Potentially Impacted Property Evaluation West Side Learning Center 4624 W. Madison Street Chicago, IL 60644

Mr. Williams:

This report presents the results of the Potentially Impacted Property Evaluation performed by GSG Consultants, Inc. (GSG) for the West Side Learning Center at 4624 W. Madison Street, Chicago, Illinois (Exhibit 1, Project Area Location Map). Please refer to Exhibit 2, Proposed Development Plan, for the location of proposed site improvements.

Historical Record Review

GSG conducted a review of available historical records, including Sanborn Fire Insurance Maps, aerial photographs, and environmental databases in order to investigate historic uses of the Project Area and potential Recognized Environmental Concerns (RECs) with the Project Area. The historical records review, as provided in **Appendix A**, and proposed new development plans were used to create the sampling and analysis program at each boring location.

This report identifies and evaluates Recognized Environmental Conditions (RECs). In accordance with the ASTM Standard E1527-21, RECs are defined as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

Environmental Database Information

GSG obtained environmental database information from Environmental Data Resources, Inc. (EDR), a commercial provider of that service. GSG used this information to identify any potential environmental concerns within or adjoining to the Project Area. The EDR Database response is provided in **Appendix A**.

The Subject Property, identified as "Bunge Brothers Coal" at 4600 W Madison, and 4617 W Washington, is listed in the TANKS, ASBESTOS, and FINDS databases. According to the TANKS database, the 4600 W Madison address is listed with three (3) USTs: two (2) 17,000-gallon fuel oil USTs, installed on 6/5/1957, and one (1) 1,000-gallon gasoline UST that was installed on 10/31/1947. The 4617 W Washington address is listed with four (4) USTs: two (2) 6,000-gallon gasoline USTs that were sand-filled and abandoned in place on 4/22/1949, and two (2) 1,000-gallon gasoline USTs that were installed to replace pre-existing USTs of the same size and contents on 5/4/1953.

West Side Learning Center February 19, 2024 Page 2 of 5

4610 & 4620 W Washington Boulevard, the north adjoining property across W Washington Boulevard, was identified as "R&D Bus Company", is listed in the TANKs, UST, and UST FINDER databases for the installation of one (1) 10,000-gallon diesel UST that was installed on 7/31/2001 and is currently out of service as of 11/1/2019.

No removal records were present for either of these listings. Therefore, the aforementioned USTs are suspected to remain in place. No dry cleaner listings were identified for the Subject Property of adjoining properties. A map indicating the location of RECs associated with the Subject Property and adjoining properties is included as **Exhibit 3**.

Review of Sanborn Fire Insurance Maps

GSG performed a search for reasonably ascertainable Sanborn Fire Insurance Rate Maps. Sanborn Fire Insurance Rate Maps dated 1908, 1950, 1975, 1988, 1991, 1993, 2002, and 2004 were obtained from EDR for review. The observations noted during the review of the Sanborn Maps are summarized in the following table:

The Subject Property is depicted as partially developed with two residential buildings and one commercial building in the earliest map available from 1908. By 1950, the Subject Property was fully developed with auto sales and service facilities along the southern end of the property, along with a private garage and gasoline filling and greasing station with two identified gasoline storage tank locations near the northern extent of the property. A railroad spur connecting to the east adjoining elevated railroad, and other structures and staging areas related to the site occupant, identified as "Bunge Bros. Coal Co." which includes a coal yard and other coal storage. The 1975 Sanborn map depicts the Subject Property as having been fully redeveloped with the current site building, with an addition added to the southeast corner of the building in 1988.

The west adjoining properties are depicted as undeveloped in the 1908 map, and fully developed with several buildings associated with auto storage, sales, truck services, and other industrial occupants in the 1950 map. Two (2) gasoline storage tank locations are identified on the southern portion of the southwest adjoining property, along W Madison Street in the 1950 Sanborn map. The sites are depicted as partially razed and vacant in the 1988 map, with two remaining buildings occupied by a church on the northwest adjoining property. The west adjoining properties are depicted in their current configuration in the 2002 map with the addition of the current church building and parking lot on the southwest adjoining property.

The north adjoining property is depicted as developed with an east-west oriented roadway labeled 'Washington Blvd" in the 1908 Sanborn map, beyond which is partially developed with a single-story machine shop and garage, with an additional single-store structure north of this building. One (1) 550-gallon gasoline UST is depicted just north of the main site building (currently 4608 – 4610 W Washington). In the 1950 map, the site is depicted as fully developed with several industrial/commercial buildings including "Auto Sales" facilities with auto body and repair shops, auto storage, and a Cellophane Bags manufacturing facility. By 1975, the buildings were vacant, and by 1988 the buildings were razed. The site was converted into its current configuration as a parking lot.

The east adjoining property is depicted as a two-track, elevated railroad in the 1908 Sanborn map, with a railroad spur connecting to the Subject Property in the 1950 map. The spur was razed along with the historic Subject Property buildings in the 1975 map and currently remains in this configuration.

West Side Learning Center February 19, 2024 Page 3 of 5

The south adjoining property is depicted as developed with an east-west oriented roadway labeled "W Madison" in the 1908 Sanborn map, the land beyond which is depicted as undeveloped. By 1950, the land south of W Madison is depicted as fully developed with several auto sales, repair services, painting, and storage facilities, and a floor covering warehouse. A 20,000-gallon gasoline UST associated with an auto services building (4631-4633 W Madison) is depicted in the 1950 map. In the 1975 map, the auto service facilities are depicted as razed, and by 2002 the south adjoining property beyond W Madison Street is depicted in its current configuration as fully razed and vacant land.

Review of Aerial Photographs

Aerial photographs were available for 1938, 1951, 1962, 1972, 1978, 1984, 1984, 1994, 1999, 2005, 2009, 2012, 2015, and 2019. The photographs are provided in **Appendix A**. The observations noted during the review of the Aerial Photographs are summarized in the following table:

The Subject Property is depicted as fully developed with industrial and commercial structures in the earliest available photograph from 1938. This includes a railroad spur that connects to the east adjoining elevated railroad. The Subject Property appears to have been razed for construction in the 1962 photograph, with the current site building and parking lot first appearing in the 1972 photograph. The Subject Property building is depicted in its current configuration with an addition added to the southeast corner of the building in the 1988 photograph reviewed.

The west adjoining properties are depicted as fully developed with industrial and commercial buildings in the 1938 photograph, and partially razed in the 1984 photograph reviewed. The site remains in this configuration until the southwest adjoining property is depicted as developed with the current church building and parking lot in the 2005 photograph reviewed.

The north adjoining property is depicted as developed with a two-way, four-lane, east-west oriented paved roadway in the 1938 photograph, beyond which appears to be developed with several commercial buildings. These buildings are depicted as razed in the 1984 photograph, and the site is depicted in its current configuration as a school bus storage lot in the 1994 photograph reviewed.

The east adjoining property appears to be developed with a two-track elevated railroad with viaducts present above W. Washington Blvd. and W. Madison Street in the 1938 photograph reviewed. A railroad spur connecting the Subject Property to the elevated rail is also depicted in the 1938 photograph, and was razed sometime prior to the 1962 photograph, leaving the site in its current configuration.

The south adjoining property is depicted as developed with a two-way, four-lane, east-west oriented paved roadway in the 1938 photograph, beyond which appears to be developed with several commercial buildings. Several of these buildings appear to have been razed sometime prior to the 1972 photograph, and all of the buildings appear to be razed in the 1999 photograph reviewed.

Site Reconnaissance

GSG visited the Subject Property on 2/9/2024 and made the following observations pertaining to the Subject Property and adjoining properties.

The Subject Property was observed to be developed with a 24,142 square foot, slab-on-grade, masonry, commercial structure, and associated parking lot, currently occupied by "Malcom X West Side Learning Center". A grass-vegetated area immediately south of the building exhibited two large mounds with six pipes that were cemented in place. A small patch of stressed vegetation was also noted in this area, north of the western-most mound. No tanks were observed during the site reconnaissance, however the presence of these mounds, pipes, and stressed vegetation may be indicative of a UST as there are historical records indicating the presence of abandoned-in-place USTs, and other USTs without documented removal on-site.

The property is surrounded by a 6'-tall iron fence on all sides, with a public alley lining the western side of the property, and an elevated railroad embankment on the eastern side. Sidewalks are located north and south of the property where they meet W Washington Boulevard and W Madison Street, respectively. The properties north of W Washington appear to be occupied by a school bus company, banquet hall, and church, while the properties south of W Madison are vacant and undeveloped. The properties west of the public alley were developed and occupied by two churches and their associated parking lots. Seven (7) polemounted transformers were observed in the public alley, three (3) of which were located within the Subject Property fence-line. No evidence of staining, leaks, or spills were observed in the vicinity of the transformers. No odors, staining, drums, hazardous/petroleum products, debris, wastewater, solid waste, pits, ponds, lagoons, wells, or septic systems were observed on the Subject Property or adjoining properties at the time of the site reconnaissance. Several containers of commercial cleaning products, maintenance supplies, and fire extinguishers were observed within the building and appeared to be in good condition.

Sanitary discharges are directed into the municipal sanitary sewer system. No wastewater treatment facilities are located on the Subject Property. Stormwater is removed primarily by surface flow across the paved surfaces towards the public right of way storm water drains. The Subject Property is connected to a municipal owned and operated sewer system and was observed to have several stormwater drains throughout the property.

CONCLUSIONS

Based on the information presented in the Environmental Database Review, Historical Review, and Site Reconnaissance, GSG recommends completing a Phase II Environmental site assessment to assess the potential impacts on the Subject Property due to the historical presence of a coal storage and distribution facility, gasoline filling station, and a railroad spur, along with the Subject Property and adjoining property's history of various auto mechanic services, sales, storage and historic USTs. **Exhibit 3**, **REC Map**, depicts the locations of RECs identified in connection with the Subject Property and adjoining properties. Historical Information is provided as **Appendix A**. A photo log of images taken during the site reconnaissance is provided as **Appendix B**.

Due to the suspected presence of USTs on the Subject Property, associated with the former coal storage and distribution facility, GSG also recommends completing a Ground Penetrating Radar (GPR) Survey prior to any Phase II sampling activities to address the concern of historic USTs that may remain in place.

If you have any questions or comments, please feel free to call us at 630-994-2600.

GENERAL NOTES

- A. THE DRAWINGS CONTAINED HEREIN SHALL BE USED IN CONJUNCTION WITH THE PROJECT MANUAL. ALL GENERAL CONDITIONS, PROJECT REQUIREMENTS AND TECHNICAL SPECIFICATIONS APPLY TO THE WORK.
- B. ALL WORK SHALL MEET ALL APPLICABLE FEDERAL, STATE, AND CITY OF CHICAGO CODES AND REGULATIONS THAT GOVERN THE WORK.
- C. REVIEW DOCUMENTS, VERIFY CONDITIONS AND DIMENSIONS IN THE FIELD AND CONFIRM THAT THE WORK IS BUILDABLE AS SHOWN. REPORT ANY CONFLICTS OR OMISSIONS IN WRITING TO THE ARCHITECT FOR CLARIFICATION PRIOR TO PERFORMING ANY WORK IN QUESTION.
- D. DO NOT SCALE THE DRAWINGS. WRITTEN DIMENSIONS GOVERN. IN CASE OF CONFLICT, CONSULT THE ARCHITECT PRIOR TO WORKING IN THE AREA IN QUESTION.
- E. SUBMIT REQUESTS FOR INFORMATION (RFI) IN A TIMELY MANNER IN ACCORDANCE WITH THE CONTRACT REQUIREMENTS, PRIOR TO PURCHASE, FABRICATION OR INSTALLATION.
- F. PROTECT ALL AREAS (AND PROPERTY) FROM DAMAGE RESULTING FROM THE WORK. REPAIR ANY DAMAGE RESULTING FROM THE WORK TO THE SATISFACTION OF THE OWNER. RETURN ALL AREAS AFFECTED BY THE WORK TO THEIR ORIGINAL CONDITION.
- G. REMOVE DEBRIS FROM THE JOB SITE IN ACCORDANCE WITH THE CONTRACT REQUIREMENTS AND ALL GOVERNING AGENCIES. DO NOT ALLOW DEBRIS TO ACCUMULATE ON THE JOB SITE.
- H. PROTECT TREES, LAWN, AND PLANTS FROM DAMAGE. IF DAMAGED, CONTRACTOR IS RESPONSIBLE FOR REPLACING THEM IN KIND.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the

United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 09/19/2023 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

AMERICAN POUCH Site ID: 0506402 EPA Id: ILD984807669	4603 W. GLADYS	S 1/4 - 1/2 (0.339 mi.)	X115	178

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state and tribal brownfield sites

BROWNFIELDS: The Illinois Municipal Brownfields Redevelopment Grant Program (MBRGP) offers grants worth a maximum of \$240,000 each to municipalities to assist in site investigation activities, development of cleanup, objectives and performance of cleanup activities. Brownfields are abandoned or underused industrial and/or commercial properties that are contaminated (or thought to be contaminated) and have an active. potential for redevelopment

A review of the BROWNFIELDS list, as provided by EDR, has revealed that there is 1 BROWNFIELDS site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

TANKS: This dataset contains Aboveground Storage Tank (AST) and Underground Storage Tank (UST) information from the Department of Public Healtha??s (CDPH) Tank Asset Database. The Tank Asset Database contains tank information from CDPH AST and UST permit applications as well as UST records imported from the historic Department of Environment (DOE) database. This dataset also includes AST records from the historic DOE and pre-1992 UST records from the Building Department.

A review of the TANKS list, as provided by EDR, and dated 09/06/2023 has revealed that there are 52

TANKS sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 09/23/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

JONAS ENTERPRISES IN		W 0 - 1/8 (0.055 mi.)	D24	29

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 5 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 16 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF

STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

CEDRI is a web application used by EPA programs and various stakeholders to manage environmental data transmitted to EPA in order to meet EPA's reporting requirements.

Highlights: U.S. EPA tasked START under contract 68-HE-0519-D0005, Task Order

Line Item No. F0107-0001DA103 to support the City of Chicago, Department of Assets, Information and Services (AIS) with a Targeted Brownfields Assessment. The City of Chicago, AIS has identified this property as part of the INVEST South/West corridor, part of an environmental justice community. The environmental assessment findings will be used to determine how to proceed in the redevelopment of the property. During a records review, AIS identified historical uses of the Site: Sanborn map: Private garage and commercial building. City Directory: Liverly services, Kinder LT Plastics Inc, Upholsterer. A review of adjacent and off-site properties within 250 feet identified the following: West Adjacent: Sanborn maps depict a dry cleaner, EDR lists two underground storage tanks (USTs) of fuel oil and unknown contents. East Adjacent: Sanborn maps depict an auto repair facility. Southeast: 195 feet southeast, EDR listing multiple USTs of varying contents, including benzene, naphthalene, alcohol, and heating oil. Leaking USTs (LUSTs) incidents have been reported at this site. West: 200 feet west, EDR lists multiple used oil, gasoline, heating oil USTs. One LUST incident in 2005 with a No Further Remediation (NFR) letter issued.

Name: 4430 W MADISON ST Address: 4430 W MADISON ST Recipient name: R5 TBA - Illinois (BIL)

Grant type: TBA

Property Number: 1610331028

Highlights: U.S. EPA tasked START under contract 68-HE-0519-D0005, Task Order

Line Item No. F0107-0001DA103 to support the City of Chicago, Department of Assets, Information and Services (AIS) with a Targeted Brownfields Assessment. The City of Chicago, AIS has identified this property as part of the INVEST South/West corridor, part of an environmental justice community. The environmental assessment findings will be used to determine how to proceed in the redevelopment of the property. During a records review, AIS identified historical uses of the Site: Sanborn map: Private garage and commercial building. City Directory: Liverly services, Kinder LT Plastics Inc, Upholsterer. A review of adjacent and off-site

properties within 250 feet identified the following: West Adjacent: Sanborn maps depict a dry cleaner, EDR lists two underground storage tanks (USTs) of fuel oil and unknown contents. East Adjacent: Sanborn maps depict an auto repair facility. Southeast: 195 feet southeast, EDR listing multiple USTs of varying contents, including benzene, naphthalene, alcohol, and heating oil. Leaking USTs (LUSTs) incidents have been reported at this site. West: 200 feet west, EDR lists multiple used oil, gasoline, heating oil USTs. One LUST incident in

2005 with a No Further Remediation (NFR) letter issued.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

storers, and disposers of hazardous waste.

The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

Inspector: 55420 Inspection Date: 02/24/2014

Revisit / Nov - Follow up inspection at 119 S. Cicero (Marathon). I Narrative:

> rechecked their ATG to see if Fuel alarm had been fixed inGasoline sumps. According to ATG tape it appears as normal sensor. However, the ATG was in Red alarm for communication error for Tank / Line # 2. I asked the attendent for paperworkfrom B K Equipment to prove repair and he could not produce any documents. I advised own to fix immediatey and show needed repair documents. Red tags are pending.

Additional (72) hours was given to make repairs). Owner will call

when fixed.

Highlights: U.S. EPA tasked START under contract 68-HE-0519-D0005, Task Order Line Item No. F0107-0001DA103 to support the City of Chicago,

Department of Assets, Information and Services (AIS) with a Targeted Brownfields Assessment. The City of Chicago, AIS has identified this property as part of the INVEST South/West corridor, part of an environmental justice community. The environmental assessment findings will be used to determine how to proceed in the

redevelopment of the property. During a records review, AIS identified historical uses of the site: Sanborn map: 60,000-gallon press tank on building roof, fire ruins on-site A review of adjacent and off-site properties within 250 feet identified the following: North Adjacent: EDR listing in underground storage tanks (UST), leaking UST (LUST), databases for fuel oil and tanks with unknown contents. A No Further Remediation (NFR) Letter for the LUST incident was issues in 2010. Northwest Adjacent: Sanborn maps depict a school.

East Adjacent: EDR listing in spills database for an incident in 1984, no additional details were identified. Northeast: 65 feet northeast, EDR listing in historic cleaner database. Northwest: 125 feet northwest, EDR listing in spills database for a diesel fuel leaked from suspected fill pipe on a UST on the property.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

storers, and disposers of hazardous waste.

The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and

with other entities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

Environmental Interest/Information System:

ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted. Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NWI Quad at Target Property Data Coverage

CHICAGO LOOP YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

71	1/2 - 1 Mile West	Inconclusive
87	1/2 - 1 Mile SSW	E
1G	1/2 - 1 Mile North	Not Reported
2G	0 - 1/8 Mile WSW	Not Reported
3G	1/2 - 1 Mile West	Inconclusive
5G	1/2 - 1 Mile SSW	F

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Paleozoic Category: Stratifed Sequence

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBANLAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Bedrock Max: > 0 inches

Soil Layer Information							
	Bou	ndary		Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	60 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sand

fine sandy loam silty clay loam loamy fine sand

Surficial Soil Types: fine sand

fine sandy loam silty clay loam loamy fine sand

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: sand

fine sand loamy sand silty clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GSG Consultants, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

PHOTO LOG

Project ID: 24-1002

Date: 2/9/2024
Photograph taken by: EB
A view of the front of the Subject Property building, facing north.

Date: 2/9/2024 Photograph taken by: EB

The east adjoining elevated railroad observed from the southwest corner of the Subject Property (background), facing northeast. Two mounds were observed in the vegetated area south of the site building (middle ground).

Project ID: 24-1002

Photograph taken by: EB

A small patch of stressed vegetation was observed near the north end of the western-most mound.

Photograph taken by: EB

A storm drain was observed in the middle of the southern vegetated area. Photo taken facing southwest towards W Madison Street.

Project ID: 24-1002

Photograph taken by: EB

A side view of the two mounds observed in the vegetated area of the property taken from the sidewalk in front of the front entrance.

Date: 2/9/2024 Photograph taken by: EB

An example of the six (6) pipes that were observed to be cemented in place in the vicinity of the two mounds.

Project ID: 24-1002

Photograph taken by: EB

A battery powered generator was located in the basement of the building.

Photograph taken by: EB

The labeling on the generator indicated that it is powered by a CLC battery.

Project ID: 24-1002

Date: 2/9/2024 Photograph taken by: EB

Standard commercial cleaners and building maintenance supplies were observed in the janitor's office. All containers appears to be in good condition. Light staining was observed coming out of the electrical closet in the janitors office.

Project ID: 24-1002

Date: 2/9/2024 Photograph taken by: EB

Inside the 1st floor electrical room. None of the electrical boxes were labeled to indicate the presence or absence of PCB containing equipment.

Date: 2/9/2024
Photograph taken by: EB
Another view of the 1st floor electrical room and equipment.

Project ID: 24-1002

Photograph taken by: EB
Electric power tools and charging stations in the work area of the boiler room.

Date: 2/9/2024
Photograph taken by: EB
Electrical equipment inside of the boiler room.

Project ID: 24-1002

Photograph taken by: EB

A view down the west adjoining alley, facing west. Seven (7) pole-mounted transformers were observed in the alley, four of which are pictured here.

Photograph taken by: EB

A view down the west adjoining public alley, facing north. An additional three (3) pole-mounted transformers were observed inside the Subject Property fence-line (background).

Project ID: 24-1002

Photograph taken by: EB

The southwest adjoining property was occupied by a church and associated parking lot.

Date: 2/9/2024 Photograph taken by: EB

A viaduct for the east adjoining elevated railroad above W Madison Street, facing east.

Project ID: 24-1002

Date: 2/9/2024 Photograph taken by: EB

A view from the sidewalk south of the Subject Property, looking west down W Madison Street.

Photograph taken by: EB

The south adjoining property, across W Madison Street was vacant at the time of the site reconnaissance.

Project ID: 24-1002

Date: 2/9/2024

Photograph taken by: EB

The northwest adjoining property was occupied by a church and associated parking lot.

Date: 2/9/2024 Photograph taken by: EB

The north adjoining property, across W Washington Boulevard was occupied by a school bus company (right), a banquet hall (center) and a church (left).
