed under other than normal working hours.

In order to accurately determine a factor for this size of a proposal for the PBC JOC Contract #1482, Pacific Construction Services as listed above, took a sampling of CTC items from the CTC book that have been typically utilized on current and previous JOC projects from other contracts as well as obtained current pricing from subcontractors and suppliers. The fee is part of the anticipated profit of the project. All of these items are taken into consideration in the final determination of the factor.

Part 3: Calculation of the Non Pre-Pre Priced Adjustment Factor:

Based upon our previous calculations on the attached spreadsheets and the descriptions of the methods used to calculate our factors, one can see that we have broken out our company general overhead (1.5%), general conditions (1.5%) and fee (2%). This total amounts to approximately 5% of a typical JOC project. Thus, using these numbers as a basis, we have arrived at a Non Pre Priced factor of 1.05 required to perform the work.

The actual number may have some fluctuation based upon various factors such as overall company size, insurance rating, bonding capacity and rating as well as more project specific factors such as project size, # of subcontractors, expertise of subcontractors, timeliness completion and expeditious closeout of projects. For the purpose of the PBC JOC contract the factor would remain 1.05 as figured in all of the factor calculations as described above and demonstrated in bid form 3.
