Terracon Project No. 11257129
PBC Project No. 10030

Dear Mr. LaJeune:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced subject property (hereinafter known as the 'site'). This assessment was performed in accordance with Terracon proposal No. P11257129 dated July 3, 2025 and right of entry agreement with the City of Chicago (site owner) dated July 16, 2025.

We appreciate the opportunity to be of service to you on this project. In addition to ESA services, our professionals provide other environmental, geotechnical, construction materials, and facilities services on a wide variety of projects locally, regionally, and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,

Terracon Consultants, Inc.

Nicholas Margo
Field Geologist

Edmund A. Buc
Senior Project Manager

Executive Summary

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon proposal No. P11257129 dated July 3, 2025, and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. The ESA was conducted under the supervision or responsible charge of Edmund A. Buc, Environmental Professional. Nicholas C. Margo performed the site reconnaissance on July 24, 2025.

Findings and Opinions

A summary of the findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

According to information obtained from the Cook County Geographic Information System, the approximate 0.7-acre site is identified as a portion of Cook County Parcel No. 20-10-105-002. The site is located at 4711-4755 South Calumet Avenue, Chicago, Illinois and is currently undeveloped, consisting mainly of vegetated, concrete, and graveled areas. The site is referenced as Parcel A in the attachments associated with the May 22, 2025 Request for Proposal from the Public Building Commission of Chicago.

Historical Information

Based on a review of historical aerials and fire insurance maps, the site was developed with three-story row houses with basements from the 1920s until their removal by the 1960s. A commercial building with an associated asphalt parking lot adjoining the south was constructed in the 1960s and was demolished by the 1980s. The site has remained undeveloped since the 1980s. It is Terracon's opinion that the potential for the basement to be backfilled with impacted urban fill at the time of demolition constitutes a REC.

Surrounding properties have generally consisted of residential and commercial businesses since the 1920s. Three-story row houses and a printing shop were located to the south in the 1920s. An auto repair shop was located to the south in the 1950s and the row houses were removed and replaced by an asphalt parking lot in the 1960s. Hotels were located to the south-southwest in the 1920s and to the north-northeast in the 1950s and 1970s. Residences to the west were removed in the 1980s and remained

vacant until new residences were constructed in the 2010s. Businesses were removed to the northwest and replaced by a community park in the 2000s.

No indications of RECs associated with off-site properties were identified through a review of available historical information.

Previous Reports

Terracon made a FOIA request to the City of Chicago Department of Fleet and Facility Management on July 11, 2025. The following report was provided by the Department of Fleet and Facility Management & EHS Bureau:

- Phase I Environmental Site Assessment
  4711 and 4755 S. Calumet Avenue
  Dated: May 22, 2019
  Prepared by: The English Company
  For: GreenLine Homes, LLC

The property that was the subject of the 2019 Phase I ESA included Cook County Parcel Nos. 20-10-105-003 (south adjacent parcel) and 20-10-105-002 (the site) and south adjacent property, which were undeveloped with gravel, broken concrete, and vegetated areas. Historical records indicate the site was developed with residential structures from the 1920s until a commercial building and associated parking lot were constructed in the 1960s. The commercial building was removed in the 1980s and the site has remained vacant since. Environmental records showed all listed facilities were located more than 250 feet from the site and were therefore not identified as RECs due to their distance. RECs were not identified during the site visit, historical, and regulatory review. No additional investigation was recommended. As noted below, Terracon has identified several onsite and offsite RECs to the site based on its review of historical information and regulatory databases.

Terracon was provided with a review by the Department of Fleet & Facility Management for the above Phase I. The following issues were noted in the review:

- The site contained row houses with basements from at least 1925 to the 1950s. The basements were likely backfilled from building debris from the demolition.
- Historical Sanborn maps indicate a printing operation, and an auto repair facility were once present on or near the site.

Terracon agrees that the basements were likely backfilled with building debris at the time of demolition. The Phase I reviewed included the southern parcel that contained the former printing operation and bordered the auto repair facility; however, these former businesses were not located on the current site, and due to distance would not be an REC to the site.

Records Review

Based on a review of regulatory information obtained from an environmental regulatory database report provided by ERIS, the site is not listed in a regulatory database. The following nearby facility was identified:

- White Swan No. 3 Cleaners & Launderers, approximately 190 feet cross-gradient to the northwest, is listed on the Drycleaner Facilities (FED DRYCLEANERS) and Air Permits (AIR PERMITS) databases. According to the City Directories, the drycleaning facility operated from 1955 to 1981. Due to proximity, assumed hydraulic gradient, the distance drycleaning releases can travel, and length of operation, this facility is identified as a REC.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Site Reconnaissance

During the site reconnaissance, the site was observed to be undeveloped, consisting mainly of vegetated, concrete, and graveled areas. A pole-mounted transformer was observed near the northeast site corner. A concrete bin filled with miscellaneous debris was observed near the northwest site corner. Concrete road barriers were observed along the western site boundary. A leaking/overflowing grease disposal container was observed on an adjoining property to the north. Multiple solid waste dumpsters were observed along the adjoining alleyway to the east. Evidence of RECs was not identified through the site reconnaissance.

Adjoining Properties

The site is bordered by the following: A multi-tenant commercial business to the north; an alleyway followed by residences to the east; an asphalt-covered lot to the south; and South Calumet Avenue followed by residences and a CTA maintenance building to the west.

Significant Data Gaps

Significant data gaps (SDGs) were not identified.

Additional Services

Per the agreed scope of services, additional services as outlined in the proposal, including items described in Section 13.0 (Non-Scope Considerations) of ASTM E1527-21, were not conducted.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E1527-21 at 4711-4755 South Calumet Avenue, Chicago, Cook County, Illinois, the site. Controlled RECs (CRECs) or SDGs were not identified. The following RECs were identified:

Onsite

- Based on historical development of the site as apartment buildings with basements from at least 1925 to 1950, there is the potential that the basements were backfilled with urban fill at the time of demolition to match the site grade with the surrounding sidewalk elevation. In Chicago, urban fill from this timeframe commonly consists of former building materials with lead-based paint, cinders, and/or fill imported to the site from an unknown origin. The potential for impacted urban fill material to be present on the site may require special handling during future development and is an REC to the site.

Offsite

- Historical records indicate that two dry-cleaning facilities operated approximately 190 feet to the northwest and on an adjoining property to the west. The potential for contamination from historic dry-cleaning operations, including the use of solvents, is identified as a REC.
- The City of Chicago Fire Department provided Terracon with a historic tank permit for a property located west of the site. The document was blurry but appears to be a permit for a 1,000-gallon heating oil tank at 4730 Calumet Avenue. Due to the close proximity, tank size, and assumed hydraulic gradient, the historic presence of this UST is considered a REC.

Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon recommends the following additional actions.

- Additional Investigation:
  - Terracon recommends conducting additional investigation to evaluate subsurface conditions associated with the identified RECs.

1.0 Introduction

1.1 Site Description

Site Name	DFSS Bronzeville Regional Senior Center
Site Location/Address	4711-4755 South Calumet Avenue, Chicago, Cook County, Illinois
Parcel Number	Northern Portion of Parent Parcel #20-10-105-002
Land Area	Approximately 0.7-acres
Site Improvements	None
Anticipated Future Site Use	DFFS Senior Center

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the United States Geological Survey (USGS) 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A.

1.2 Scope of Services

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon proposal No. P11257129 dated July 3, 2025, and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. Recognized environmental conditions are defined by ASTM E1527-21 as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." This ESA includes consideration of the movement of hazardous substances and petroleum products in any form, including migration of vapor in the subsurface. A de minimis condition is not a recognized environmental condition.

This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews (including local government inquiries, as applicable), and a visual noninvasive reconnaissance of the site and

adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

Review of Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS)

PFAS are a family of compounds which are considered emerging contaminants of concern due to their mobility and longevity in the environment. PFAS has been used in many products, including but not limited to fire-fighting foam, anti-stick coatings, stain and water-repellent coatings, electroplating, and paper products, among others. On July 8, 2024, US EPA designated two PFAS compounds, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), including their salts and structural isomers, as hazardous substances under CERCLA; accordingly, PFOA and PFOS was evaluated within the scope of E1527-21. Please note that PFAS compounds are ubiquitous in the environment and this limited review is not to be construed as confirmation that PFAS compounds are not present in, at or under the site.

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations, and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e., evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, the information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- Reasonable attempts were made to contact the site owner; however, at the issuance of this report, interviews with the site owner were not performed.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances, petroleum products or PFAS compounds may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of the Public Building Commission of Chicago and City of Chicago. Use or reliance by any other party is prohibited without the written authorization of the Public Building Commission of Chicago and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Agreement. The limitation of liability defined in the Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-21 Section 4.6. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-21.

1.6 Client Provided Information

Prior to the site visit, Paul White, client's representative, was asked to provide the following user questionnaire information as described in ASTM E1527-21 Section 6.

Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client's Response		
		N/A*	Yes	No
Actual Knowledge of Environmental Liens that may encumber the site.	X			
Actual Knowledge of Activity Use Limitations (AULs) that may encumber the site.	X			
Specialized Knowledge or Experience that is material to a REC in connection with the site.	X			
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.	X			
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.			X	
Obvious Indicators of Releases at the site.	X			

Client-provided information indicated that the Phase I review completed by 2FM identified issues associated with the site. Additional details regarding the provided report review are provided in Section 3.7, and a copy of the questionnaire is included in Appendix C.

2.0 Physical Setting

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 600 ft. above sea level	USGS Topographic Map, Jackson Park, IL, dated 2024
Topographic Gradient	Generally flat	
Closest Surface Water	Washington Lagoon, approximately 6,920 feet southeast of the site.	
Soil Characteristics		
Soil Type	Urban land-	ERIS Physical Setting Report, Dated July 9, 2025
Description	Well drained soils with movement in the most restrictive layer as moderately high.	
Geology/Hydrogeology		
Formation	Silurian system undivided	ERIS Physical Setting Report, Dated July 9, 2025
Description	Consist mainly of Dolostone and Limestone	
Estimated Depth to First Occurrence of Groundwater	Estimated 4-5 feet Below Grounds Surface (BGS)	USGS Topographic Map, Jackson Park, IL, dated 2024
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (Generally flat; hydraulic gradient assumed to the east).	

* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

3.0 Historical Use Information

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area. Copies of selected historical documents are included in Appendix C.

3.1 Historical Topographic Maps, Aerial Photographs, and Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10-to-15-year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps, aerial photographs, and Sanborn maps are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from ERIS to evaluate past uses and relevant characteristics of the site and surrounding properties. ERIS provided Sanborn maps as summarized below.

- Topographic maps:
  - Chicago IL, dated 1889, 1891, 1900, 1901, 1929, 1953, 1963, 1972, 1993, 1998, 2015, 2021, 2024 (1:24,000)
- Aerial photographs:
  - AS&CS: 1938 (1”=500’)
  - USGS: 1952, 1962, 1973, 1983, 1998 (1”=500’)
  - USAF: 1968 (1”=500’)
  - NPC: 1990 (1”=500’)
  - USDA: 2007, 2009, 2011, 2012, 2014, 2015, 2017, 2019, 2021, 2023 (1”=500’)
- Sanborn Fire Insurance Maps:
  - 1925, 1950, 1975, 1988

Historical Maps and Aerial Photographs

Direction	Description
Site	Three-story row houses with basements (1925-1952); vacant (1962); commercial building (1968-1975); vacant (1983-2023)
North	Commercial and residential development (1889-2023); hotel (1950); community park to the northwest (2007-2023)
East	Commercial and residential development (1889-2023); The Deborah Boys Club (1925); hotel and doctors office (1950-1975)

Direction	Description
South	Commercial and residential development (1889-2023); Three-story row houses with basements (1925-1952); printing operation (1925); auto repair shop (1950); asphalt parking lot (1968-1973)
West	Commercial and residential development (1889-2023); hotel (1925); vacant land (1983-2012); residences (2014-2023)

Terracon reviewed the above historical sources for indications of RECs associated with the site. RECs associated with the site were not identified through a review of available historical resources.

3.2 Historical City Directories

The Digital Business Directory, Haines, Reuben H Donnelley Co, Chicago Cross Reference, Chicago Cross Reference, Association Inc, and Polks city directories used in this study were made available through ERIS (selected years reviewed: 1928-2024) and were reviewed at approximate five-year intervals, if readily available. The current street address for the site was identified as 4711-4755 South Calumet Avenue.

Historical City Directories

Direction	Description

Listings of more obvious environmental concern are underlined and italicized in the table above, and were further reviewed:

355 E 47th St

A dry-cleaning facility (Tailor Shop & Cleaners) operated approximately 110 feet cross-gradient to the northeast from 1978 to 1981. Based on assumed hydraulic gradient, this facility is not identified as a REC.

321 E 47th St

A dry-cleaning facility (White Swan Cleaners Number 3) operated approximately 190 feet cross-gradient to the northwest from 1955 to 1981. Due to distance, assumed hydraulic gradient, the distance drycleaning releases can travel, and length of operation, this

facility is identified as a REC. Additional information regarding this facility can be found in Section 4.1.

4759 S Calumet St

A dry-cleaning facility (Mims Your Cleaner & Laundry Service) operated approximately 250 feet cross-gradient to the south in 1955. Based on distance and assumed hydraulic gradient, this facility is not identified as a REC.

4714 S Calumet Ave

A dry-cleaning facility (Subway Cleaners) operated on an adjoining property to the west in 1952. Based on distance, the distance drycleaning releases can travel, and assumed hydraulic gradient, this facility is identified as a REC.

3.3 Site Ownership

Based on a review of information obtained from the Cook County assessor's records, the current site owner is Chicago City (1990-2025). In addition, previous owners identified included Central National Bank Chicago (1988).

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.5 Environmental Liens and Activity and Use Limitations

The scope of work did not include use of a title professional to obtain environmental lien or activity and use limitations. Environmental lien and AUL records recorded against the subject property were not provided by the client. The ERIS regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report.

3.6 Interviews Regarding Current and Historical Site Uses

A contact for a historical interview was not provided by the client for this report. Based on available information, this is not considered a significant data gap and does not impair the EP's ability to assess potential RECs in connection with the site based on historical use.

3.7 Prior Report Review

Terracon requested the client and City of Chicago Department of Fleet and Facility Management provide any previous environmental reports they are aware of for the site. Previous reports were provided by the Department of Fleet and Facility Management to Terracon for review.

- Phase I Environmental Site Assessment
  4711 and 4755 S. Calumet Avenue
  Dated: May 22, 2019
  Prepared by: The English Company
  For: GreenLine Homes, LLC

The property that was the subject of the 2019 Phase I ESA included Cook County Parcel Nos. 20-10-105-003 (south adjacent parcel) and 20-10-105-002 (the site) and south adjacent property, which were undeveloped with gravel, broken concrete, and vegetated areas. Historical records indicate the site was developed with residential structures from the 1920s until the 1960s, when a commercial building and associated parking lot were constructed. The commercial building was removed in the 1980s and the site has remained vacant since. Environmental records showed all listed facilities were located more than 250 feet from the site and were therefore not identified as RECs due to their distance. RECs were not identified during the site visit, nor with the historical or regulatory review. No additional investigation was recommended.

Terracon was provided with a review by the Department of Fleet & Facility Management for the above Phase I. The following issues were noted in the review:

- The site contained row houses with basements from at least 1925 to the 1950s. The basements were likely backfilled from building debris from the demolition.
- Historical Sanborn maps indicate a printing operation, and an auto repair facility were once present on or near the site.

Terracon agrees that the basements were likely backfilled with building debris at the time of demolition. The Phase I reviewed included the southern parcel that contained the former printing operation and bordered the auto repair facility; however, these former business were not located on the current site, and due to distance would not be an REC to the site.

Terracon has identified several onsite and offsite RECs to the site based on its review of historical information and regulatory databases, as discussed in Sections 3.2, 4.1, and 4.2.

4.0 Records Review

Regulatory database information was provided by ERIS, a contract information services company in a report dated July 9, 2025. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient, and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Terracon reviewed standard federal, state, and tribal environmental record sources within the approximate minimum search distances as required by ASTM E1527-21 and presented in Table 2 of Section 8.0 of The Standard (Types of Government Records to be Reviewed). Further, to enhance and supplement the standard environmental record sources, Terracon reviewed additional federal, state, tribal, local, and proprietary environmental record sources, provided by the database firm, if potentially useful and reasonably ascertainable. Please refer to Appendix D (the environmental regulatory database report) for the number of listings within each database reviewed and database definitions and descriptions.

Due to conversion of address data to location coordinates and the accuracy of government records, the facility locations depicted in the environmental regulatory database report may not match actual physical locations. As such, Terracon attempted to field-verify the actual distances of facilities of concern from the site.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities within 500 feet of the site. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

Listed Facilities

Facility Name and Location	Estimated Distance / Direction / Gradient	Database Listings	Findings Summary
Grand Laundry Co / 3037 to 3049 Calumet Ave	Adjoining/ southwest / cross-gradient (actually over 500 feet to the north)	HIST RISK	Not a REC, based on discussion below
The Promised Kitchen Restaurant / 349 E 47th St	Adjoining / north / cross-gradient	PERMITS CHICAGO	Not a REC, based on discussion below
Yorell Groves / 352 E 47th St	175 feet / northeast / cross-gradient	PERMITS CHICAGO	Not a REC, based on discussion below
Eastlake Management & Development / 352 E 47th St	175 feet / northeast / cross-gradient	PERMITS CHICAGO	Not a REC, based on discussion below
White Swan No. 3 Cleaners & Launderers / 319 E 47th St	190 feet / northwest / cross-gradient	FED DRYCLEANERS and AIR PERMITS	REC, based on discussion below
Tabacco Road Inc / 4701 S Dr Martin Luther King Jr Dr	375 feet / west / cross-gradient	PERMITS CHICAGO	Not a REC, based on discussion below
George C Adams / 4757 S Dr Martin Luther King Jr Dr	440 feet / southeast / cross-gradient	TANKS CHICAGO	Not a REC, based on discussion below

Grand Laundry Co

Grand Laundry Co is listed on the Historical Business Activity Risk (HIS RISK) database. This facility is listed in the HIST RISK database due to its operation as a laundromat in 1928 and its potential use of hazardous chemicals. A review of fire insurance maps provided by ERIS determined that the address 3037–3049 Calumet Ave is not adjoining the site and is instead located over 1,000 feet to the north. Based on distance from the site and assumed hydraulic gradient, this facility is not a REC.

The Promised Kitchen Restaurant

The Promised Kitchen Restaurant, adjoining to the north, is listed on the Chicago Environmental Permits (CHICAGO PERMITS) Database. The facility is listed on a

CHICAGO PERMITS database due to an air pollution control permit which is no longer active. This database listing is not indicative of a REC.

Yorell Groves

Yorell Groves, approximately 175 feet cross-gradient to the northeast, is listed on the PERMITS CHICAGO database. The facility is listed on a CHICAGO PERMITS database due to an air pollution control permit which is no longer active. This database listing is not indicative of a REC.

Eastlake Management & Development

Eastlake Management & Development, approximately 175 feet cross-gradient to the northeast, is listed on the PERMITS CHICAGO database. The facility is listed on a CHICAGO PERMITS database due to an air pollution control permit which is no longer active. This database listing is not indicative of a REC.

White Swan No. 3 Cleaners & Launderers

White Swan No. 3 Cleaners & Launderers, approximately 190 feet cross-gradient to the northwest, is listed on the Drycleaner Facilities (FED DRYCLEANERS) and Air Permits (AIR PERMITS) databases. According to the City Directories, the drycleaning facility operated from 1955 to 1981. Due to distance, assumed hydraulic gradient, the distance drycleaning releases can travel, and length of operation, this facility is identified as a REC.

Tabacco Road Inc

Tabacco Road Inc, approximately 375 feet cross-gradient to the west, is listed on the CHICAGO PERMIT database. The facility is listed on a CHICAGO PERMITS database due to an air pollution control permit which is no longer active. This database listing is not indicative of a REC.

George C Adams

According to the database, an approximately 1,000 to 2,000-gallon UST containing fuel oil was installed in the 1950s approximately 440 feet to the southeast. No additional information regarding the history of the UST could be located. Due to distance and assumed hydraulic gradient, the UST is not considered to be a REC.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed 11 facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, none of these facilities were identified as the site or adjacent properties. These facilities are listed in the database report in Appendix D.

4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
Illinois Environmental Protection Agency (IEPA) / via online file review	The site was not listed on the aforementioned database.
City of Chicago Fire Department / via online request	A Freedom of Information Act (FOIA) request was submitted on July 15, 2025. In response, the City of Chicago Fire Department provided Terracon with a historic tank permit. The document was blurry but appears to be a permit for a 1,000-gallon heating oil tank at 4730 Calumet Avenue, adjoining the site to the west across Calumet Avenue. Due to the close proximity and assumed hydraulic gradient, the historic presence of a UST is considered a REC.
City of Chicago Department of Fleet & Facility Management / via online request	A Freedom of Information Act (FOIA) request was submitted on July 11, 2025. In response, the Department of Fleet and Facility Management provided Terracon with a previous Phase I ESA. Additional information is provided in Section 3.7.
Office of the State Fire Marshal (OSFM) / via online file review	The site was not listed on the aforementioned database.
United States Environmental Protection Agency (USEPA) / via online MyEnvironment map	The site was not listed on the aforementioned database.

5.0 Site Reconnaissance

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

General Site Information

Site Reconnaissance	
Field Personnel	Nicholas C. Margo
Reconnaissance Date	July 24, 2025
Weather Conditions	Sunny – 80s
Site Contact/Title	Jose Barajas / 312-687-0042

5.2 Overview of Current Site Occupants

The site is currently vacant, and is currently undeveloped, consisting mainly of vegetated, concrete, and graveled areas.

5.3 Overview of Current Site Operations

The site currently has no site operations.

5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an “X”) are discussed in more detail following the table.

Site Characteristics

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	
	Air compressors	

Category	Item or Feature	Observed or Identified
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas, or mineral production	
	Other processes or equipment	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	
	Drums, barrels, and/or containers ≥ 5 gallons	
	MSDS or SDS	
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins, and/or dry wells	
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	
	Interior floor drains	
	Transformers and/or capacitors	X

Category	Item or Feature	Observed or Identified
Electrical Transformers/ PCBs	Other equipment	
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	
	Leachate and/or waste seeps	
	Trash, debris, and/or other waste materials	X
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	
	Surface water discoloration, odor, sheen, and/or free-floating product	
	Strong, pungent, or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	

Electrical Transformers/ PCBs

Transformers and/or capacitors

One pole-mounted transformer, owned and serviced by the local utility company, was observed on the northeast site corner. Some transformers contain mineral oil which may contain polychlorinated biphenyl (PCB); however, no information with regard to PCB content of these transformers was observed. No staining or evidence of releases were observed; therefore, the transformer is not considered to be a REC.

Releases or Potential Releases

Trash, debris, and/or other waste materials

A concrete bin containing miscellaneous debris was observed near the northwest site corner. Concrete road barriers were observed along the western site boundary. Multiple solid waste dumpsters were observed along the adjoining alleyway to the east. No

staining or evidence of releases were observed; therefore, the bin, barriers, and dumpsters are not considered to be RECs.

6.0 Adjoining Property Reconnaissance

Visual observations of adjoining properties (from site boundaries) are summarized below.

Adjoining Properties

Direction	Description
North	Multi-tenant business (339, 343, 347, 359 E 49th St)
East	Alleway followed by residences
South	Asphalt lot
West	South Calumet Avenue followed by residences and a CTA maintenance building (4712 S Calumet Avenue)

A leaking/overflowing grease disposal container was observed on an adjoining property to the north. Releases and staining were observed; however, the release appeared to be moving in the opposite direction of the site and is not considered to be a REC. RECs associated with the site originating from the remaining current off-site operations were not identified.

7.0 Additional Services

Per the agreed scope of services specified in the proposal, additional services (asbestos sampling, lead-based paint sampling, wetlands evaluation, lead in drinking water testing, radon testing, vapor encroachment screening, etc.) were not conducted.

8.0 Declaration

I, Edmund A. Buc, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX C

HISTORICAL DOCUMENTATION AND USER QUESTIONNAIRE

ASTM E1527-21 User Questionnaire

Date Completed:	7/31/25	
Person Completing Questionnaire	Name: Paul Waite Company: City of Chicago 2FM EHS	Phone: 312-744-9667 Email: paul.waite@cityofchicago.org
Site Name	DFSS Regional Senior Center	
Site Address	4711-4755 S Calumet Avenue, Chicago, IL 60615	
Point of Contact for Access	Name: James Michaels Company: City of Chicago DPD	Phone: 312-744-6061 Email: james.michaels@cityofchicago.org
Access Restrictions or Special Site Requirements?	___No ___Yes (If yes, please explain) Unknown	
Confidentiality Requirements?	___No ___Yes (If yes, please explain) Unknwon	
Current Site Owner	Name: City of Chicago Company:	Phone: Email:
Current Site Operator	Name: City of Chicago Company:	Phone: Email:
Reasons for ESA (e.g., financing, acquisition, lease, etc.)	New Construction	
Anticipated Future Site Use	Regional Senior Center	
Relevant Documents?	Please provide Terracon copies of prior Phase I or II ESAs, Asbestos Surveys, Environmental Permits or Audit documents, Underground Storage Tank documents, Geotechnical Investigations, Site Surveys, Diagrams or Maps, or other relevant reports or documents.	

ASTM User Questionnaire

To qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must respond to the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional.* Failure to conduct these inquiries could result in a determination that "*all appropriate* inquiries" is not complete.

1) Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the site under federal, tribal, state, or local law (40 CFR 312.25)?
___No ___Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.) Unknown

2) Did a search of land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded against the site under federal, tribal, state, or local law (40 CFR 312.26)?
___No ___Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.) Unknown

3) Do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312-28)?
___No ___Yes (If yes, explain below) Unknown

4) Does the purchase price being paid for this site reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the site?
___No ___Yes ___Not applicable (If yes or Not applicable, explain below) Unknown

5) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases (40 CFR 312.30)? For example, (a.) Do you know the past uses of the site? (b.) Do you know of specific chemicals that are present or once were present at the site? (c.) Do you know of spills or other chemical releases that have taken place at the site? (d.) Do you know of any environmental cleanups that have taken place at the site?
___No ___Yes (If yes, explain below) See below

6) Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence or likely presence of releases at the site (40 CFR 312.31)?
___No ___Yes (If yes, explain below) See below

Comments or explanations:

I have only addressed the environmental issues that 2FM has knowledge of. A May 22, 2019, Phase I ESA and a September 17, 2019, Phase I review memo have been provided to Terracon. No additional environmental records have been identified.

RE: CITY DIRECTORY RESEARCH
4711-4755 S Calumet Avenue
Chicago,IL 60653

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
220-430 of E 47th St
220-430 of E 48th St
4630-4830 of S Calumet Ave

PSR
PHYSICAL SETTING REPORT

Property Information

Order Number:	25070900136p
Date Completed:	July 9, 2025
Project Number:	11257129
Project Property:	DFSS Regional Senior Center 4711-4755 S Calumet Avenue Chicago IL 60653
Coordinates:	
Latitude:	41.80831869
Longitude:	-87.61776979
UTM Northing:	4628715.76181 Meters
UTM Easting:	448684.106296 Meters
UTM Zone:	UTM Zone 16T
Elevation:	599.75 ft
Slope Direction:	N

Topographic Information....2
Hydrologic Information....4
Geologic Information....9
Soil Information....11
Wells and Additional Sources....16
Summary....17
Detail Report....22
Radon Information....154
Appendix....155
Liability Notice....157

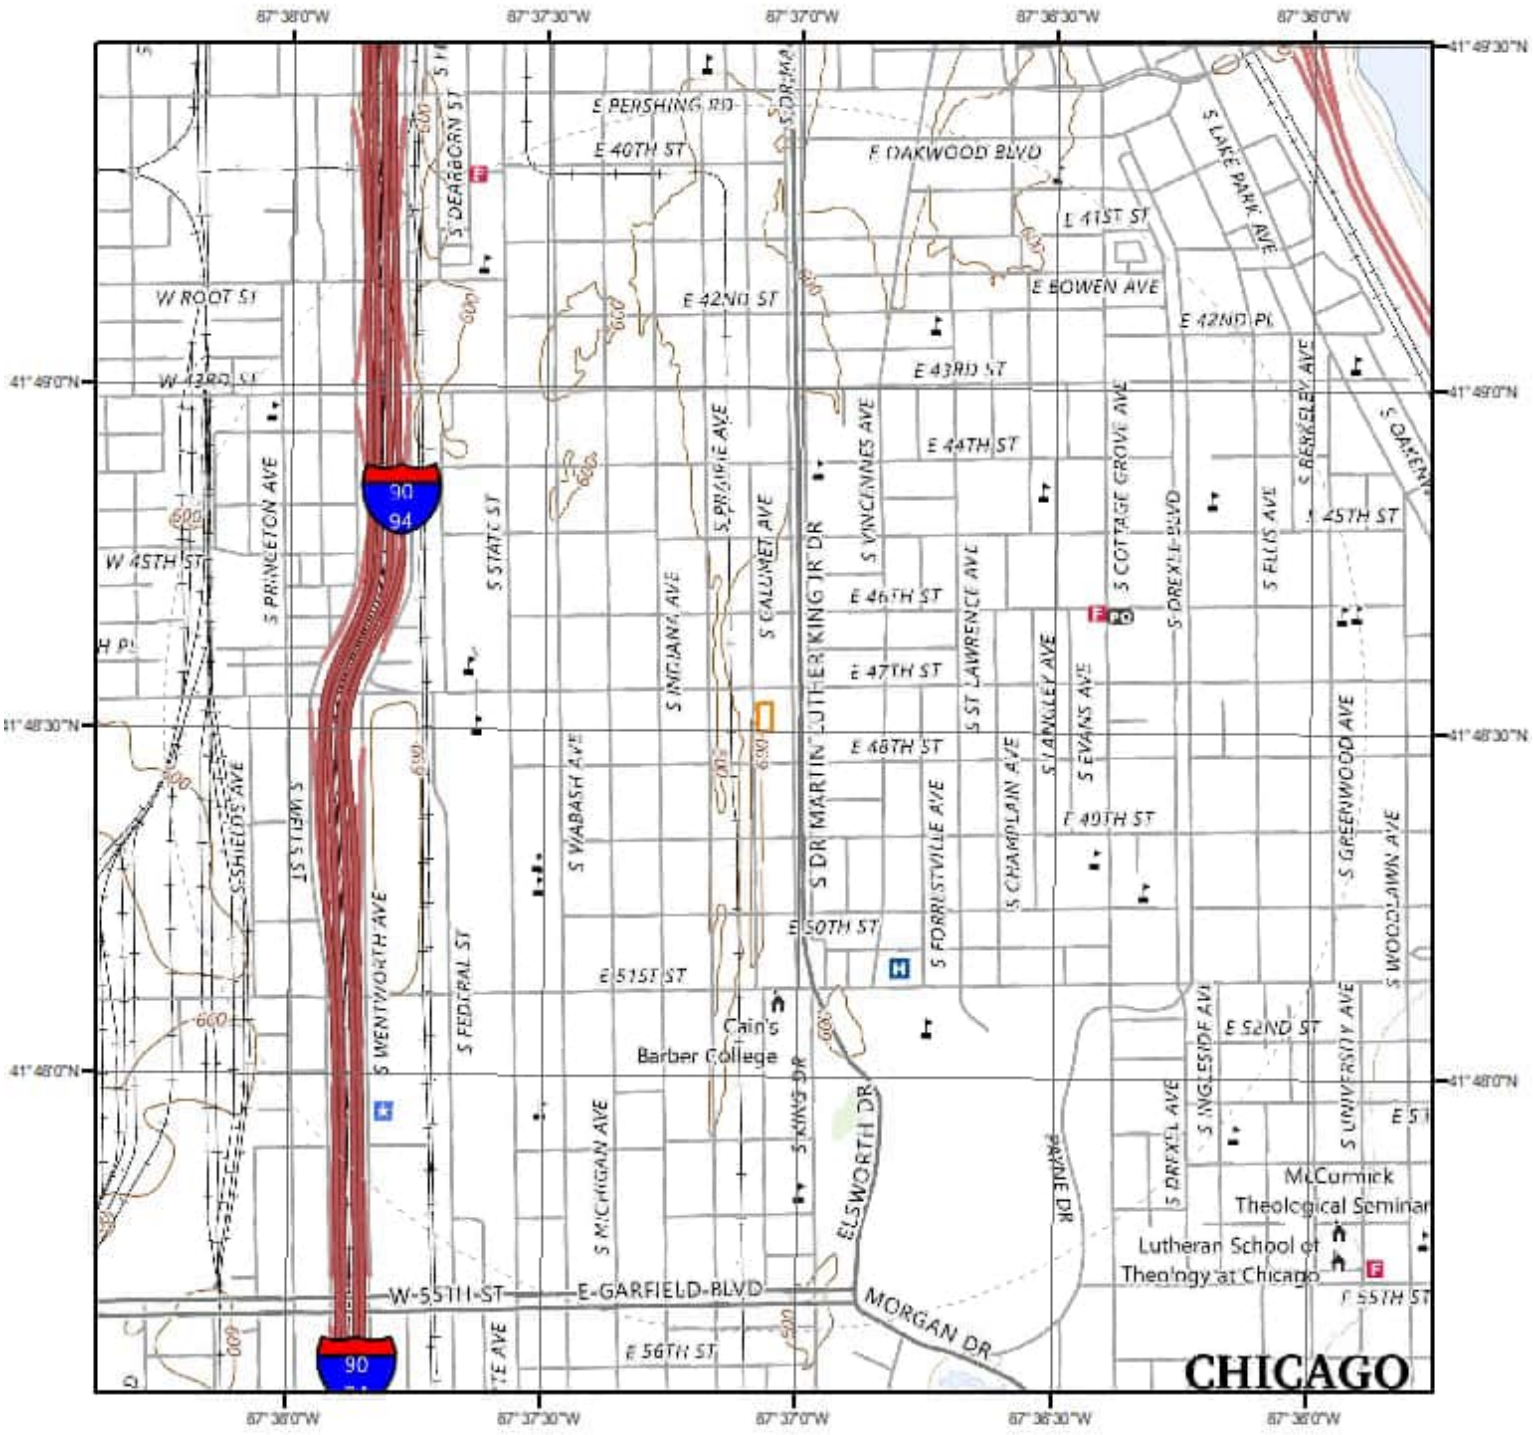
The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information



Current USGS Topo (2024)

Quadrangle(s): Englewood, IL; Jackson Park, IL

Source: USGS 7.5 Minute Topographic Map

Topographic Information

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Topographic information at project property:

Elevation:	599.75 ft
Slope Direction:	N

Zone subtype:	AREA OF MINIMAL FLOOD HAZARD

Hydrologic Information

FEMA Flood Zone Definitions

Special Flood Hazard Areas – High Risk

Special Flood Hazard Areas represent the area subject to inundation by 1-percent-annual chance flood. Structures located within the SFHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory flood insurance purchase requirements apply in these zones.

ZONE	DESCRIPTION
A	Areas subject to inundation by the 1-percent-annual-chance flood event. Because detailed hydraulic analyses have not been performed, no Base Flood Elevations (BFEs) or flood depths are shown.
AE, A1-A30	Areas subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods. BFEs are shown within these zones. (Zone AE is used on new and revised maps in place of Zones A1–A30.)
AH	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are 1–3 feet. BFEs derived from detailed hydraulic analyses are shown in this zone.
AO	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are 1–3 feet. Average flood depths derived from detailed hydraulic analyses are shown within this zone.
AR	Areas that result from the decertification of a previously accredited flood protection system that is determined to be in the process of being restored to provide base flood protection.
A99	Areas subject to inundation by the 1-percent-annual-chance flood event, but which will ultimately be protected upon completion of an under-construction Federal flood protection system. These are areas of special flood hazard where enough progress has been made on the construction of a protection system, such as dikes, dams, and levees, to consider it complete for insurance rating purposes. Zone A99 may be used only when the flood protection system has reached specified statutory progress toward completion. No BFEs or flood depths are shown.

Coastal High Hazard Areas – High Risk

Coastal High Hazard Areas (CHHA) represent the area subject to inundation by 1-percent-annual chance flood, extending from offshore to the inland limit of a primary front al dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. Structures located within the CHHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory purchase requirements apply in these zones.

ZONE	DESCRIPTION
V	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards associated with storm-induced waves. Because detailed coastal analyses have not been performed, no BFEs or flood depths are shown.
VE, V1-V30	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards due to storm-induced velocity wave action. BFEs derived from detailed hydraulic coastal analyses are shown within these zones. (Zone VE is used on new and revised maps in place of Zones V1–V30.)

Hydrologic Information

Moderate and Minimal Risk Areas

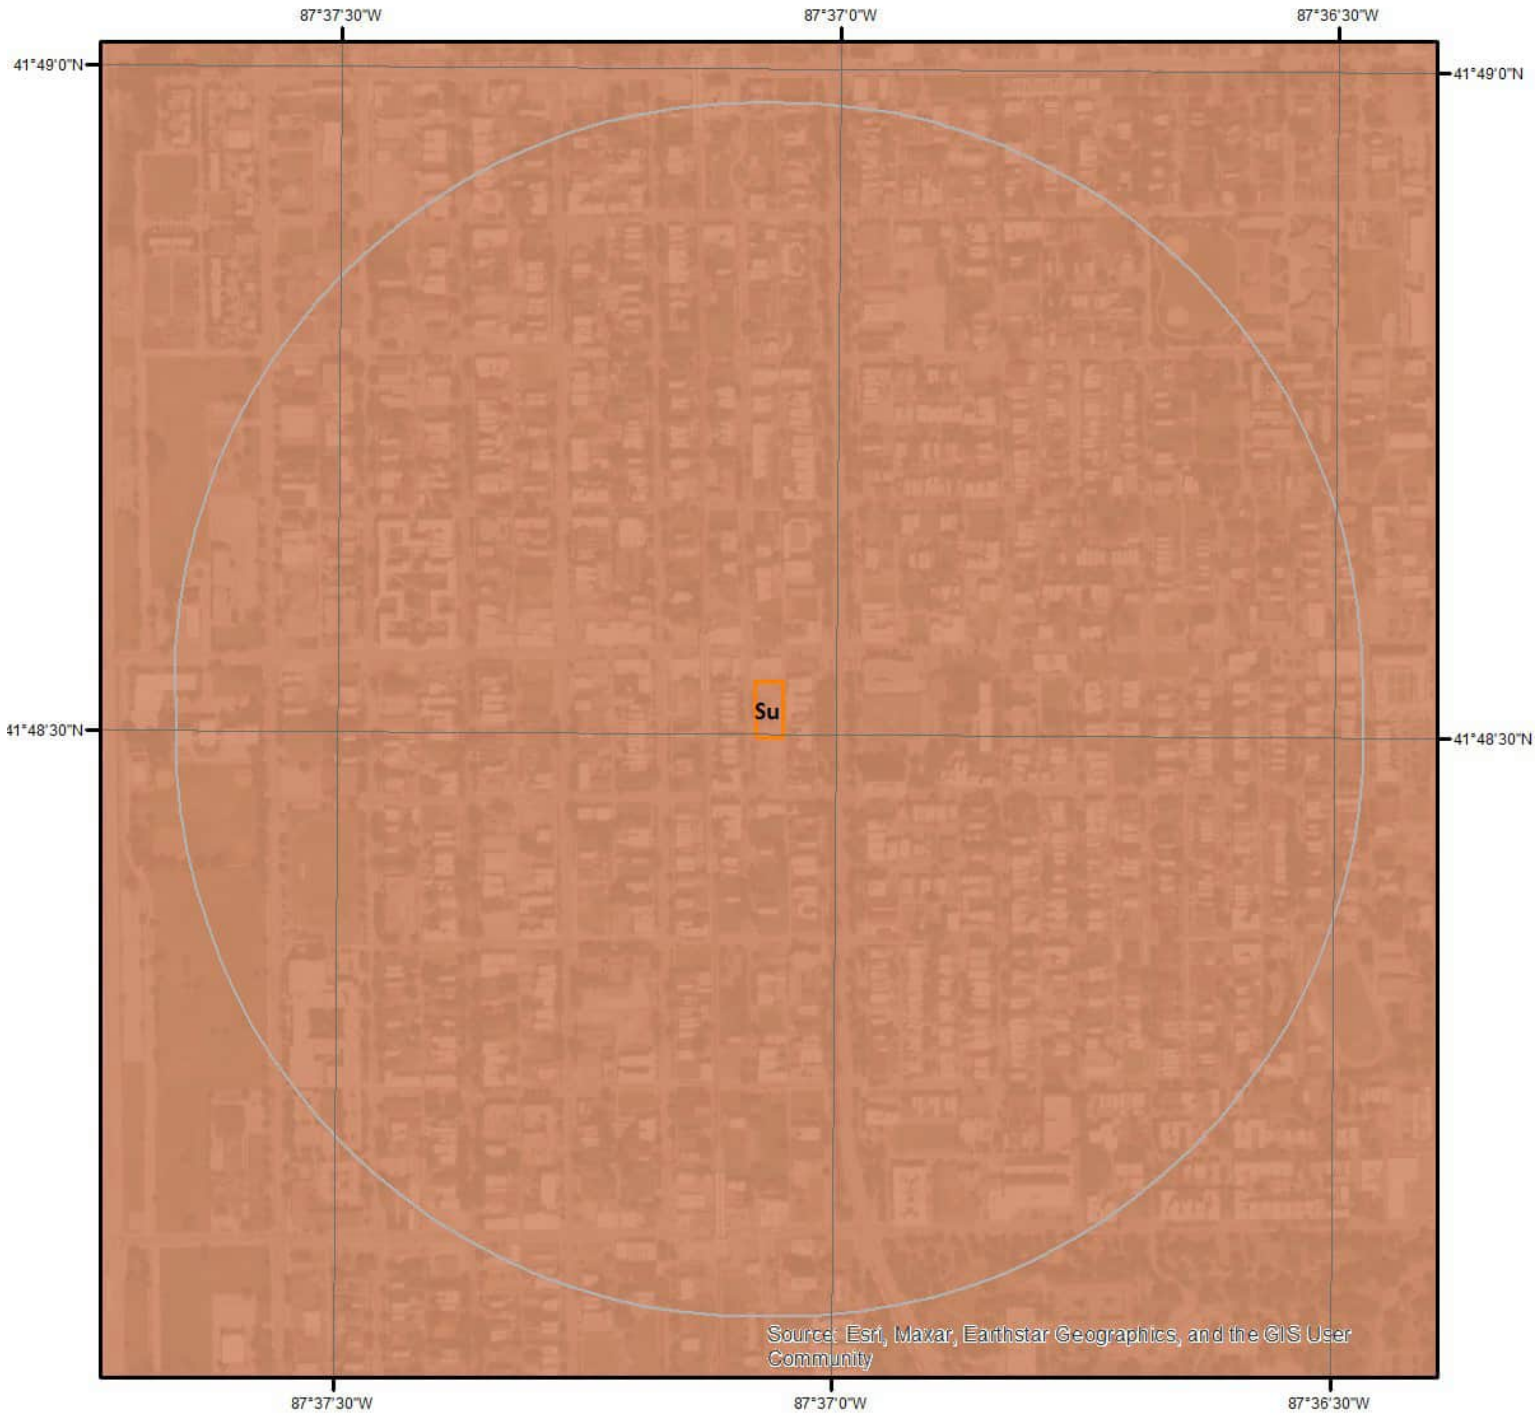
Areas of moderate or minimal hazard are studied based upon the principal source of flood in the area. However, buildings in these zones could be flooded by severe, concentrated rainfall coupled with inadequate local drainage systems. Local stormwater drainage systems are not normally considered in a community's flood insurance study. The failure of a local drainage system can create areas of high flood risk within these zones. Flood insurance is available in participating communities, but is not required by regulation in these zones. Nearly 25-percent of all flood claims filed are for structures located within these zones.

ZONE	DESCRIPTION
B, X (shaded)	Moderate risk areas within the 0.2-percent-annual-chance floodplain, areas of 1-percent-annual-chance flooding where average depths are less than 1 foot, areas of 1-percent-annual-chance flooding where the contributing drainage area is less than 1 square mile, and areas protected from the 1-percent-annual-chance flood by a levee. No BFEs or base flood depths are shown within these zones. (Zone X (shaded) is used on new and revised maps in place of Zone B.)
C, X (unshaded)	Minimal risk areas outside the 1-percent and .2-percent-annual-chance floodplains. No BFEs or base flood depths are shown within these zones. (Zone X (unshaded) is used on new and revised maps in place of Zone C.)

Undetermined Risk Areas

ZONE	DESCRIPTION
D	Unstudied areas where flood hazards are undetermined, but flooding is possible. No mandatory flood insurance purchase requirements apply, but coverage is available in participating communities.

Geologic Information



Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

N

0 0.125 0.25 Miles

ERIS

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Su

Unit Name:	Silurian System undivided
Unit Age:	Silurian (Llandovery to Pridoli)
Primary Rock Type:	Dolostone
Secondary Rock Type:	Limestone
Unit Description:	Silurian System undivided, includes Sexton Creek Limestone, St. Clair Limestone, and Moccasin Springs Formation in southern Illinois; includes Wilhelmi Formation, Elwood Dolomite, Kankakee Dolomite, Joliet Dolomite, Sugar Run Dolomite, and Racine Dolomite in northeastern Illinois; includes Mosalem, Tete des Morts, Blanding, Sweeney, Marcus, and Racine Dolomites in northwestern Illinois.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 2800A (33.16%)

Map Unit Name:	Urban land-Psamments complex, nearly level
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Psamments(30%)

horizon H1(0cm to 25cm)	Loam
horizon H2(25cm to 97cm)	Sand
horizon H3(97cm to 152cm)	Sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 2800A - Urban land-Psamments complex, nearly level

Component: Urban land (65%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Psamments (30%)
The Psamments, nearly level component makes up 30 percent of the map unit. Slopes are 0 to 2 percent. This component is on leveled land. The parent material consists of earthy fill. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 4s. This soil does not meet hydric criteria.

Component: Watseka (5%)
Generated brief soil descriptions are created for major soil components. The Watseka soil is a minor component.

Map Unit 392A (62.21%)

Map Unit Name:	Urban land-Orthents, loamy, complex, nearly level
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	130cm
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Orthents(20%)

horizon H1(0cm to 20cm)	Loam
horizon H2(20cm to 152cm)	Clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 392A - Urban land-Orthents, loamy, complex, nearly level

Component: Urban land (70%)

Soil Information

Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Orthents (20%)
The Orthents, loamy, nearly level component makes up 20 percent of the map unit. Slopes are 0 to 2 percent. This component is on leveled land. The parent material consists of Earthy fill. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 51 inches during February, March, April. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 2s. This soil does not meet hydric criteria.

Component: Orthents (5%)
Generated brief soil descriptions are created for major soil components. The Orthents, loamy-skeletal, nearly level soil is a minor component.

Component: Orthents (5%)
Generated brief soil descriptions are created for major soil components. The Orthents, clayey, nearly level soil is a minor component.

Map Unit 533 (1.34%)

Map Unit Name:	Urban land
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 533 - Urban land

Component: Urban land (90%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Orthents (4%)
Generated brief soil descriptions are created for major soil components. The Orthents, clayey, nearly level soil is a minor component.

Component: Orthents (4%)
Generated brief soil descriptions are created for major soil components. The Orthents, loamy, nearly level soil is a minor component.

Component: Orthents (2%)
Generated brief soil descriptions are created for major soil components. The Orthents, loamy-skeletal, nearly level soil is a minor component.

Map Unit 741B (1.96%)

Map Unit Name:	Oakville fine sand, 1 to 6 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Oakville(94%)

horizon H1(0cm to 18cm)	Fine sand
horizon H2(18cm to 102cm)	Fine sand
horizon H3(102cm to 152cm)	Fine sand

Soil Information

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 741B - Oakville fine sand, 1 to 6 percent slopes

Component: Oakville (94%)
The Oakville component makes up 94 percent of the map unit. Slopes are 1 to 6 percent. This component is on outwash plains. The parent material consists of Eolian deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the F110XY016IL Sand Woodland ecological site. Nonirrigated land capability classification is 4s. This soil does not meet hydric criteria.

Component: Watseka (3%)
Generated brief soil descriptions are created for major soil components. The Watseka soil is a minor component.

Component: Urban land (3%)
Generated brief soil descriptions are created for major soil components. The Urban land soil is a minor component.

Map Unit 800A (0.4%)

Map Unit Name:	Psamments, nearly level
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Psamments(92%)

horizon H1(0cm to 25cm)	Loam
horizon H2(25cm to 97cm)	Sand
horizon H3(97cm to 152cm)	Sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 800A - Psamments, nearly level

Component: Psamments (92%)
The Psamments, nearly level component makes up 92 percent of the map unit. Slopes are 0 to 2 percent. This component is on leveled land. The parent material consists of earthy fill. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 4s. This soil does not meet hydric criteria.

Component: Urban land (4%)
Generated brief soil descriptions are created for major soil components. The Urban land soil is a minor component.

Component: Orthents, loamy (4%)
Generated brief soil descriptions are created for major soil components. The Orthents, loamy soil is a minor component.

Map Unit 802A (0.94%)

Map Unit Name:	Orthents, loamy, nearly level
Bedrock Depth - Min:	

Soil Information

Watertable Depth - Annual Min:	130cm
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Orthents(90%)

horizon H1(0cm to 20cm)	Loam
horizon H2(20cm to 152cm)	Clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 802A - Orthents, loamy, nearly level

Component: Orthents (90%)
The Orthents, loamy, nearly level component makes up 90 percent of the map unit. Slopes are 0 to 1 percent. This component is on leveled land. The parent material consists of Earthy fill. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 51 inches during February, March, April. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 2s. This soil does not meet hydric criteria.

Component: Urban land (3%)
Generated brief soil descriptions are created for major soil components. The Urban land soil is a minor component.

Component: Orthents (3%)
Generated brief soil descriptions are created for major soil components. The Orthents, clayey, nearly level soil is a minor component.

Component: Orthents (2%)
Generated brief soil descriptions are created for major soil components. The Orthents, loamy-skeletal, nearly level soil is a minor component.

Component: Drummer (1%)
Generated brief soil descriptions are created for major soil components. The Drummer soil is a minor component.

Component: Pella (1%)
Generated brief soil descriptions are created for major soil components. The Pella soil is a minor component.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *COOK* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *COOK* County

No Measures/Homes:	261
Geometric Mean:	2.3
Arithmetic Mean:	2.8
Median:	2.2
Standard Deviation:	1.8
Maximum:	11.6
% >4 pCi/L:	19
% >20 pCi/L:	0
Notes on Data Table:	TABLE 2. Screening indoor radon data from the IDNS statewide radon survey conducted in Illinois during 1987-91. Data represent 2-week to 3-month alpha-track measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

This list of drinking water violations and enforcement actions is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database, as part of the national download of Safe Drinking Water Act (SDWA) data. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program, including monitoring, enforcement, and violation data related to requirements established by the SWDA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

This national download of Safe Drinking Water Act (SDWA) data is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program related to requirements established by the Safe Drinking Water Act (SDWA). Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP

is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC).

State Sources

Oil and Gas Wells and Borings **OGW**

List of records found in the the Illinois Oil and Gas Resources mapping project ILOIL data set, made available by the Illinois State Geological Survey (ISGS). Additionally includes select records from the ISGS Wells and Borings database – those not found in the ISGS Illinois Water & Related Wells ILWATER data.

Public Water Supply Facilities **PWS**

A list of public water supply facilities made available by the Illinois Environmental Protection Agency. Note that locations are administrative contact addresses, which may or may not coincide with the location of the public water system or its components.

Underground Injection Control Wells **UIC**

The Underground Injection Control (UIC) Program is a federal program established under the provision of the Safe Drinking Water Act of 1974. Since groundwater is a major source of drinking water in the United States, the UIC Program requirements were designed to prevent contamination of groundwater resulting from the operation of injection wells. The Underground Injection Well Inventory is provided by the Illinois Environmental Protection Agency. This inventory includes Class V Injections Wells which are utilized to inject non-hazardous waste into or above the Underground Source of Drinking Water.

Water Wells **WATER WELLS**

The water well database, maintained and made available by the Illinois State Geological Survey (ISGS), is an official repository for records of wells drilled in the state of Illinois in the Geoscience Information Stewardship Section.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Re: Phase I Environmental Assessment:
4711 and 4755 S Calumet Avenue, Chicago, Illinois 60615

Dear Mr. Blacknard:

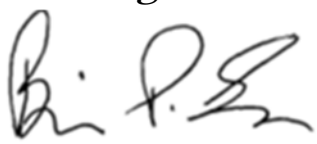
The English Company is pleased to present the following report documenting the methods and results of the Phase I Environmental Assessment performed at the above referenced property.

Please find enclosed one copy of the report for your review. After you have had the time to review the report, please feel free to call Mr. Brian English at (630) 260-8099 to have any questions you may have answered.

Thank you for the opportunity to serve you on this project.

Very truly yours,

The English Company



Brian P. English
Partner

1.0 INTRODUCTION

At the request of Mr. Andre Blacknard with Greenline Homes, LLC, *The English Company (TEC)* has performed a Phase I Environmental Assessment for the property located at 4711 and 4755 South Calumet Avenue, Chicago, Illinois on May 13, 2019. *TEC* was accompanied by Mr. Blacknard with Greenline Homes, LLC, the User of the Phase I ESA, at the time of the site inspection.

1.1 Purpose

This assessment was conducted to identify Recognized Environmental Conditions (RECs), as defined by the American Society for Testing and Materials (ASTM) Standard E 1527-05. *TEC* performed the Phase I ESA to constitute all appropriate inquiry consistent with good commercial and customary practice.

This assessment is not intended to include identification of conditions that do not present a direct threat to public health or the environment and that generally would not be subject to an enforcement action if brought to the attention of appropriate governmental agencies.

1.2 Scope of Work

The Phase I Environmental Assessment consisted of (1) a database search/document review, (2) review of readily available historical documentation, (3) a site investigation and property reconnaissance, and (4) personal interviews.

1.3 Limitations and Expectations

The evaluations and conclusions presented herein are based upon observations made during site reconnaissance, review of ownership records, discussions with local officials, and review of readily accessible environmental databases. *TEC* has assumed, where reasonable, that the information reviewed is true and accurate but assumes no responsibility or liability for its accuracy or completeness. *TEC's* site observations are of the conditions observed at the time of the assessment. The analysis of the property does not represent a full-scale investigation and evaluation of the site; in addition, we have accepted as true the information provided by the sources referenced in Section 10.0.

Because the evaluation of the property and immediate site vicinity were based upon limited data and information, the risk or likelihood of environmental impairment at the property cannot be completely ruled out.

Conclusions provided with regard to subsurface soil and groundwater impacts are limited to those that can be formed based on a non-intrusive investigation. *TEC* has considered all the information collected during this assessment to ascertain the potential presence of a release or threatened release of hazardous substances at the property. Based on the totality of information, *TEC* has assessed whether or not an obvious conclusion may be drawn that there are conditions indicative of a release or threatened release and considered whether the parties should be able to detect the release by conducting a subsurface investigation. Where *TEC*

concludes that the potential for impact is present, it should be understood that such impact can only be identified or ruled out through subsurface investigation. The absence of environmental hazards in the subsurface cannot be guaranteed based on conditions observed on the surface. The scope of this project did not include subsurface soil or groundwater sampling.

1.4 Special Terms and Conditions

There are no special terms or conditions that were included as part of this Phase I Environmental Site Assessment.

1.5 User Reliance

This report has been performed for the exclusive use of the client. Our report and its findings shall not, in whole or part, be disseminated to any other party, nor be used by any other party without prior written consent.

2.0 EXECUTIVE SUMMARY

The subject property consists of two vacant/undeveloped contiguous parcels totaling 1.5-acres (65,340 square feet) located on the east side of South Calumet Avenue between East 47th Street and East 48th Street, in the south-central portion of Chicago, Hyde Park Township, Cook County, Illinois.

The subject property is comprised of two contiguous parcels; a 1.13-acre (49,000 square feet), rectangular-shaped parcel with an established PIN of 20-10-105-002-0000 and addressed 4711 South Calumet Avenue, and a 0.37-acre (15,900 square feet) square-shaped parcel with an established PIN of 20-10-105-003-0000 and addressed 4755 South Calumet Avenue. The current owner of both parcels is the City of Chicago.

The topography of the site is relatively flat with no significant change in elevation. The subject property as a whole is rectangular-shaped with a public sidewalk extending along the western property boundary and a paved public alley extending along the eastern property boundary. The subject property is vacant and undeveloped with no structures.

Entry to the subject property is via a concrete drive off of South Calumet Avenue at the northwest corner and at the west central side that lead to a gravel and broken concrete surface. The gravel and concrete surface extend across the majority of the subject property with intermittent areas of vegetation.

The subject property is mostly comprised of concrete and gravel areas with intermittent areas of vegetation. Two pole-mounted transformers are located on the southeast and northeast areas of the subject property and three solid waste containers are located in the northeast area presumably for the east adjacent residential properties.

Historical information reviewed indicates that the subject property had been developed with 25 residential structures along South Calumet Avenue from at least 1925 to 1968. By 1968, the residential structures were demolished, and the area was redeveloped with a single commercial structure and associated parking. The occupant of the commercial structure was not ascertained; however, the structure was demolished, and the area has remained vacant since approximately 1980. The portion of the subject property along East 47th Street had been developed with several commercial storefronts and a hotel from at least 1925 through present day. The subject property was not identified on any ASTM Federal or State databases.

Presence of utilities at the subject property is unknown.

The use of the adjacent properties observed at the time of the site inspection is described below:

North:	Retail tenants include Boost Mobile, Barbershop, Exclusive Boutique, Maggie's Gyros and Chicken.
South:	East 48th Street followed by a multi-family residential building.
East:	Public alleyway followed by single-family homes and multi-family residential buildings.
West:	South Calumet Avenue followed by Multi-family residential buildings.

TEC reviewed historical aerial photographs, topographic maps and city directories and as a result of these reviews encountered no potential issues of environmental concern.

TEC concludes the following:

Recognized Environmental Condition

- None.

Historical Recognized Environmental Conditions

- None.

De Minimis Conditions

- None

Business Environmental Risk

- None

This Executive Summary section is intended to provide a brief overview of the pertinent findings of this Phase I investigation. It should be noted that although the Executive Summary is an integral part of a report, it should not be substituted in lieu of reading the entire report. The entire report must be read in order to fully understand the findings and potential environmental concerns associated with the subject property.

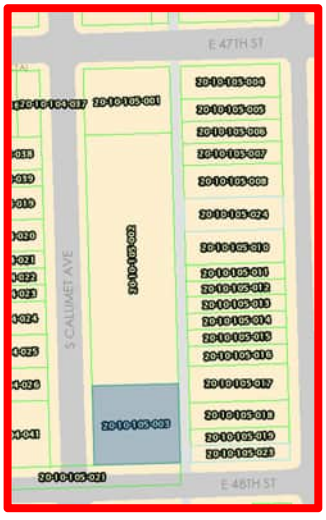
3.0. SITE DESCRIPTION

3.1 Property Location and Description

The subject property consists of two vacant/undeveloped contiguous parcels totaling 1.5-acres (65340 square feet) located on the east side of South Calumet Avenue between East 47th Street and East 48th Street, in the south-central portion of Chicago, Hyde Park Township, Cook County, Illinois.

The Property Identification Numbers (PIN) for the subject property obtained from the Cook County Assessors website are as follows:

- 20-10-105-002-0000 (4711 South Calumet Avenue): 1.13-acre (49,000 square feet), rectangular-shaped parcel. The current owner is the City of Chicago. There are no structures assigned to this parcel. A copy of the information obtained from the Cook County Assessor's Treasurer's website and the Hyde Park Township Assessor's website is provided in Appendix C.



- 20-15-105-003-0000 (4755 South Calumet Avenue): 0.37-acre (15,900 square feet) square-shaped parcel. The current owner is the City of Chicago. There are no structures assigned to this parcel. A copy of the information obtained from the Cook County Assessor's Treasurer's website and the Hyde Park Township Assessor's website is provided in Appendix C.

3.2 Site Vicinity and General Conditions

The subject property is located in a commercial/residential area in the south-central portion of Chicago, Illinois. The property is currently undeveloped with no structures.

3.3 Current Property Use

The subject property is currently vacant undeveloped parcels owned by the City of Chicago.

3.4 Structures, Roads, and Other Site Improvements

The topography of the site is relatively flat with no significant change in elevation. The subject property as a whole is rectangular-shaped with a public sidewalk extending along the western property boundary and a paved public alley extending along the eastern property boundary. The subject property is vacant and undeveloped with no structures.

Presence of utilities at the subject property is unknown.

Entry to the subject property is via a concrete drive off of South Calumet Avenue at the northwest corner and at the west central side that lead to a gravel and broken concrete surface. The gravel and concrete surface extend across the majority of the subject property with intermittent areas of vegetation.

The subject property is mostly comprised of concrete and gravel areas with intermittent areas of vegetation. Two pole-mounted transformers are located on the southeast and northeast areas of the subject property and three solid waste containers are located in the northeast area presumably for the east adjacent residential properties.

3.5 Current Adjacent Property Use

The use of the adjacent properties that was observed at the time of the site inspection is described below:

The use of the adjacent properties observed at the time of the site inspection is described below:

North:	Retail tenants include Boost Mobile, Barbershop, Exclusive Boutique, Maggie's Gyros and Chicken.
South:	East 48th Street followed by a multi-family residential building.
East:	Public alleyway followed by single-family homes and multi-family residential buildings.
West:	South Calumet Avenue followed by Multi-family residential buildings.

No recognized environmental concerns were observed in association with the adjacent properties at the time of the site inspection.

4.0 USER PROVIDED INFORMATION

The Phase I Environmental Site Assessment was performed as part of the environmental due diligence requirements for the refinancing of the property.

The User did not provide *TEC* with a chain-of-title search for the subject property, so these records were not reviewed.

An appraisal of the subject property was also not provided for *TEC's* review. Client should review the appraiser's valuation report to ensure the property's finance price is consistent with the valuation.

No additional information was provided to us, including but not limited to: update letters, AULs, environmental liens, investigative reports, contact names and telephone numbers of previous owners, or other additional environmental information for the subject site.

5.0 RECORDS REVIEW

5.1 Physical Setting

The 7.5-minute topographic map of the area indicates that the site is located at an approximate elevation of 600-feet above mean sea level.

Groundwater flow directions can be highly variable in neighboring are and can be influenced by factors such as water production wells or re-grading or development in the area. Groundwater flow direction can only be determined via site-specific groundwater monitoring.

5.2 Historical Subject property Use

TEC reviewed readily available historical documents including aerial photographs, historical topographic maps, and Sanborn maps obtained from Environmental Risk Information Services (ERIS), Buffalo, New York. Sanborn maps were not available for the subject property. The historical information is summarized below. All historical documents are provided in Appendix B.

DATE	SOURCE	DESCRIPTION
1889	Topographic Map	The subject property is depicted with an unknown number of structures.
1891	Topographic Map	The subject property is depicted with an unknown number of structures.
1900	Topographic Map	The subject property is depicted with multiple structures.
1901	Topographic Map	The subject property is depicted with multiple structures.
1925	Fire Insurance Map	Several structures labeled as flats are depicted along South Calumet Avenue.
1929	Topographic map	The subject property is depicted with multiple structures.
1938	Aerial Photograph	Several structures are visible on the subject property along South Calumet Avenue.
1950	Fire Insurance Map	Several structures labeled as flats are depicted along South Calumet Avenue.
1952	Aerial Photograph	There were no changes to the subject property.
1953	Topographic Map	The subject property is shaded pink indicating urban development.
1962	Aerial Photograph	The subject property along South Calumet Avenue appears to be a vacant lot.

1963	Topographic Map	The portion of the subject property along South Calumet Avenue is no longer shaded in pink indicating it is vacant.
1968	Aerial Photograph	The subject property is developed with a large structure centrally located along South Calumet with vehicle parking to the south.
1972	Aerial Photograph	A single large structure is visible on the northern portion of the property.
1972	Topographic Map	There were no changes to the subject property.
1975	Fire Insurance Map	A single large structure labeled as a store and constructed in 1968 is depicted.
1978	Aerial Photograph	The large structure centrally located along South Calumet appears to have been demolished. The area to the south of this building is vacant.
1983	Aerial Photograph	The subject property along South Calumet Avenue appears vacant and undeveloped.
1988	Fire Insurance Map	The subject property is depicted with no structures along South Calumet Avenue.
1988	Aerial Photograph	There were no changes to the subject property.
1993	Topographic Map	There were no changes to the subject property.
1998	Aerial Photograph	There were no changes to the subject property.
1998	Topographic Map	There were no changes to the subject property.
2005	Aerial Photograph	There were no changes to the subject property.
2007	Aerial Photograph	There were no changes to the subject property.
2009	Aerial Photograph	There were no changes to the subject property.
2010	Aerial Photograph	There were no changes to the subject property.
2011	Aerial Photograph	There were no changes to the subject property.
2012	Aerial Photograph	There were no changes to the subject property.
2014	Aerial Photograph	There were no changes to the subject property.
2015	Aerial Photograph	There were no changes to the subject property.
2015	Topographic Map	No identifiable features are depicted on the map other than major roadways and topography.
2017	Aerial Photograph	There were no changes to the subject property.

No recognized environmental conditions were identified from the review of historical documents.

TEC also obtained a city directory search for the subject property from ERIS, for the years 1955 to 2018. This historic address of the subject property includes 4705 to 4753 South Calumet Avenue and 339 to 349 East 47th Street. The occupants of the subject property that were listed in the City Directory Search are presented below:

DATE	ADDRESS	OCCUPANT
Subject Property – 339-349 East 47th Street – No Listings		
Subject property – 4705-4753 South Calumet		
1955	4705-4753 S Calumet Avenue	Residents
1960	4705-4753 S Calumet Avenue	No listing
1965	4705-4753 S Calumet Avenue	No listing
1971	4705-4753 S Calumet Avenue	Kare Drugs (4711)
1973	4705-4753 S Calumet Avenue	No listing
1981	4705-4753 S Calumet Avenue	No listing
1986	4705-4753 S Calumet Avenue	No listing
1991	4705-4753 S Calumet Avenue	No listing
1996	4705-4753 S Calumet Avenue	No listing
2001	4705-4753 S Calumet Avenue	No listing
2006	4705-4753 S Calumet Avenue	No listing
2010	4705-4753 S Calumet Avenue	No listing
2014	4705-4753 S Calumet Avenue	No listing
2018	4705-4753 S Calumet Avenue	No listing

It is not likely the subject property has been impacted by the historical uses of the subject properties that are listed in the City Directory Search. A copy of the City Directory Search is provided in Appendix B.

5.3 Historical Adjacent Property Use

TEC reviewed readily available historical documents including aerial photographs, historical topographic maps, and Sanborn maps obtained from ERIS. The historical information is summarized below. All historical documents are provided in Appendix B.

DATE	SOURCE	DESCRIPTION
1889	Topographic Map	Structures are depicted on the northeast and south adjacent properties.
1891	Topographic Map	There were no changes to the adjacent properties.
1900	Topographic Map	Structures are depicted on the west adjacent properties and south adjacent property. No structures depicted on the north and east adjacent properties.
1901	Topographic Map	There were no changes to the adjacent properties.
1925	Fire Insurance Map	Several large structures labeled as flats, motels, auto garages and stores are depicted. Along East 47th

		several structures labeled as stores are depicted. A structure behind the stores labeled 'Heating Plant' is depicted along with a 'Coal' room.
1929	Topographic map	All adjacent properties are depicted with structures.
1938	Aerial Photograph	All surrounding properties appear to be developed with structures.
1950	Fire Insurance Map	Several large structures labeled as flats, motels, auto garages and stores are depicted. At the north end of South Calumet, a structure is labeled 'Hotel'. Along East 47th several structures labeled as stores are depicted. A structure behind the stores labeled 'Heating Plant' is depicted along with a 'Coal' room.
1952	Aerial Photograph	There were no changes to the adjacent properties.
1953	Topographic Map	The adjacent properties are shaded in pink indicating urban development.
1962	Aerial Photograph	The north adjacent property appears to have had a second structure constructed. Some of the east and west adjacent properties buildings appear to have been demolished.
1963	Topographic Map	There were no changes to the adjacent properties.
1968	Aerial Photograph	The northwest adjacent building appears to have been demolished with a new structure visible. The remaining properties are unchanged.
1972	Aerial Photograph	There were no changes to the adjacent properties.
1972	Topographic Map	There were no changes to the adjacent properties.
1975	Fire Insurance Map	Several large structures labeled as flats, motels, auto garages and stores are depicted. Several of west adjoining buildings have been demolished.
1978	Aerial Photograph	There were no changes to the adjacent properties except that many of the west adjacent buildings have been demolished.
1983	Aerial Photograph	There were no changes to the adjacent properties.
1988	Fire Insurance Map	There were no changes to the adjacent properties.
1988	Aerial Photograph	There were no changes to the adjacent properties.
1993	Topographic Map	There were no changes to the adjacent properties.
1998	Aerial Photograph	There were no changes to the adjacent properties.
1998	Topographic Map	There were no changes to the adjacent properties.
2005	Aerial Photograph	There were no changes to the adjacent properties.

2007	Aerial Photograph	There were no changes to the adjacent properties.
2009	Aerial Photograph	There were no changes to the adjacent properties.
2010	Aerial Photograph	There were no changes to the adjacent properties.
2011	Aerial Photograph	There were no changes to the adjacent properties.
2012	Aerial Photograph	There were no changes to the adjacent properties.
2014	Aerial Photograph	There were no changes to the adjacent properties except for development on the west adjacent property.
2015	Aerial Photograph	There were no changes to the adjacent properties except the west adjacent property is developed with several structures.
2015	Topographic Map	No structures are depicted on the adjacent properties.
2017	Aerial Photograph	The adjacent properties appear in their current configuration with their existing structures.

No recognized environmental conditions were identified from the review of historical documents.

TEC also requested a city directory search for the subject property from ERIS for the years 1955 to 2018. The occupants of the adjacent properties that were listed in the City Directory Search are presented below:

DATE	ADDRESS	OCCUPANT
North Adjacent – No Listings		
South Adjacent – No Listings		
East Adjacent		
1955	4700-4758 S. MLK Dr.	Residences
1960	4700-4758 S. MLK Dr.	Residences
1965	4700-4758 S. MLK Dr.	Residences
1971	4700-4758 S. MLK Dr.	Residences
1973	4700-4758 S. MLK Dr.	Residences
1981	4700-4758 S. MLK Dr.	Residences
1986	4700-4758 S. MLK Dr.	Residences
1991	4700-4758 S. MLK Dr.	Residences
1996	4700-4758 S. MLK Dr.	Residences
2001	4700-4758 S. MLK Dr.	Residences
2006	4700-4758 S. MLK Dr.	Residences
2010	4700-4758 S. MLK Dr.	Residences
2014	4700-4758 S. MLK Dr.	Residences
2018	4700-4758 S. MLK Dr.	Residences
West Adjacent		
1955	4700-4758 S Calumet Avenue	Residents
1960	4700-4758 S Calumet Avenue	Residents

1965	4700-4758 S Calumet Avenue	Residents
1971	4700-4758 S Calumet Avenue	Residents
1973	4700-4758 S Calumet Avenue	Residents
1981	4700-4758 S Calumet Avenue	Residents
1986	4700-4758 S Calumet Avenue	Residents
1991	4700-4758 S Calumet Avenue	Residents
1996	4700-4758 S Calumet Avenue	Residents
2001	4700-4758 S Calumet Avenue	Residents
2006	4700-4758 S Calumet Avenue	Residents, Grand Paging and Cellular
2010	4700-4758 S Calumet Avenue	No Listings
2014	4700-4758 S Calumet Avenue	No Listings
2018	4700-4758 S Calumet Avenue	No Listings

It is not likely the subject property has been impacted by the uses of the adjacent properties that were listed in the City Directory Search. A copy of the City Directory Search is provided in Appendix B.

5.4 Local Municipality Record Review

5.4.1 The City of Chicago

TEC filed a Freedom of Information Act request to the City of Chicago, but no information has been received.at the completion of this report.

5.4.2 Chicago Fire Department

A FOIA request was submitted to the Chicago Fire Department for additional information on the subject property. A response received on May 17, 2019 indicated no records were on file for the subject property.

5.4.3 Cook County Assessor

The subject property consists of two vacant/undeveloped contiguous parcels totaling 1.5-acres (65340 square feet) located on the east side of South Calumet Avenue between East 47th Street and East 48th Street, in the south-central portion of Chicago, Hyde Park Township, Cook County, Illinois.

The subject property is comprised of two contiguous parcels; a 1.13-acre (49,000 square feet), rectangular shaped parcel with an established PIN of 20-10-105-002-0000 and addressed 4711 South Calumet Avenue, and a 0.37-acre (15,900 square feet) square-shaped parcel with an established PIN of 20-10-105-003-0000 and addressed 4755 South Calumet Avenue. The current owner of both parcels is the City of Chicago. A copy of the information obtained from the Cook County Assessor's Treasurer's website and the Hyde Park Township Assessor's website is provided in Appendix C.

5.5 State Records Review

A FOIA request was submitted to the Illinois Environmental Protection Agency for further information on the subject property. No information had been received from IEPA at the time this report was published. Any information obtained that changes the conclusions of this report will be provided in an addendum to this report.

5.6 Environmental Database Search

A Database Report was requested for the subject property from ERIS. The ERIS Database Report maps sites with potential or existing environmental liabilities. The search met the specific requirements of ASTM Standard Practices for environmental site assessments, E-1527-13, including those associated with governmental databases, search distances and data currency. A copy of the ERIS Database Report is provided in Appendix C. All Federal and State ASTM databases and the State or Local ASTM Supplemental databases have been reviewed. The Federal ASTM Supplemental databases and the Proprietary Historical Database have not been reviewed.

Twenty-nine (29) sites were identified within a one-mile radius for the National Priorities List (NPL); Proposed NPL; Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); CERCLIS No Further Remedial Action Planned (NFRAP); Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal (TSD) Facilities; Corrective Action Report (RCRA COR ACT); Emergency Response Notification System (ERNS); Illinois/Tribal Solid Waste List (SWL); Illinois/Tribal Institutional Controls (IC); Illinois Engineering Controls (EC); Illinois/Tribal Voluntary Cleanup Program (VCP); Illinois/Tribal Sites; Federal Brownfield Sites; Indiana/Tribal Brownfields; or Federal Industrial Controls (IC)/Engineering Controls (EC).

Table 1 summarizes the sites identified within a one-mile radius of the subject property.

Table 1

Database	Subject property	<1/8 mile	1/8 – 1/4 mile	1/4 – 1/2 mile	1/2 – 1 mile

BROWNFIELDS					

All properties listed in the standard Federal and State databases are located over 250 feet from the subject property. Based on intervening distance, it is *TEC*'s opinion that these properties are not indicative of a Recognized Environmental Condition.

5.7 PREVIOUS INVESTIGATIONS

No previous Phase I Environmental Site Assessment reports were provided to *TEC* for our review.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

This environmental assessment has been performed in accordance with generally accepted methods and practices of the environmental profession. The scope and depth of this study were as directed, and as agreed to, by the client.

The property reconnaissance was conducted by Mr. Paul Marek with *TEC* on May 13, 2019. Mr. Marek was accompanied by Mr. Andre Blacknard with Greenline Homes, LLC, User of the Phase I ESA, during the site inspection. The weather at the time of the site inspection was sunny and the temperature was approximately 70° Fahrenheit. Photographs taken at the time of the site inspection are provided in Appendix A.

6.2 General Site Setting

The subject property consists of two vacant/undeveloped contiguous parcels totaling 1.5-acres (65340 square feet) located on the east side of South Calumet Avenue between East 47th Street and East 48th Street, in the south-central portion of Chicago, Hyde Park Township, Cook County, Illinois.

6.3 Exterior Observations

The subject property is located in a commercial/residential area in the south-central portion of Chicago, Illinois. The property is currently undeveloped with no structures.

The topography of the site is relatively flat with no significant change in elevation. The subject property is rectangular-shaped with a public sidewalk extending along the western property boundary and a paved public alley extending along the eastern property boundary. The subject property is vacant and undeveloped with no structures.

Entry to the subject property is via a concrete drive off of South Calumet Avenue at the northwest corner and at the west central side that lead to a gravel and broken concrete surface. The gravel and concrete surface extend across the majority of the subject property with intermittent areas of vegetation.

The subject property is mostly comprised of concrete and gravel areas with intermittent areas of vegetation. Two pole-mounted transformers are located on the southeast and northeast areas of the subject property and three solid waste containers are located in the northeast area presumably for the east adjacent residential properties.

At the time of the on-site assessment, no evidence of oil staining, hazardous materials, noticeable odors, distressed vegetation, chemical spills, abandoned or existing wells, sink holes, pits, ponds, lagoons, or waste water discharge were observed on the exterior of the subject property

6.4 Interior Observations

The subject property is currently two vacant undeveloped parcels with no structures.

6.5 Material Use and Storage

The subject property is currently two vacant undeveloped parcels. No hazardous materials were used or stored onsite.

6.6 Hazardous Waste

No hazardous waste appears to be generated from the onsite operations observed. Additionally, the site is not reported on the RCRA Generator database.

6.7 Non-Hazardous Waste

One dumpster was observed on site near the east adjacent buildings that is used to store standard waste. It is then picked up by a local waste hauler for disposal and recycling. No staining or evidence of misuse was observed in the vicinity of the dumpster.

6.8 Suspect Asbestos Containing Materials (ACMs)

The subject property is currently two vacant undeveloped parcels.

6.9 Suspect Lead-Surfacing Materials

The subject property is currently two vacant undeveloped parcels.

6.10 Underground and Aboveground Storage Tanks

No evidence of above ground storage tanks (ASTs) or USTs was observed on the subject property at the time of the site inspection. Additionally, the subject property is not listed on the UST or AST databases.

6.11 Wastewater Discharge

The only wastewater discharge on the subject property is sanitary waste that is discharged to the municipal sewer.

6.12 Storm Water Discharge

A storm water drain was observed on the subject property. No evidence of improper use was observed near the storm drain. Based on no evidence of improper use, the presence of the storm drain is not indicative of a Recognized Environmental Condition.

6.13 Polychlorinated Biphenyl's (PCBs)

PCBs are controlled by the Toxic Substance Control Act (TSCA) of 1980. TSCA regulates the manufacture of materials that are considered toxic and potentially harmful to human health

and environment. PCBs were used in older transformer and switchgear fluids as an electrical insulator. PCBs may also be found in recycled oil and older electrical equipment.

Two pole-mounted transformers were observed on the northeastern and southeastern portions of the property. No staining or other evidence of leakage was observed at the time of the site inspection.

No other potential PCB equipment was observed on the subject property at the time of the site inspection.

6.14 Air Emissions

No potential air emission sources were identified at the site. A FOIA request was submitted to the IEPA. No information had been received at the time this report was published. Any information received that changes the conclusions of this report will be provided in an addendum to this report. No information pertaining to air emissions was contained in the IEPA online database for the subject property.

7.0 INTERVIEWS

7.1 Owner Interview

TEC provided the property owner with an interview questionnaire designed to determine if any known past or present environmental concerns are associated with the subject property.

The property owner did not respond to the interview questionnaire in time for completion of this assessment.

This is considered a data gap per the ASTM Standard. Information provided by past owners, operators, and occupants, is likely duplicative of information already obtained from other sources. This data gap is not considered significant and is unlikely to affect the findings and conclusions in this report.

7.2 Site Manager Interview

A Site Manager was unable to be interviewed for this report. This is considered a data gap per the ASTM Standard. Information provided by Site Manager is likely duplicative of information already obtained from other sources. This data gap is not considered significant and is unlikely to affect the findings and conclusions in this report.

7.3 Occupant Interview

The subject property is currently two vacant undeveloped parcels.

7.4 Interviews with Local Government Officials

A FOIA request was submitted to the Chicago Fire Department. A response received on May 17, 2019 indicated no records were on file for the subject property.

8.0 DATA GAPS

An effort was made to review historical information back to 1940 or to the first development of the property (whichever is earlier), subject to the availability of readily obtainable historical sources. Significant gaps in the history of a site due to a lack of reasonably ascertainable information can credibly be attributed to "data gap" as defined by federal AAI standards or "data failure" as defined by ASTM. Unless otherwise described in the body of this report, if any one or more of the standard sources under ASTM E 1527-00 or E 1527-13 was not reviewed, this was due to information from the source not being readily available or a determination by the Environmental Professional that the standard source was not likely to be useful.

TEC identified the following data gaps:

- A FOIA request was submitted to the IEPA, but no information had been received at the time this report was completed.
- The property owner did not respond to the interview questionnaire in time for completion of this assessment.

However, *TEC* feels that based on the information that was available, these data gaps do not impact their assessment of the subject property.

9.0 FINDINGS, OPINIONS, AND CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of the property at 4711 and 4755 South Calumet Avenue, Chicago, Illinois, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property except for the following:

Recognized Environmental Condition

- None.

Historical Recognized Environmental Conditions

- None.

De Minimis Conditions

- None

Business Environmental Risk

- None

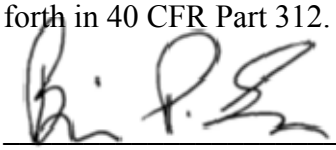
This Conclusions and Recommendations section is intended to provide a brief overview of the pertinent findings of this Phase I investigation. It should be noted that although the Conclusions and Recommendations section is an integral part of a report, it should not be substituted in lieu of reading the entire report. The entire report must be read in order to fully understand the findings and potential environmental concerns associated with the subject property.

10.0 QUALIFICATIONS AND SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

This assessment was conducted by an individual meeting the definition of an Environmental Professional under ASTM E1527-05 and the federal AAI Standard.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in 312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312. A copy of my resume is provided in Appendix E.



Brian P English
Environmental Professional

DEPARTMENT OF FLEET & FACILITY MANAGEMENT

MEMORANDUM

To: Brian O'Donnell
Department of Housing

From: Paul Waite
Environmental Engineer III

Date: September 17, 2019

Subject: 4711 & 4755 S Calumet Ave Phase I ESA Review

As requested by the Department of Housing (DOH), the Department of Fleet and Facility Management (2FM) has reviewed the May 22, 2019 Phase I Environmental Site Assessment (ESA) for the parcels at and 4711 S Calumet Ave and 4755 S Calumet Ave (the Site). The Phase I ESA was performed by The English Company for GreenLine Homes, LLC. 2FM understands that DOH is considering a sale of the Site for development as residential properties.

The Site consists of two contiguous vacant City-owned parcels:

- 4711 S Calumet Ave, PIN 20-10-105-002-0000, 1.13 acres
- 4755 S Calumet Ave, PIN 20-10-105-003-0000, 0.37 acres

Please note the following issues with the ESA:

- It appears that the developer or consultant did not obtain a Right of Entry to access this property. A ROE is needed for access to any City property, which includes the requirement that a reliance letter for the City must be provided.
- The report says a FOIA request was submitted and no information was received. 2FM does not appear to have received a FOIA request. The report says the property owner was given an interview questionnaire but did not return it. 2FM does not appear to have received a questionnaire. The report says that a Site Manager was unable to be interviewed. 2FM does not appear to have been asked to conduct an interview.
- The report seems to contain multiple errors. It says on Page 7 that the report was prepared for a refinancing, not a sale. The report says on Page 8 that Sanborn maps were not available for the site, but the appendix contains Sanborn maps that are discussed later in the text. The report says that "the portion of the subject property along East 47th Street had been developed with several commercial storefronts and a hotel from at least 1925 through present day." The Site borders E 48th Street, not E 47th Street.

Before the property is sold, these issues with the Phase I ESA must be corrected, and the City must be given a reliance letter for the ESA.

The ESA concluded that there were no Recognized Environmental Conditions (RECs) associated with the Site. Please note 2FM's comments concerning this conclusion:

- The Site is currently vacant with gravel, concrete pavement, and building foundations visible throughout.
- The Site was developed with a large building and parking lot from the mid-1960s to the late 1970s. The building may have been a drug store, according to city directories. The pavement and building foundations from this development appear to currently remain on the site. Unsupervised auto parking has also been present on the vacant lots.
- From at least 1925 through the 1950s the entire site was filled with row houses that appear to have had basements. It is likely that building debris from the demolition of the houses remains on the site.
- The 1925 Sanborn map shows a printing operation on the southern end of the Site. The 1950 Sanborn map shows an auto repair facility near the southeast corner of the Site.

Before the Site can be sold and redeveloped, a Phase II ESA is required to evaluate the potential impacts on the Site from building and demolition debris, the on-site printing area, and the off-site auto repair. See the following proposed preliminary scope of work requirements:

- At least one boring must be installed within the former location of each row house on the Site (approximately 14 borings total). One soil sample must be analyzed from each boring for PNAs, total lead and pH.
- At least one boring must be installed at the southern end of the Site, within the printing area and near the off-site repair. One sample from this boring must be analyzed for VOCs, PNAs, Total RCRA metals, and pH.
- At least one groundwater monitoring well must be installed at the southern end of the Site, within the printing area and near the off-site repair facility. One groundwater sample from this well must be analyzed for VOCs, PNAs, and Total RCRA metals.
- Soil samples analyzed for total metals may need to be run for TCLP or SPLP metals, depending on the total metals results.

If the Phase II ESA identifies contaminants in exceedance of IEPA's Tiered Approach to Corrective Action Objectives Tier 1 residential criteria, the Developer must enter the Site (or the applicable portion thereof) into the Site Remediation Program ("SRP") administered by the IEPA, complete the remediation of the Property in accordance with SRP requirements, and receive a comprehensive residential NFR letter prior to occupancy of any buildings on parcels in the SRP.

Should you have any questions regarding this review, please call me at (312) 744-9667.

cc: Kimberly Worthington, 2FM

Property History:

Feature Description:

It consisted of 0.934 acres acquired by the DOD from the Chicago Vitreous Enamel Company shortly after 1 May 1942. was used by DOD between 1942 and 1949 for the production of bearing rings and tank turrets. From 1949 until 1976 the site was used as a Navy and Marine Corps Recruiting Station. The site was improved prior to DOD acquisition with one large multi-level industrial building covering in excess of 52,700 square feet. The site was operated on a day-to-day basis by a private contractor while under PLANCOR utilization. The entire site was conveyed to the current owner, City Colleges of Chicago (CCC), by quitclaim deed dated 24 May 1976. There have been no intervening ownerships. There are no restoration provisions in the deed. CCC has leased the entire site the to Chicago Police Department (CPD) who uses it for training and recreational purposes.

Description of Events: AT 0200 HOURS ON AUGUST 2, 1992 AN ITS EMPLOYEE IN THE PROCESS OF GROUNDING TRAILER SFTU 688420 FROM FLAT CAR TTAX 767723 WHICH ARRIVED AT CONRAIL'S 47TH STREET TRAILVAN ON TRAIN TV-1, REPORTED OBSERVING A SMALL LEAK EMITTING FROM THE TRAILER. O.H. MATERIALS WAS CALLED AND ARRIVED AT 800 HOURS. THE CHICAGO FIRE DEPARTMENT AND THE EPA WERE NOTIFIED. OH MATERIALS OPENED THE DOORS AND FOUND ONE 55 GAL.CDRUM LEAKING FROM THE BOTTOM. THE TRAILER WAS LOADED WIT 80 (55 GAL) DRUMS AND APPARENTLY 8 OF THE DRUMS WERE DOUBLE STACKED ON TOP OF THE OTHER DRUMS WITH A MAKE SHIFT BULKHEAD FOR SECURING THE 8 DRUMS. APPARENTLY DURING TRANSPORTATION ONE OF THE DRUMS BROKE THROUGH THE BULKHEALD AND ROLLED UP AND DOEN THE LOWER DRUMS. EVENTUALLY THE DRUM BECAME DAMAGED TO THE EXTENT IT BEGAN LEAKING PRODUCT ON THE OTHER DRUMS. OH MATERIALS OVERPACKED THE DAMAGED DRUM, CLEANED AND TRANSFERRED THE REMAINING 79 DRUMS INTO TRAILER SKRZ 220763.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 8, 2025

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 8, 2025

Deleted NPL: DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 8, 2025

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

Government Publication Date: Apr 25, 2025

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Apr 25, 2025

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 6, 2025

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Jan 6, 2025

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 6, 2025

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 6, 2025

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 6, 2025

Federal Engineering Controls-ECs: FED ENG

List of Engineering controls (ECs) made availabe by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: May 30, 2025

Federal Institutional Controls- ICs: FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: May 30, 2025

Land Use Controls Information System: LUCIS

The Land Use Controls Information System (LUCIS) database is sourced from the U.S. Department of the Navy (DON). This data contains information for former Base Realignment and Closure (BRAC) properties across the United States. DON's BRAC office was tasked with tracking certain base closures while requiring the prevention of risks to human health and the environment of those properties with LUCs in place. Regarding currently available LUC Sites data, the sites listing is limited to centroid point locations for the overall installation property boundaries. Formerly obtained LUC Sites data may reflect site details that applied previously for a BRAC property.

Government Publication Date: Jun 13, 2024

Institutional Control Boundaries at NPL sites: NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Mar 8, 2025

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Apr 6, 2025

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Feb 19, 2025

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Jan 9, 2024

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jan 9, 2024

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Oct 31, 2024

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Apr 25, 2025

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Feb 26, 2025

State

State Response Action Program Database: SSU

The State Response Action Program database identifies the status of all sites under the responsibility of the Illinois EPA's State Sites Unit. The State Response Action Program database made available by Illinois Environmental Protection Agency. This database serves a purpose similar to that of the federal Superfund Enterprise Management System (SEMS), functioning as a state-level counterpart for tracking potential hazardous substance release sites.

Government Publication Date: Jan 16, 2025

Delisted State Response Action Program: DELISTED SSU

List of sites removed from the State Response Action Program database identifies the status of all sites under the responsibility of the Illinois EPA's State Sites Unit.

Government Publication Date: Jan 16, 2025

Solid Waste Landfills Subject to State Surcharge Database: SWF/LF

The Bureau of Land maintains a list of solid waste facilities and landfills throughout the state. This list made available by Illinois Environmental Protection Agency's Bureau of land.

Government Publication Date: Jun 24, 2024

Special Waste Site List: SWF/LF SPECIAL

The following landfills are those that as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois Environmental Protection Agency Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste. Non-Regional Pollutant Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollutant Control Facility by RPCF, or Non-regional Pollutant Control Facility by Non-RPCF.

Government Publication Date: Jan 1, 1990

Northeastern Illinois Planning Commission Historical Inventory of Solid Waste Disposal Sites in Northeastern Illinois: NIPC

Historical inventory of solid waste disposal sites in northeastern Illinois prepared by the Northeastern Illinois Planning Commission (NIPC).

Government Publication Date: Dec 1987

Clean Construction or Demolition Debris: CCDD

This is a list of CCDD Fill Operations with Approved Permits. Beginning July 1, 2008, no person can use CCDD as fill material in a current or former quarry, mine, or other excavation unless they have obtained a permit from the Illinois EPA.

Government Publication Date: Feb 27, 2025

Leaking Underground Storage Tanks (LUST): LUST

Leaking underground storage tanks (LUSTs) are a significant source of environmental contamination and may pose threats to human health and safety. The Illinois Office of the State Fire Marshal (OSFM) regulates the daily operation and maintenance of UST systems. When a release occurs, a tank owner, operator, or their designated representative, must notify the Illinois Emergency Management Agency (IEMA), which then notifies the Illinois Environmental Protection Agency (Illinois EPA). The Illinois EPA's LUST Section begins oversight of remedial activities only after the UST release has been reported to the IEMA.

Government Publication Date: Mar 20, 2025

Leaking UST Document: LUST DOCUMENT

A list of sites from the Illinois Environmental Protection Agency (IEPA) Document Explorer at which one or more of the documents is in the Leaking Underground Storage Tank (LUST) category. The IEPA Document Explorer provides online access to numerous Illinois EPA public records which are maintained in a digital format.

Government Publication Date: Mar 17, 2025

Delisted Leaking Underground Storage Tank Sites: DELISTED LUST

List of sites removed from the Leaking Underground Storage Tank Incident Tracking (LIT) database made available by the Illinois Environmental Protection Agency.

Government Publication Date: Mar 17, 2025

Underground Storage Tank Fund Payment Priority List: LUST TRUST

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner. The Underground Storage Tank Fund Priority list made available by Illinois Environmental Protection Agency.

Government Publication Date: Nov 01, 2016

Underground Storage Tank Database (UST): UST

This Underground Storage Tank (UST) database is maintained by the Division of Petroleum & Chemical Safety of the Office of the Illinois State Fire Marshal (OSFM). Agency Disclaimer: The data contains information derived from tank registration information supplied to the OSFM from outside sources. This information may not contain complete or current information on a specific tank.

Government Publication Date: Feb 25, 2025

Aboveground Storage Tanks (AST): AST

A list of aboveground storage tanks inspected by the Office of State Fire Marshal (OSFM).

Government Publication Date: Nov 1, 2024

Delisted Storage Tanks: DELISTED TANK

This database contains a list of closed storage tank sites that were removed from the illinois Department of Enivornmental Quality.

Government Publication Date: Feb 25, 2025

Sites with Engineering Controls: ENG

Sites in the Illinois Environmental Protection Agency (IEPA)'s Site Remedition Program (SRP) database with engineering controls in place.

Government Publication Date: Apr 17, 2025

Institutional Controls: INST

Sites in the Illinois Environmental Protection Agency (IEPA)'s Site Remedition Program (SRP) database with institutional controls in place.

Government Publication Date: Apr 17, 2025

Environmental Covenants Registry: AUL

According to the Illinois Environmental Protection Agency (Illinois EPA), the Illinois Uniform Environmental Covenants Act (UECA) (765 Illinois Compiled Statues (ILCS) 122 et seq.) creates an environmental covenant that is a specific recordable interest in real estate. It arises from an environmental response project that imposes activity and use limitations on a property. No environmental covenant is effective without the approval of the Illinois EPA, through the Director's signature. The UECA instrument recites the property use controls and remediation requirements imposed upon the property. Section 12(a) of the Illinois UECA requires the Illinois EPA to establish and maintain a registry that contains all environmental covenants and any amendment or termination of those covenants.

Government Publication Date: Apr 3, 2025

Illinois Site Remediation Program Database: SRP

The Site Remediation Program (SRP) database identifies the status of all voluntary remediation projects administered through the Pre-Notice Site Cleanup Program (1989 to 1995) and the Site Remediation Program (1996 to the present). The SRP database is made available by the Illinois Environmental Protection Agency (IEPA).

Government Publication Date: Apr 17, 2025

Document Explorer Remediation and Assessment Sites: REM ASSESS

A list of sites from the Illinois Environmental Protection Agency (IEPA) Document Explorer at which one or more documents available are associated with the Federal Facilities Unit, National Priorities List Unit, Site Assessment Unit, or Voluntary Site Remediation Unit. The IEPA Document Explorer provides online access to numerous Illinois EPA public records which are maintained in a digital format.

Government Publication Date: Mar 17, 2025

Brownfields Redevelopment Assessment Database: BROWNFIELDS

This listing of Brownfields Redevelopment Assessment sites is provided by the Illinois Environmental Protection Agency's (IL EPA) Bureau of Land. Brownfields are abandoned or under-utilized industrial and commercial properties with actual or perceived contamination and an active potential for redevelopment. The IL EPA Remedial Project Management Section (RPMS) manages the Brownfields loan programs and offers technical support to communities through the services of its Brownfields Representatives.

Government Publication Date: Jun 4, 2024

Municipal Brownfields Redevelopment Grant Program (MBRGP) project sites administered through OBA: BROWN MBRGP

The Office of Brownfields Assistance (OBA) database identifies the status of all Municipal Brownfields Redevelopment Grant Program (MBRGP) project sites administered through OBA. Office of Brownfields Assistance Database search made available by Illinois Environmental Protection Agency's Bureau of Land Data-Center.

Government Publication Date: Mar 31, 2013

Tribal

Leaking Underground Storage Tanks on Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 5, which includes Illinois, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 16, 2017

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 5, which includes Illinois, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 16, 2017

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 1, 2025

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 1, 2025

County

Chicago Storage Tanks: TANKS CHICAGO

This dataset contains Aboveground Storage Tank (AST) and Underground Storage Tank (UST) information from the City of Chicago Department of Public Health's (CDPH) Tank Asset Database. The Tank Asset Database contains tank information from CDPH AST and UST permit applications as well as UST records imported from the historic City of Chicago Department of Environment (DOE) database. This dataset also includes AST records from the historic DOE and pre-1992 UST records from the Building Department.

Government Publication Date: Aug 21, 2024

Chicago Environmental Permits: PERMITS CHICAGO

Permits issued by the City of Chicago Department of Environment (DOE) from January 1993 to December 31, 2011 and by the City of Chicago Department of Public Health (CDPH) since January 1, 2012. On January 1, 2012, the DOE was disbanded and all its inspection, permitting, and enforcement authorities were transferred to the CDPH.

Government Publication Date: Jun 15, 2023

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data: PFAS GHG

The U.S. Environmental Protection Agency's Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO2e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. Includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time. Note that some regulatory programs have specified chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard.

Government Publication Date: May 9, 2025

On-Scene Coordinator Response Sites: OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Apr 4, 2024

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Apr 23, 2025

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Mar 31, 2025

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

This list of federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS) is made available by the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools data. The EPA outlines that these data are gathered from several federal entities, such as the federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration (NASA), Department of Transportation (DOT), and Department of Energy (DOE). The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2024. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Oct 24, 2024

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Jun 27, 2024

National Response Center PFAS Spills: PFAS ERNS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Jun 16, 2025

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Dec 16, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data: PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jan 13, 2025

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest: PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Mar 23, 2025

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Mar 24, 2025

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 29, 2024

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act: TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Apr 25, 2025

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: May 3, 2025

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Apr 19, 2025

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Apr 19, 2025

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: May 6, 2024

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Feb 5, 2024

Surface Mining Control and Reclamation Act Sites: SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: May 20, 2024

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: May 12, 2025

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Feb 29, 2024

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

Power Plants: POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Apr 15, 2024

Historical Business Activity Risk: HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this listing does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including Polks, Millers, Mullin Kille, Interstate Directory, and State Directory Co; spanning roughly 1920s through 1960 depending on information available by city.

Government Publication Date: Jan 1, 1960

State

Spills and Incidents: SPILLS

This listing of hazardous materials spill/incident reports is sourced from the Illinois Emergency Management Agency (IEMA)

Government Publication Date: Apr 2, 2025

Emergency Response Releases & Spills Database: SPILL OER

The Illinois Environmental Protection Agency's (IEPA) Office of Emergency Response (OER) maintains this Emergency Response Releases & Spills Database. The Emergency Operations Unit (EOU), within OER, coordinates IEPA's response to environmental emergencies involving oil or hazardous materials and ensures that any environmental contamination is cleaned up. EOU works with other response agencies including the Illinois Emergency Management Agency (IEMA), which is the initial contact for responses to an emergency or disaster in Illinois.

Government Publication Date: Mar 27, 2025

PFAS Spill Sites: PFAS SPILLS

A specific list of spill/incident reports from the Illinois Emergency Management Agency (IEMA) where the hazardous material involved in the spill/incident is identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA).

Government Publication Date: Apr 2, 2025

Dry Cleaning Facilities: DRYCLEANERS

This list of licensed drycleaner facilities is provided by the Drycleaner Environmental Response Trust Fund of Illinois; and since July 1, 2020, is administrated by Illinois Environmental Protection Agency (IEPA).

Government Publication Date: Feb 6, 2025

Delisted Drycleaners: DELISTED DRYCLEANERS

List of sites removed from the drycleaners database made available by the Drycleaner Environmental Response Trust Fund of Illinois.

Government Publication Date: Feb 6, 2025

IEPA Document Explorer: IEPA DOCS

A list of permits and documents found in the Illinois Environmental Protection Agency (IEPA) Document Explorer. The IEPA Document Explorer provides online access to numerous Illinois EPA public records which are available in a digital format. This list includes records not otherwise categorized as LUST, Remediation, Air Permits, NPDES, or Compliance Commitment Agreements.

Government Publication Date: Mar 17, 2025

Clandestine Drug Labs: CDL

List of clandestine drug lab locations made available by the Illinois Department of Public Health. The Department maintains a list of properties from reports it receives from the Illinois State Police through the Illinois Emergency Management Agency.

Government Publication Date: Jan 4, 2023

Tier 2 Report: TIER 2

List of facilities who submit Tier II forms to the Illinois Emergency Management Agency (IEMA).

Government Publication Date: May 10, 2023

Air Permits: AIR PERMITS

A list of sites from the Illinois Environmental Protection Agency (IEPA) Document Explorer at which one or more of the documents is in the Air Permits (construction and operating) category. The IEPA Document Explorer provides online access to numerous Illinois EPA public records which are maintained in a digital format.

Government Publication Date: Mar 17, 2025

Underground Injection Control Wells: UIC

The Underground Injection Control (UIC) Program is a federal program established under the provision of the Safe Drinking Water Act of 1974. Since groundwater is a major source of drinking water in the United States, the UIC Program requirements were designed to prevent contamination of groundwater resulting from the operation of injection wells. The Underground Injection Well Inventory is provided by the Illinois Environmental Protection Agency. This inventory includes Class V Injections Wells which are utilized to inject non-hazardous waste into or above the Underground Source of Drinking Water.

Government Publication Date: Aug 1, 2019

Potentially Infectious Medical Waste Facilities: MEDICAL WASTE

Title 35 of the Illinois Administrative Code defines Potentially Infectious Medical Waste (PIMW) as waste generated in connection with the diagnosis, treatment (i.e., provision of medical services), or immunization of human beings or animals; research pertaining to the provision of medical services; or the provision or testing of biologicals. The Illinois Environmental Protection Agency's Bureau of Land is responsible for administering the PIMW program. The facilities included on this listing treat, store, transfer or dispose of PIMW.

Government Publication Date: Jun 6, 2023

Compost Facilities: COMPOST

The Illinois Environmental Protection Agency's Bureau of Land, Materials Management Unit maintains this list of composting facilities. Composting facilities provide an alternative option to managing and disposing of non-hazardous solid waste and/or landscape waste instead of the waste being landfilled. It is a natural form of recycling that turns some common kinds of household waste, like food and lawn wastes, into a dark organic material that can be used in a variety of beneficial ways.

Government Publication Date: Dec 1, 2023

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX E

CREDENTIALS

NICHOLAS C. MARGO

FIELD GEOLOGIST

Education

Bachelor of Science in Geology, 2021,

College of Charleston

Certifications

OSHA 40-Hour Health and Safety Training: HAZWOPER

Certified Erosion Prevention and Sediment Control Inspector (CEPSCI)

Work History

Terracon Consultants, Inc., Field Geologist, March , 2022 – Present

PROFESSIONAL EXPERIENCE

As a Field Geologist in the Chicago, IL office, Mr. Margo's responsibilities include conducting Phase I Environmental Site Assessments, Limited Site Investigations (Phase II), and groundwater and soil sampling.

PROJECT EXPERIENCE

Environmental Site Assessments

Environmental Scientist responsible for completing over 80 Phase I and II ESAs throughout the United States and Canada for investment projects and corporate acquisitions.

Soil Vapor Extraction

Assisted with system installation, monitoring and evaluation. Systems include sub-slab depressurization for vapor intrusion mitigation. Prepared reports and submittals for private parties.

SWPPP Inspections

Performed routine SWPPP inspections to identify deficiencies in BMPs and prevent potential storm water pollutants. Documented findings and coordinated with site personnel to implement corrective actions. Ensured ongoing compliance with local, state, and federal storm water regulations.

Soil & Groundwater Sampling

Collected and logged soil and groundwater samples to investigate potential contamination from hazardous substances. Assisted with environmental site assessments focusing on identifying contamination sources, evaluating waste impacts, and monitoring for possible off-site migration. Supported several environmental remediation projects including automotive service centers, manufacturing facilities, dry cleaning and laundry operations, transportation hubs, and power generation sites.

Edmund A. Buc, P.E., CHMM

Department Manager, Environmental Services / Senior Project Engineer

PROFESSIONAL EXPERIENCE

Mr. Buc is a senior project engineer in Terracon's Milwaukee, Wisconsin office. He is a project manager, responsible for managing project personnel and budgets, preparing technical reports, supporting development of remedial strategies, and negotiating with regulatory agencies to define project objectives and obtain project closure. Mr. Buc is also the Milwaukee office's Environmental Department Manager, overseeing a staff of engineers, geologists, and scientists to provide due diligence, investigation/remediation, hazardous building material, and compliance services.

Mr. Buc has worked in the environmental consulting field for over 35 years. During that time, he has developed and implemented innovative remedial strategies for multi-disciplinary environmental projects. These projects have included property transactions, permitting, and investigation and remediation of a variety of contaminants including emerging contaminants such as 1,4-dioxane and per- and polyfluorinated alkyl substances (PFAS). As a Certified Hazardous Materials Manager (CHMM), Mr. Buc has also provided support for a variety of regulatory compliance projects, including Tier II and Toxic Release Inventory (TRI) reporting; storm water pollution prevention planning; and spill prevention, control, and countermeasures (SPCC) plan preparation.

PROJECT EXPERIENCE

REDEVELOPMENT

Milwaukee Bucks Redevelopment Project – Milwaukee, Wisconsin

Project manager for site investigation and remediation at properties where Fiserv Forum, the Milwaukee Bucks training facility, a multi-story parking facility, and an entertainment complex were constructed. Environmental investigations were completed concurrently with geotechnical services also being provided by Terracon. Remediation of existing open environmental cases were integrated into the development plan. Also provided support for DBE/SBE/MBE participation tracking.

Salvage and Recycling Facility – Kieler, Wisconsin

Project manager for site investigation and remediation of a salvage and recycling facility being redeveloped into an industrial park. An iterative investigation was completed to delineate shallow soil containing volatile organic compounds (VOCs), polychlorinated biphenyls (PCBs) and lead. The investigation results were used to develop remediation scenarios and costs for the parties involved in the transaction. Remediation consisted of targeted soil excavation and off-site disposal.

Federal Bureau of Investigation Facility – St. Francis, Wisconsin

Project manager for radon testing services to satisfy occupancy lease requirements for a newly constructed building. Monitoring included charcoal canister short tests and alpha track detector long tests.

EDUCATION

Master of Science, Engineering, Marquette University, 1997

Bachelor of Science, Chemistry, Michigan State University, 1987

REGISTRATIONS

Professional Engineer: Wisconsin, No. 32096

Certified Hazardous Materials Manager, No. 3174

CERTIFICATIONS

40-Hour HAZWOPER

WORK HISTORY

Terracon Consultants, Inc., Department Manager, 2021-Present; Senior Project Engineer, 2015-2020

ARCADIS, Principal Engineer, 2010-2015; Senior Engineer, 2006-2010; Project Engineer, 1999-2006; Staff Engineer, 1995-1999

Drake Environmental, Project Manager, 1991-1995

Aqua-Tech, Inc., Chemist, 1988-1991

PRESENTATIONS/PUBLISHED ARTICLES

See Endnote[1]

* *Work performed prior to joining Terracon.*

Edmund A. Buc, P.E., CHMM

Department Manager, Environmental Services / Senior Project Engineer

UTILITIES

Multiple Clients – Multiple Locations, Wisconsin

Project Manager for preparation of SPCC plans for multiple locations across Wisconsin. Sites include utility substations, agricultural cooperative bulk fuel facilities, manufacturing operations, and construction SPCC plans for temporary equipment fueling.

Long-Term Water Supply Evaluation and Replacement – Jackson, Wisconsin*

Project Manager for evaluating long-term water supply options for an area affected by a petroleum release, and for constructing the selected option. The release of 20,000 gallons of gasoline from a ruptured pipeline affected water quality of several private water wells and resulted in a drinking water advisory for over 100 residences. Six alternatives were identified, and a subset of three alternatives was further evaluated. It was recommended that a public water system be installed, with source water provided by a nearby municipality. Subsequently oversaw design and construction of the water system extension, which consisted of over 8 miles of water main and connection of water service to over 100 homes. Installation included open-cut excavations, trenchless directional drilling, and blasting of shallow bedrock.

Construction Stormwater Inspection Services, Onion River and Crawfish River Solar Sites – Cedar Grove and Jefferson, Wisconsin

Project Manager for construction stormwater pollution prevention plan (SWPPP) inspections throughout the construction of a 1,900-acre, 150-megawatt (MW) photovoltaic (PV) site and a 640-acre, 75-megawatt site. Coordinated training and inspection schedules of staff to ensure weekly and post-precipitation inspection coverage over a nearly 2-year period, from start of construction to owner handoff.

EMERGING CONTAMINANTS

Industrial Property – Marinette, Wisconsin

Project manager for site investigations for a synthetic organic chemistry toll service provider. The facility is co-located within a larger industrial facility that produces and tests firefighting products and foams. Some of these products contain or previously contained PFAS. Work included a review of investigation data from the larger industrial facility, review of current facility operations and production, and completing a site investigation for PFAS in soil and groundwater in areas with potential PFAS usage and/or storage.

Commercial Property – Franklin, Wisconsin

Supported the investigation of a vacant agricultural property being considered for redevelopment. A Phase I Environmental Site Assessment completed by Terracon identified historic biosolids landspreading, which suggested the potential for PFAS contamination. The investigation identified low levels of PFAS in soil samples. Prepared a No Action Required (NAR) request in accordance with NR 708, Wisconsin Administrative Code. The WDNR concurred with the request, which was one of the first PFAS-related NARs granted in Wisconsin.

INDUSTRIAL

Imprex, Inc. – Greenfield, Wisconsin

Project manager for investigation of chlorinated solvent release at an active manufacturing facility. Work included off-site investigation to evaluate potential risk to residential properties, completion of a high-resolution site characterization (HRSC) study to develop a 3-dimensional understanding of contaminant distribution in real time, and development of an interim action plan to address contaminants in conjunction with a property transaction. The proposed interim action consisted of targeted soil excavation, vapor mitigation, and enhanced reductive dechlorination.
