# PHASE I ENVIRONMENTAL SITE ASSESSMENT

**4825 WEST LAWRENCE AVENUE**

**CHICAGO, ILLINOIS**

**PREPARED FOR:**

## PUBLIC BUILDING COMMISSION OF CHICAGO

50 WEST WASHINGTON STREET, ROOM 200
CHICAGO, ILLINOIS 60602
AND

## CHICAGO DEPARTMENT OF WATER MANAGEMENT

1000 EAST OHIO STREET
CHICAGO, ILLINOIS 60611

**PREPARED BY:**

Weaver Consultants Group

# EXECUTIVE SUMMARY

Public Building Commission of Chicago (PBC) and the Chicago Department of Water Management (CDWM), collectively referred to herein as "the user," retained **Weaver Consultants Group North Central, LLC** (WCG) to perform a Phase I Environmental Site Assessment (ESA) of the property located at 4825 West Lawrence Avenue in Chicago, Illinois (the subject property). WCG performed this Phase I ESA in general compliance with the American Society for Testing Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-21) in an effort to identify, to the extent feasible, the presence of recognized environmental conditions with respect to the subject property as defined in ASTM E 1527-21. Limiting conditions, exceptions to, or deviations from this practice are described in **Sections 1.6** and **7.4** of this report.

The subject property is comprised of approximately 7.8 acres of land improved with an approximately 15,000-square foot, one-story industrial building and two trailers. The subject property is currently occupied by the CDWM and Streets and City of Chicago Sanitation Department, who use it as a meeting spot for Streets and Sanitation employees and for their personnel vehicle storage, as well as vehicle and equipment storage relating to the CDWM Department. Equipment and material storage included portable water tanks, dump trucks, snowplow trucks, a large salt pile (approximately 30 feet tall, 200 feet long, and 80 feet wide) for snow removal, asphalt grindings, sand, stone, backhoes, dozers, and skid steers. WCG understands from Mr. Greg Owerczuk of CDWM that CDWM and Streets and City of Chicago Sanitation Department have occupied the subject property for approximately five to ten (10) years.

Based on our review of historical records, the subject property appears improved with several streets and no structures until approximately 1924. By 1928, the subject property appears improved with at least three small structures in the southern portion with a rail spur extending north to south along its eastern perimeter. By 1938, the northern portion appears improved with several buildings and an additional building appears to have been constructed in the southern portion. By 1940, the northern portion of the subject property appears to be occupied by Mayfair Lumber Co. and the southern portion appears to be occupied by an unnamed lumber company. There appear to be lumber storage areas throughout the property. By 1951, various additional structures appear to have been constructed including an office building in the northern portion, various sawdust storage structures, and a gasoline tank to the southeast of the Mayfair Lumber Co. building. With the exception of demolition and/or construction of various structures associated with the lumber company operations, the subject property appears generally unchanged until at least 1993. By 2004, an additional gasoline tank appeared improved in the northeastern portion of the property. By 2009, the northern portion no longer appears to be utilized for lumber storage and it remains generally unchanged through at least 2019. By 2021, the buildings in the northern portion appear to have been demolished and an apparent salt pile appears visible in the

southeast corner of the property. By 2023, several smaller material piles appear visible in the northeastern corner. The subject property remained generally unchanged through the date of the site visit, with only one building remaining in the southern portion.

On December 4, 2024, WCG representatives Ms. Jeana Burke and Ms. Allison Fournier conducted a site visit to observe the subject property in support of identifying recognized environmental conditions, including but not limited to, assessment of the presence of hazardous substances, hazardous wastes, petroleum products, other wastes, underground storage tanks (USTs), aboveground storage tanks (ASTs), polychlorinated biphenyl (PCB)-containing equipment, or other potential Findings (i.e., any known or suspect environmental conditions) for the subject property.

WCG also performed a review of commercially available government records in an effort to identify recognized environmental conditions in connection with the subject property. This records review addressed not only the subject property, but also adjoining and surrounding properties. The records review also included reasonably ascertainable historical data, which can be helpful in identifying the past uses of the subject property, adjoining properties, and surrounding properties, as they may relate to the environmental condition of the subject property.

Finally, WCG performed interviews with various government agencies and other parties with possible knowledge of the subject property, adjoining properties, or surrounding properties in an effort to identify current and past uses of the subject property and surrounding areas, as they may relate to the environmental condition of the subject property.

ASTM E 1527-21 defines a recognized environmental condition as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Based upon the assessments described in this report, this Phase I ESA has revealed the following recognized environmental conditions in connection with the subject property:

- REC-1: The likely presence of impacts associated with the current use of the subject property for vehicle storage and upkeep, and apparent associated staining.
- REC-2: The known presence of impacts identified during the 2019 Phase II Subsurface Investigation.
- REC-3: The likely presence of impacts associated with the historical presence of four registered USTs with two associated closed LUST incidents.

- REC-4: The likely presence of impacts associated with historical industrial use of the subject property including the use, storage, and alleged dumping of hazardous materials and a potential existing gasoline tank.

In addition, based upon the assessments described in this report, this Phase I ESA has revealed the following de minimis conditions in connection with the subject property:

- The storage of hazardous substances and petroleum products and associated staining within the subject property building.

Based upon the assessments described in this report, this Phase I ESA has revealed no evidence of historical recognized environmental conditions or controlled recognized environmental conditions in connection with the subject property. In addition, no significant data gaps were identified during the assessments conducted for this Phase I ESA.

This Executive Summary provides a brief overview of the Findings of this Phase I ESA. Although the Executive Summary is an integral part of the report, it does not substitute for reading the entire report or the appended or referenced documents to fully understand the findings and conclusions of this Phase I ESA.

**Appendix G** Personnel Qualifications

# 1 INTRODUCTION

**Weaver Consultants Group North Central, LLC** (WCG) conducted this Phase I Environmental Site Assessment (ESA) of the property located at 4825 West Lawrence Avenue in Chicago, Illinois (the subject property). The location of the subject property is shown on **Figure 1 - Subject Property Location Map**. WCG performed this Phase I ESA in general compliance with the scope and limitations of American Society for Testing Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-21) and the terms and conditions of WCG's Proposal WNCP-001-2024-41 Revision 1 dated November 19, 2024 incorporated herein by reference. WCG understands that this Phase I ESA was conducted for the benefit of the Public Building Commission of Chicago (PBC) and the Chicago Department of Water Management (CDWM) (referred to collectively herein as "the user").

The following sections of this report present our Phase I ESA Findings and conclusions. A glossary containing terms and definitions presented in ASTM E 1527-21 is included in **Appendix A – Glossary of Terms**. Other appendices presented at the end of the report consist of figures, interview and user-provided information, photographic documentation, regulatory records review documentation, historical records, and personnel qualifications.

## 1.1 Location and Legal Description

The subject property is located at 4825 West Lawrence Avenue in Chicago, Illinois. The subject property generally lies north of West Wilson Avenue, east of Milwaukee District North rail line, south of West Lawrence Avenue, and west of Cicero Avenue (see **Figure 2** – **Subject Property Layout Map**). The subject property consists of approximately 7.8 acres of land with approximately 480 feet of frontage along West Lawrence Avenue.

The subject property is described as four parcels in Chicago, Cook County, Illinois (see **Figure 1 - Subject Property Location Map**). A copy of the plat of survey for the subject property is included in **Appendix B – User-Provided Information** the Parcel Index Numbers (PINs) associated with the subject property are discussed in **Section 4.3.6**.

## 1.2 Purpose

The purpose of this Phase I ESA is to identify and report, to the extent feasible, recognized environmental conditions with respect to the subject property. ASTM E 1527-21 defines a recognized environmental condition as:

> *(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum*

*products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*

Performing a Phase I ESA in general compliance with ASTM E 1527-21 may enable a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability; that is, the practice that constitutes "all appropriate inquiry" into the previous ownership and uses of the subject property consistent with good commercial or customary practice as defined in 42 U.S.C. Section 9601(35)(B).

## 1.3 Detailed Scope-of-Services

WCG performed this Phase I ESA in general compliance with ASTM E 1527-21, and the terms and conditions of WCG Proposal WNCP-001-2024-041 dated November 19, 2024. The scope of services for this Phase I ESA included the following:

- A review of standard environmental record sources pursuant to ASTM E 1527-21 regarding environmental activities for the subject property and local area properties;
- A review of reasonably ascertainable, practicably reviewable, and publicly available historical aerial photographs, fire insurance maps, property tax files, recorded land title records, building department records, topographic maps, local street directories, and/or zoning/land use records in an effort to assess past subject property and adjoining property conditions;
- Interviews with reasonably available key site manager, past and/or present subject property owners, occupants, operators, and state and/or local government agencies by or under the supervision of an environmental professional;
- A site reconnaissance by or under the supervision of an environmental professional in an effort to assess the current use of the subject property and adjoining properties and to identify potential Findings including but not limited to, the presence of hazardous substances, hazardous wastes, petroleum products, other wastes, underground storage tanks (USTs), aboveground storage tanks (ASTs), polychlorinated biphenyl (PCB)-containing equipment, or other potential Findings (i.e., known or suspect environmental conditions);
- A Tier 1 Vapor Encroachment Screen (VES) to identify the presence or likely presence of contaminant of concern vapors in the subsurface of the subject property caused by a release of vapors from impacted soil or groundwater either on or near the subject property per ASTM E 2600-22; and
- Preparation of this Phase I ESA report.

WCG initiated this Phase I ESA pursuant to authorization received from Mr. Jose Barajas, Project Manager of PBC on November 21, 2024. WCG Proposal WNCP-001-2024-41 Revision 1 dated November 19, 2024 contains the scope of services, cost estimate, and the terms and conditions applicable to the performance of this Phase I ESA.

## 1.4 Standard of Care

WCG conducted this Phase I ESA using a defined scope of services considered appropriate and agreed upon by all parties on the date the service was authorized, unless the scope of services or the methods used were later modified, in writing, and accepted by all parties prior to performance. WCG conducted this Phase I ESA in accordance with generally accepted practices in a manner consistent with that level of care exercised by other members of our profession in the same locality and under similar conditions of time and accessibility of improvements and information. No other representations, expressed or implied, and no warranty or guarantee is included or intended to be part of this Phase I ESA.

The scope of services performed in execution of this assessment may not be appropriate to satisfy the needs of other parties. We, therefore, are not responsible for independent conclusions, opinions, or recommendations of others based on our assessment. Furthermore, this Phase I ESA relates to the environmental conditions of the subject property and does not address issues raised in transactions such as business risk, purchase of business entities, or interests therein, or of their assets, which may well involve environmental liabilities pertaining to properties previously owned or operated or other off-site liabilities.

Additionally, the findings of this Phase I ESA are based on WCG's observations, inquiries, and historical research using reasonably ascertainable and practically reviewable information obtained within reasonable time and cost constraints. WCG does not represent that this Phase I ESA is an exhaustive assessment that reflects the findings of all of the information available for the subject property, nor is it representative of any future subject property conditions. If additional information concerning the subject property is discovered, it should be provided to us so that we may evaluate its impact on our conclusions. As such, any activities or episodes that transpire subsequent to this Phase I ESA are not considered in this assessment. A Phase I ESA performed in general compliance with ASTM E 1527-21 is not intended to be an exhaustive assessment of a subject property nor can it wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a subject property.

## 1.5 Significant Assumptions

This Phase I ESA is based in part on information obtained from visual observations of the subject property and vicinity, commercial data sources, and interviews with government agency representatives, representatives of the owners of the subject property, and occupants of the subject property. WCG assumes this information to be accurate, complete, and representative of subject property conditions

unless some fact or circumstance made known to WCG through the course of this assessment reasonably suggests otherwise.

## 1.6 Limiting Conditions and Exceptions

ASTM E 1527-21 requires that the environmental professional shall document, in the report, general limitations including limitations imposed by physical obstructions such as adjacent buildings, bodies of water, asphalt, or other paved areas, and other physical constraints (for example, snow or rain). WCG identified no limiting conditions in performing this assessment other than the following:

- Due to the presence of subject property building, concrete and asphalt surfaces, salt storage, parked automobiles, and stored equipment and materials, WCG was unable to fully assess the entire exterior surface of the subject property.
- Due to the presence of stored equipment and materials and parked automobiles, WCG was unable to visually observe the entire interior surfaces of the building located on the subject property.

WCG identified no exceptions in performing this assessment.

## 1.7 Special Terms and Conditions

There were no special terms and conditions associated with performing this assessment beyond those in WCG Proposal WNCP-001-2024-041 Revision 1 dated November 19, 2024.

## 1.8 User Reliance

This report is confidential and was prepared for the exclusive use by PBC and CDWM. No additional parties may use the information contained in this report without obtaining the written permission of WCG, PBC, and CDWM. WCG's duties and obligations extend to PBC and CDWM, and to no other party. WCG's duties and obligations to PBC and CDWM are not transferable to any person, corporation, or organization without the express written consent of PBC, CDWM, and WCG.

This Phase I ESA report must be read and interpreted as a whole and can only be considered representative of the conditions of the subject property as of the date of our site reconnaissance described herein. WCG makes no representation whatsoever concerning the condition of the subject property beyond the date of our site reconnaissance described herein. Individual sections and appendices of this report are dependent on the balance of this report, and on the terms, conditions, and stipulations contained in the Proposal and any written amendments accepted by WCG.

# 2 USER-PROVIDED INFORMATION

ASTM E 1527-21 provides that certain Phase I ESA tasks are to be performed by the user. According to ASTM E 1527-21, these tasks should be performed by or on behalf of the party seeking to qualify for a Landowner Liability Protection (LLP) to CERCLA Liability. While such information is not required to be provided to the environmental professional, the environmental professional shall request that the user provide the information as it may assist the environmental professional in identifying recognized environmental conditions in connection with the subject property.

We provided the user with a questionnaire at the beginning of this Phase I ESA to assist them with these tasks. As of the date of this report, the user has not provided WCG with a completed User-Provided Information Questionnaire. A copy of the blank questionnaire is provided in **Appendix B – User Provided Information**. In instances where the user did not provide the information requested, WCG has opined on the significance of the absence of this information as per ASTM E 1527-21. The following sections describe our review of the responses received, where applicable.

## 2.1 Recorded Land Title Records/Environmental Liens or Activity and Use Limitations

To meet the requirements of ASTM E 1527-21 and "all appropriate inquiries", a search for the existence of environmental liens or activity and use limitations (AULs) that are filed or recorded against the subject property since at least 1980 must be conducted. These documents can be commonly found within recorded land title records.

The user did not provide WCG with information concerning recorded land title records for the subject property. Furthermore, the user did not authorize WCG to perform a recorded land title records review, which was included as an optional scope of service in our Proposal. As a result, this lack of information could result in a determination that "all appropriate inquiries" was not conducted.

WCG performed a review of recorded land title records available for the Property at the online Cook County Recorder of Deeds website on December 4, 2024. The following information was available for the Property:

Our review of the recorder of deeds records identified an affidavit from the Illinois Environmental Protection Agency (IEPA) dated April 15, 1999. WCG reviewed the document on the recorder website and identified it as a No Further Remediation (NFR) Letter associated with the subject property. This NFR Letter is further discussed in **Section 4.2.1.1.**

## 2.2 Specialized Knowledge

The user did not provide WCG with a response concerning specialized knowledge or experience related to the subject property or nearby properties.

## 2.3 Commonly Known or Reasonably Ascertainable Information

The user did not provide WCG with a response concerning commonly known or reasonably ascertainable information within the local community about the subject property that is material to identifying a Finding with respect to the subject property.

## 2.4 Valuation Reduction for Environmental Issues

The user did not provide WCG with a response as to whether the value of the subject property has been reduced due to environmental issues.

## 2.5 Owner, Subject Property Manager, and Occupant Information

The user did not provide WCG with a response concerning the subject property owner, key site manager, or occupant.

## 2.6 Reason for Performing Phase I ESA

The user requested that WCG perform this Phase I ESA in support of their environmental due diligence efforts associated with the redevelopment of the subject property in an effort to consolidate operations by CDWM from the Northern District between its three site areas.

## 2.7 Obvious Indicators of the Presence or Likely Presence of Contamination of the Subject Property

The user did not provide WCG with a response concerning knowledge of obvious indicators of the presence or likely presence of contamination of the subject property.

## 2.8 Other Information Relevant to the Subject Property

The user provided WCG with the following documents associated with the subject property:

- Plat of Survey, November 13, 2014, prepared by Accurate Survey Service, Inc.; and
- Phase I ESA, Mayfair Lumber Site, December 20, 2019, prepared by August Mack Environmental, Inc.; and
- Phase II Subsurface Investigation, Cost Model, December 20, 2019, prepared by August Mack Environmental, Inc.

These documents are included in **Appendix B – User-Provided Information**. The Phase I ESA and Phase II Subsurface Investigation are further discussed in **Section 4.4.1.1.1**.

# 3 SITE RECONNAISSANCE

WCG representatives Ms. Jeana Burke and Ms. Allison Fournier conducted the site reconnaissance on December 4, 2024. Ms. Burke and Ms. Fournier were accompanied by Mr. Gregory Owerczuk, District Superintendent of the CDWM, who was designated by the user as the key site manager. In addition, WCG was accompanied by Mr. John Gallagher of CDWM and Mr. Ben Sanders of the Chicago Streets and Sanitation Department during portions of the site visit. During the site reconnaissance, weather conditions were partly cloudy, no precipitation, with moderate winds from the west, and a temperature of approximately thirty-four (34) degrees Fahrenheit. The following sections summarize our observations during the site reconnaissance.

## 3.1 Methodology and Limiting Conditions

WCG's site reconnaissance methods included a site visit to visually and/or physically observe reasonably accessible locations of the subject property in an effort to obtain information applicable to identifying recognized environmental conditions in connection with the subject property. Ms. Burke and Ms. Fournier traversed the exterior and interior portions of the subject property by foot to observe conditions during the site reconnaissance.

WCG also visually and/or physically observed adjoining properties from reasonably accessible locations on the subject property and public thoroughfares. The photographs taken to document conditions encountered at the time of the site reconnaissance are presented in **Appendix C – Photographic Documentation**. Limiting conditions encountered at the subject property during the site reconnaissance are included in **Section 1.6**. Non-scope considerations are discussed further in **Section 6**.

The following sections summarize WCG's site reconnaissance observations.

## 3.2 Current Use of the Subject Property

During our site visit, WCG noted that the subject property is currently occupied by the CDWM and Streets and City of Chicago Sanitation Department. According to Mr. Owerczuk, the City of Chicago has occupied the subject property for approximately five to ten (10) years. During their occupation, the subject property has been used as a meeting spot for Streets and Sanitation employees and for their personnel vehicle storage, as well as vehicle and equipment storage relating to the CDWM Department. Equipment and material storage included portable water tanks, dump trucks, snowplow trucks, a large salt pile (approximately 30 feet tall, 200 feet long, and 80 feet wide) for snow removal, asphalt grindings, sand, stone, backhoes, dozers, and skid steers. WCG observed concrete pads in the northern portion of the subject property, suggesting prior buildings may have been demolished. In addition, WCG observed gravel-covered rail spurs in the eastern portion of the subject property, suggesting that historical uses

may have included importing and/or exporting materials. Refer to **Section 4.4.2** for a detailed discussion of the historical use of the subject property.

## 3.3 Current Use of Adjoining Properties/Surrounding Area

The following is a listing of the current adjoining properties including the applicable property name, address, operation, and direction from the subject property.

| CURRENT ADJOINING PROPERTIES | | | |
|---|---|---|---|
| **Property Name/Occupant** | **Address** | **Operation/Use** | **Direction from the subject property** |
| Various Office Buildings | 4848-4858 West Lawrence Ave, Chicago, Illinois | Commercial | North across West Lawrence Avenue |
| Express Car Wash | 4820 West Lawrence Ave, Chicago, Illinois | Commercial | |
| Vacant Vegetated Land | 4600 North Cicero Avenue, Chicago, Illinois | --- | East and South across West Wilson Avenue |
| Milwaukee District North Metra Line | --- | Railroad | South across West Wilson Avenue |
| | | | West |

The subject property is located within a mixed-use, residential, commercial, and industrial area. Refer to **Section 4.4.3** for a discussion of the historical use of the adjoining properties and surrounding area.

## 3.4 Geologic, Hydrogeologic, and Topographic Conditions

During the site visit, WCG observed that the subject property topography is generally flat, with the exception of berms and piles of apparent gravel and/or asphalt grindings in the southeast portion, and the pile of salt in the central-eastern portion. Furthermore, WCG observed that the eastern and western adjoining properties were at higher elevations than the subject property, with approximately five to ten-foot slopes from these properties to the subject property. Geologic and hydrogeologic conditions as well as general topographic conditions of the surrounding area are discussed in **Section 4.1**.

## 3.5 Subject Property Structures and Other Improvements

The subject property is improved with an approximately 15,000-square foot, one-story industrial building and two trailers. The building has two office spaces; a truck and equipment storage area with two commercial garage doors; two locker room/restroom areas; a miscellaneous equipment storage area; and an area for truck oil and chemical storage. The areas located south and east of the building are improved with either an asphalt- or concrete-paved parking lot. A gravel-surfaced area located north of the building is utilized for personnel vehicle and equipment storage. A salt storage pile and at least fifty (50) city-provided, 64-gallon waste bins are located in the eastern-central portion of the property. Two rail spurs

were also observed extending onto the subject property from the southeast portion. The rail spurs appeared to be out of use as portions were paved over and/or blocked. **Figure 2** shows relevant features on the subject property and adjoining properties.

The building is currently heated using natural gas fired HVAC units and suspended heaters. The building is currently cooled by two HVAC units located south and east of the building and one small A/C unit located east of the building. The following utility services are provided to the subject property:

- Electric service – provided by Commonwealth Edison (ComEd);
- Natural gas service – provided by People's Gas;
- Potable water – provided by City of Chicago;
- Storm water service - provided by City of Chicago;
- Sanitary service – provided by City of Chicago; and
- Waste disposal services – provided by City of Chicago.

During the site visit, WCG observed that storm water from the building roof is directed via downspouts to the ground surface in the vicinity of the building. The storm water from the ground surface either percolates into the ground or sheet flows to the storm water catch basins located east of the building and west of the salt pile. According to the key site manager, the stormwater sewer trends north and connects to the line located on West Lawrence Avenue.

## 3.6 Site Visit Observations

The following table describes the general observations made during the site visit followed by a further description, as applicable.

| Item | Observed on Subject Property During Site Visit? | | Observed on Adjoining Property During Site Visit? | |
|---|---|---|---|---|
| | Yes | No | Yes | No |
| Hazardous Substances or Petroleum Products in Connection with Identified Uses | X - Section 3.6.1 | | | X |
| USTs | | X | | X |
| ASTs | | X | | X |
| Strong, Pungent, or Noxious Odors | | X | | X |
| Standing Surface Water and Pools of Liquid | | X | | X |
| Drums, Totes, and Intermediate Bulk Containers | X - Section 3.6.1 | | | X |
| Hazardous Substances or Petroleum Product Containers | X - Section 3.6.1 | | | X |
| Unidentified Substance Containers | | X | | X |
| Polychlorinated Biphenyl (PCB) Containing Equipment | X – Section 3.6.2 | | | X |
| Stains or Corrosion of Floors, Walls, or Ceilings | X – Section 3.6.3 | | | X |
| Drains and Sumps | X – Section 3.6.4 | | | X |
| Pits, Ponds, or Lagoons | | X | | X |

| Item | Observed on Subject Property During Site Visit? | | Observed on Adjoining Property During Site Visit? | |
|---|---|---|---|---|
| | Yes | No | Yes | No |
| Stained Soil or Pavement | X – Section 3.6.5 | | | X |
| Stressed Vegetation | | X | | X |
| Solid Waste | X – Section 3.6.6 | | | X |
| Wastewater | | X | | X |
| Wells | | X | | X |
| Septic Systems or Cesspools | | X | | X |

### 3.6.1 Hazardous Substances and Petroleum Products in Connection with Identified Uses

WCG observed the following hazardous substances and/or petroleum products stored or used on the subject property.

| HAZARDOUS SUBSTANCES/PETROLEUM PRODUCTS USED OR STORED | | | |
|---|---|---|---|
| **Type Of Material** | **General Location** | **Container Type and Approximate Quantity** | **Observations** |
| Hydraulic Oil | Indoors within CDWM equipment and storage building, north of offices | Three (3) 55-gallon drum | No evidence of staining or leaks. Containers were not stored in secondary containment. |
| Kerosene | Indoors within CDWM equipment and storage building, north of offices | One (1) 55-gallon drum | No evidence of staining or leaks. Containers were not stored in secondary containment. |
| Lubricant | Indoors within CDWM equipment and storage building, north of offices | Four (4) 55-gallon drums | No evidence of staining or leaks. Containers were not stored in secondary containment. |
| Janitorial and cleaning supplies | Indoors within CDWM offices | Multiple miscellaneous containers approximately one-gallon or less | No evidence of staining or leaks. Containers were stored in janitor closet with a drain to the sewer system. |
| Vehicle fluids (oil and windshield wiper fluid) | Indoors within gated area south of Streets and Sanitation offices | Ten (10) 5-gallon containers of oil and three one-gallon containers of windshield wiper fluid | Containers were stored on cardboard with minimal evidence of leaks or staining. |

According to Mr. Owerczuk, the hydraulic oil, lubricant, and vehicle fluids are used for general upkeep of the CDWM and Streets and Sanitation vehicles and/or cleaning and maintenance of their offices; and that

the kerosene is utilized for heating. Mr. Owerczuk indicated that maintenance of the vehicles is not performed on the subject property.

### 3.6.2 Polychlorinated Biphenyl (PCB) Containing Items

Although a detailed review of all suspected PCB-containing equipment is beyond the scope of this Phase I ESA, WCG conducted a limited evaluation of the subject property in an effort to identify the presence and condition of electrical or hydraulic equipment that is known to or is likely to contain PCBs in insulating or lubricating materials which may represent a Finding for the subject property. PCB-containing equipment and any of its leaked material that may have impacted the subject property could be subject to certain regulatory requirements, such as the Federal Toxic Substances Control Act (TSCA), in addition to being identified as a potential recognized environmental condition for the subject property.

WCG observed the following potentially PCB-containing equipment during the site visit:

- Two pole-mounted electrical transformers are located on the subject property along the northern portion of the western subject property boundary. WCG observed a "non-PCB" label on one of the transformers. One transformer appeared to be in good condition with no visible leaks or irregularities. The other transformer appeared to be older and rusted in some locations. The area under the electrical transformers exhibited no visible staining or abnormal appearance. The owner of those electrical transformers located on the subject property, presumed to be ComEd, is responsible for compliance with the applicable regulations and the management of the electrical transformers.
- One pole-mounted electrical transformer is located off-site along the eastern portion of the northern subject property boundary along West Lawrence Avenue. WCG did not observe a "non-PCB" label on the transformer. The transformer appeared to be in good condition with no visible leaks or irregularities. The area under the electrical transformer exhibited no visible staining or abnormal appearance. The owner of the electrical transformer located near the subject property, presumed to be ComEd, is responsible for compliance with the applicable regulations and the management of the electrical transformer.

Facility operations on the subject property originated prior to 1979. This is generally the date when the production and sale of PCBs was banned. Therefore, the aforementioned equipment not labeled with a "non-PCB" sticker may have contained PCBs.

### 3.6.3 Stains or Corrosion on Floors, Walls, or Ceilings

Apparent de minimis stains were observed in the CDWM vehicle and equipment storage area of the subject property during the site visit. The staining observed in the storage area consisted of multiple stains less than approximately one square foot in size. According to our observations, the concrete floor

surfaces near the areas exhibiting staining were observed to be in good general condition with no visual indications of cracks or joints. WCG has identified the de minimis staining within the CDWM portion of the building as a Finding as further discussed in **Section 7**.

### 3.6.4 Drains and Sumps

Apparent drains were observed in the CDWM janitorial closet and the northeast corner of the CDWM vehicle and equipment storage area locations on the subject property. No evidence of leaks or staining were observed within the vicinity of the drains.

### 3.6.5 Stained Soil or Pavement

Apparently stained soil was observed in the southern portion of the subject property including staining on paved areas and gravel south and southeast of the subject property building, and staining on unpaved areas south of the salt pile on the southeastern portion. The staining appeared to be dark colored and oily, and consisted of stains ranging in size from four to twenty-five (25) square feet in size. According to our observations, the asphalt and concrete pavement areas exhibiting staining were observed to be in poor to fair condition with some evidence of cracks, joints, and/or unpaved gravel-covered areas. According to Mr. Sanders, spills are typically associated with broken hoses on garbage trucks and other facility equipment. Upon discovery, the stains are reportedly covered with sand to absorb the materials, prior to being swept up for off-site disposal. WCG has identified the staining as a Finding with respect to the subject property as further discussed in **Section 7**.

### 3.6.6 Solid Waste

During the site visit, WCG observed the presence of solid waste materials on the subject property including general refuse along the bermed and vegetated areas and a pile of approximately fifteen (15) vehicle tires. According to Mr. Owerczuk's interview remarks, to the best of his knowledge, occasional fly dumping occurs on the subject property. It is unknown if the vehicles tires were part of fly dumping, however, Mr. Owerczuk indicated that fly dumped materials are removed and disposed of off-site by the Streets and Sanitation Department.

# 4 RECORDS REVIEW

## 4.1 Physical Setting Sources

WCG obtained and reviewed published, reasonably ascertainable information concerning the physical setting of the subject property. WCG obtained that information from the following sources:

- Topographic maps prepared by United States Geological Survey (USGS).
- Maps and publications prepared by the Illinois State Geological Survey (ISGS).

The following is a summary of our review of those physical setting sources.

### 4.1.1 Topography

The purpose of the topographic map review is to evaluate the presence of physical structures and/or unique topographic conditions that would be of potential importance in the event of a release or migration of a hazardous substance or petroleum product to or from the subject property. WCG reviewed the USGS Chicago Loop and River Forest, Illinois (2021), 7.5-minute quadrangle topographic map, as well as the Environmental Database Resources Inc. (EDR) interactive Lightbox mapping feature, showing the area in which the subject property is located. The USGS map and EDR Lightbox feature show that the subject property is at an elevation of approximately 611 feet above mean sea level (msl) and is generally flat and the surrounding area generally slopes to the east. Based on our observations during the site visit, the subject property has a gradual slope to the southwest towards W Wilson Avenue. Our review of the above-referenced map revealed no indications of obviously apparent conditions that would represent a Finding for the subject property.

In addition, the groundwater flow direction would be dependent on the geologic unit in which it occurs; however, surface topography can be used to approximate the probable regional trend of the shallow groundwater flow direction. Topography at the vicinity of the subject property is generally flat with a slight slope towards the southwest. In addition, shallow groundwater flow typically follows surface topography and flows toward the nearest body of water. Based on observations at the time of the site visit, as well as current and historical USGS 7.5-minute quadrangle maps (see **Section 4.4.1.1**), groundwater flow direction beneath the subject property may potentially be to the north/northeast toward the North Branch Chicago River located approximately 0.8 miles north/northeast of the subject property.

### 4.1.2 Regional Subsurface Geology

Based on WCG's review of certain ISGS documents (Berg et al. 1987 and Berg et al. 1984), the subject property is underlain by unconsolidated sediments consisting of clay and silt soil of the Carmi Member of

the Equality Formation, overlying clayey and silty tills[1] of the Wedron Formation (since reclassified as the Wedron Group (Hansel and Johnson 1996), overlying Silurian age carbonate bedrock. The Carmi Member is generally described as clay and silt soil with some sand less than 20 feet thick that was deposited in lakes. The Wedron Formation is described as uniform, relatively impermeable, clayey till that is estimated to be greater than 20 feet thick. These sediments overlie Silurian Age dolomitic bedrock. The bedrock stratigraphy in the vicinity of the subject property is composed of a thick sequence of Paleozoic sedimentary rocks that generally consist of carbonate rocks of Silurian age near the ground surface. Published information suggests bedrock is encountered at depths greater than 50 feet of the surface in the vicinity of the subject property.

The regional near-surface hydrostratigraphic units can be generalized into two aquifers: a shallow aquifer zone in more permeable soil (not always present) that may be present in the glacial drift, and deep aquifer in the underlying bedrock aquifers.

The ISGS documents also indicate that the potential for groundwater contamination is low and is classified as "E" due to the presence of greater than 50 feet of clayey till soil.

## 4.2 Standard Environmental Record Sources

According to ASTM E 1527-21, the purpose of reviewing regulatory records is to obtain and review records that will help identify recognized environmental conditions in connection with the subject property. In addition, some records to be reviewed pertain not only to the subject property, but also to properties within an additional "approximate minimum search distance" in order to help assess the likelihood of impacts to the subject property from migrating hazardous substances or petroleum products. When the term "approximate minimum search distance" includes areas outside the subject property, it shall be measured from the nearest subject property boundary. The term 'approximate minimum search distance' is used in lieu of the term 'radius' in order to include irregularly-shaped properties.

WCG retained EDR to provide an ASTM Radius Map Report (Radius Report) for the subject property. The Radius Report is a computerized search of select state and federal environmental databases that identify various properties with a record of environmental activity. WCG reviewed the Radius Report and summarized the relevant listings in the following sections. A copy of the compiled Radius Report has been included as **Appendix D – Regulatory Documentation**.

[1] "Till" means those unconsolidated materials deposited directly from a glacier without reworking by water (e.g., rivers or streams).

### 4.2.1 Summary of Database Listings

*4.2.1.1 Subject Property*

According to the Radius Report, the subject property is listed on the ASBESTOS, Resource Conservation and Recovery Act (RCRA) /EPA Watch List, Facility Registry System (FRS), and Enforcement and Compliance History Online (ECHO), TIER 2, Chicago Inspection, Complaints, Enforcements, Permits, TANKS, UST, UST Finder, SPILLS, Leaking Underground Storage Tank (LUST), Recovered Government Archive (RGA) LUST, UST Finder Release, and Bureau of Land (BOL) databases.

As 4819 W Lawrence Avenue and 4819-4853 W Lawrence Ave, the subject property is listed on the ASBESTOS and/or Chicago Inspections databases with Site ID 031600TOO for asbestos removal activities reported in 2021. No additional information is provided.

As 4835 W Lawrence Ave and 4819 W Lawrence Ave, the subject property is listed on the Chicago Inspections and/or Complaints databases related to noise and dust complaints. No violations were issued during the corresponding inspection(s).

As Mayfair Lumber Co, the subject property is listed on the RCRA Non-Generator/No Longer Regulated (NonGen/NLR) database with United States Environmental Protection Agency (USEPA) ID ILD007980238 as a non-generator and historical small quantity generator (SQG) of ignitable wastes. The subject property is also listed on the Tier 2 database in 2010, 2011, 2013, 2014 with reported use of chemicals including, but not limited to aromatic hydrocarbons, saturated hydrocarbons, chlorofluorocarbons, formaldehyde, toluene, polystyrene/polyisocyanurate foam, copper oxides, magnesium silicate, and mineral spirits. According to the database report, two violations associated with “generators - general” were identified in 2011. The enforcement is listed as “violation notice” and “notice of intent to pursue legal action.” Each violation is listed with a return to compliance date of June 27, 2013. The subject property is also listed on the EPA Watch List in 2013, FRS, and ECHO with the same USEPA ID and/or Registry ID 110005819506.

According to an IEPA Freedom of Information Act (FOIA) response dated December 24, 2024, the IEPA provided documentation regarding a complaint about dumping. According to our review, a complaint was submitted to the IEPA August 4, 2011, of the alleged violator Mayfair Lumber Company. The complaint indicated that the employees were instructed to dump the used by-products of the wood staining process on the property “ground at the rear of the company’s land. The yard forms a diamond at this point where the railroad tracks form a V-shape.” During the IEPA’s follow-up visit, they interviewed the owner Mr. Chip Koenen. Mr. Koenen denied such activity ever took place during his tenure. Additionally, the IEPA noted that there was no visible evidence of open dumping observed in the area near the railroad tracks described by the complainant. During the inspection, the IEPA also noted container of spent mineral spirits that appeared to be poor condition. The inspection report shows a stain shed, diesel AST, heating oil AST in the basement of the office, and metal containers stored in three

buildings. Based on the reported dumping and poor housekeeping of chemicals, WCG has identified this as a Finding.

Documentation was also provided by the IEPA regarding the enforcements listed as "Violation Notice" due to hazardous material storage, and "Intent to Pursue Legal Action" because "Mayfair Lumber Co. failed to respond to the Violation Notice Letter dated February 10, 2012." The documentation indicated that a site visit occurred on June 4, 2013. During the visit, manifests indicative of waste pick-up and disposal October 2012 were provided to the IEPA. A notice on June 11, 2013 stated that the facility had returned to compliance with the apparent violations.

As 4825 W Lawrence Ave, the subject property is listed on the Chicago Inspections, Complaints, and Enforcements databases related to an unpermitted 1,000-gallon diesel fuel AST that was discovered during a May 8, 2009 Tier II Inspection. According to the inspection narrative, the AST was unpermitted and utilized to fuel Mayfair Lumber Co.'s forklifts. WCG has identified this historical diesel fuel AST as a Finding with respect to the subject property, as further discussed in **Section 7**.

According to the TANKS and UST databases, the subject property is listed with Facility ID 2001430 with three historical USTs, as summarized on the following table:

| Tank Number | Chicago Tanks Database | | | | UST Database | | | |
|---|---|---|---|---|---|---|---|---|
| | Capacity (gallons) | Contents | Installation Date | Removal Date | Capacity | Contents | Installation Date | Removal Date |
| 2 | 500 | Gasoline | NR | NR | 1,000 | Gasoline | 1/1/1946 | 5/24/1999 |
| 3 | 1,000 | Diesel | NR | NR | 500 | Diesel | 1/1/1946 | 5/24/1999 |
| 4 | 500 | Heating Oil | 5/20/1952 | NR | 1,000 | Heating Oil | 1/1/1950 | 5/24/1999 |

NR – Not Recorded

Note that neither listing referenced a "Tank Number 1." Based on our review of records obtained from the OSFM, "Tank 1" was a 500-gallon heating oil located within the basement of the former office building on the subject property. The "UST" was reportedly situated on supports approximately ten (10) inches above the floor surface.

According to the Chicago Inspections, SPILLS, and LUST/RGA LUST databases, the subject property is listed with IEPA BOL ID 0316155028 for LUST Incident Number 991239, which was reported in response to a release of gasoline, diesel, and other petroleum during the removal of the three USTs on May 25, 1999. The City of Chicago inspection narrative indicated, "strong evidence of contamination was found in the excavation of the 1000 gasoline and 500 diesel tanks [and] corrosion holes were found in the shell." A No Further Remediation (NFR) Letter was issued for the incident on February 25, 2000. Based on our review of the NFR Letter obtained from the IEPA Document Explorer database, there are no restrictions associated with the NFR Letter. Additionally, from records obtained from a FOIA response from the IEPA

dated December 24, 2024, documentation regarding the LUST incident 991239 on the subject property was provided. According to IEPA 45-Day Report Corrective Action Completion Report dated August 1999, prepared by United Environmental Consultants, Inc. for Mayfair Lumber Company, two USTs were located in one excavation (1,000-gallon gasoline and 500-gallon diesel) and the 1,000-gallon fuel oil UST was located in a second excavation. Soil samples were collected following UST removal and excavation of impacted soil. The samples were analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX) and polynuclear aromatic hydrocarbons (PNAs) and concentrations were below IEPA Tier 1 Soil Remediation Objectives (SROs). In addition, according to the report, saturated conditions and/or groundwater were not encountered within the UST excavation. No information regarding sampling for methyl tert-butyl ether (MTBE) or lead was provided.

As Miller Brothers Lumber Co. located at 4808 W Wilson Ave, the subject property is listed on the TANKS, UST, and LUST databases with Facility ID 2014869 and IEPA BOL ID 0316115120. According to the databases, one 4000-gallon gasoline UST was installed on August 6, 1982, and removed on December 30, 1997. According to our review of the City of Chicago Log of UST Removal, the UST appeared to be empty and in good condition upon removal. The log noted that impacts appeared minor and were limited to the sand backfill. As a result, the inspector noted that a release may have been related to overfilling. LUST Incident 972507 was reported during the removal of the UST. An NFR Letter with no restrictions was issued for the LUST incident on April 8, 1999. No additional information is provided and no records are available on the IEPA Document Explorer. Additional records were obtained from the IEPA FOIA response dated January 2, 2025, regarding the LUST incident 972507 on the subject property. According to Amended 45-Day/Corrective Action Completion Report dated January 27, 1999, prepared by EPS Environmental Services, Inc. for Miller Brothers Lumber Company, Inc., soil samples collected following UST removal and excavation of impacted soil were analyzed for BTEX, and concentrations were below Tier 1 SROs. In addition, according to the report, saturated conditions and/or groundwater were not encountered within the UST excavation. No information regarding sampling for MTBE or lead was provided.

WCG has identified this historical presence of USTs and associated LUST incidents as Findings with respect to the subject property, as further discussed in **Section 7**.

#### *4.2.1.2 Adjoining Properties*

The Radius Report identified the following adjoining property on certain government databases as follows:

- Metra Mayfair Interlocking/Mayfair Interlocking, located at 4600 North Cicero (eastern adjoining) is listed on the UST, UST Finder, and TANKS databases with Facility ID 2030184. According to the database listings, a ninety-two (92) gallon kerosene UST and a 175-gallon gasoline UST were

installed at the property on January 1, 1962 and removed on June 30, 1993. No LUST incident was reported in association with these USTs.

Based on the information provided in the Radius Report, the presence of intervening roads, structures, and underground utilities, and WCG's observations during our site reconnaissance, WCG has not identified the adjoining property database listings within the Radius Report as Findings in connection with the subject property.

*4.2.1.3 Surrounding Properties*

The Radius Report identifies various relevant surrounding properties on certain government databases as follows:

- Under various names, including NEM Lamon LLC and Fixture Hardware Company, the property located at 4701-4711 North Lamon Ave (approximately 150 feet west of the subject property) is listed on multiple databases including the UST, TANKS, LUST, and Site Remediation Program (SRP) databases under OSFM Facility ID 2035014 and IEPA BOL ID 0316115094. Historical tanks reported on the property include various heating oil USTs and a bulk storage AST associated with a generator.

  According to the LUST database listing, a release of "other petroleum" was reported on November 7, 1995 and a heating oil exemption status is listed on March 26, 2013. However, the property was enrolled in the SRP on February 20, 2019 and a Focused NFR letter was issued for Volatile Organic Compounds (VOCs), PNAs, and polychlorinated biphenyls (PCBs) on August 15, 2019. The Focused NFR Letter included an on-site groundwater use restriction and slab-on-grade construction requirement.

- Amerdec Inc., located at 4425 W Montrose Avenue (approximately 2,700 feet southeast from the subject property), is listed on multiple database including the CORRACTS, RCRA-TSDF, RCRA NONGEN/NLR, FRS, and ECHO.

Based on the information provided in the Radius Report, the presence of roads, structures, and underground utilities, the distances from the subject property, and/or WCG's observations during our site reconnaissance, WCG has not identified the surrounding property database listings within the Radius Report as Findings in connection with the subject property unless stated otherwise above.

### 4.2.2 Orphan Sites

The Radius Report includes a section addressing "Orphan Sites." Orphan sites are sites, which due to incomplete geographic location data or incomplete or incorrect address information, cannot be plotted correctly. The Radius Report listed no orphan sites in the vicinity of the subject property.

## 4.3 Additional Environmental Record Sources

Based on our review of historical sources and interview documentation, the following addresses currently or historically were associated with the subject property:

- 4819-4853 W Lawrence Ave;
- 4825A W Lawrence Ave;
- 4610-4640 N Cicero Ave; and
- 4808 W Wilson Ave.

In addition, based on our review of historical sources and interview documentation, the following owners and/or occupants were identified in association with the subject property:

- Mayfair Lumber Co.;
- Miller Brothers Lumber Co.;
- Koenen Len OFC;
- CDWM; and
- Chicago Streets and Sanitation.

Based on the above information, WCG obtained and reviewed published, reasonably ascertainable information associated with the subject property in regard to these subject property addresses and owners/occupants. WCG obtained that information from the following sources:

- Records on file at the United States Environmental Protection Agency (USEPA);
- Records on file at the IEPA;
- Records on file at the OSFM;
- Records on file at the Cook County Department of Environment and Sustainability (CCDES);
- Records on file at the Cook County Public Health Department (CCDPH);
- Records on file at the Cook County Assessor's Office; and
- Records on file at the City of Chicago.

The following sections summarize our review of those records.

### 4.3.1 United States Environmental Protection Agency Records Review

WCG reviewed the online USEPA Envirofacts database on December 10, 2024 for records associated with the subject property. According to our review, no records were available for the subject property addresses.

### 4.3.2 Illinois Environmental Protection Agency Records Review

WCG reviewed the online IEPA Document Explorer database on December 10, 2024 for records associated with the subject property. According to our review, an NFR letter was available for Mayfair Lumber Co. regarding a LUST incident.

In addition, FOIA requests were submitted to the IEPA Division of Records Management, which collects responses from the Bureaus of Land, Water, and Air and the Office of Emergency Response, on November 27, 2024 and December 17, 2024 for records associated with the subject property. IEPA FOIA responses dated December 24, 2024 and January 2, 2025 included documents related to the LUST incidents 972507 and 991239 and violation notices. The information provided is discussed above in **Section 4.2.1**.

### 4.3.3 Office of the State Fire Marshal Records Review

On December 10, 2024, WCG reviewed the current online OSFM database regarding records of USTs on the subject property. Records available on the current online database were generally consistent with the database listings in the Radius Report. Based on the online OSFM database, WCG submitted FOIA requests to the OSFM on December 3, 2024 and December 16, 2024 to obtain additional information concerning the USTs identified on the subject property. OSFM FOIA responses dated December 4, 2024 and December 16, 2024 included various documents related to the former USTs at the subject property. Relevant information was discussed above in **Section 4.2.1.1**. WCG has identified the historical presence of USTs on the subject property as a Finding as further discussed in **Section 7**. Copies of the OSFM FOIA request and response are included in **Appendix E – Environmental Records and Interview Documentation**.

### 4.3.4 Cook County Health Department Records Review

WCG submitted a FOIA request to CCDPH on November 27, 2024 for records associated with the subject property. According to a CCDPH FOIA response dated November 27, 2024, no records are on file for the subject property. Copies of the FOIA request and response are included in **Appendix E – Environmental Records and Interview Documentation**.

### 4.3.5 Cook County Department of Environment and Sustainability

WCG submitted a FOIA request to CCDES on November 27, 2024 for records associated with the subject property. According to a CCDES FOIA response dated December 26, 2024, no records are on file for the

subject property. Copies of the FOIA request and response are included in **Appendix E – Environmental Records and Interview Documentation**.

### 4.3.6 Cook County Assessor's Office Records Review

WCG reviewed the current online Cook County Assessor's Office records as part of this Phase I ESA. According to the current online Cook County Assessor's Office records, the subject property consists of four parcels, with PIN details below:

| PIN | Associated Street Address | Size of Parcel (square feet) |
|---|---|---|
| 13-16-207-003-0000 | 4825 West Lawrence Avenue | 116,906 |
| 13-16-207-005-0000 | 4640 North Cicero Avenue | -- |
| 13-16-207-007-0000 | 4819 West Lawrence Avenue | 137,005 |
| 13-16-207-008-0000 | 4610 North Cicero Avenue | 22,703 |

Copies of the current online Cook County Assessor's Office records for the subject property are included in **Appendix E – Environmental Records and Interview Documentation**.

### 4.3.7 City of Chicago

WCG submitted FOIA requests to the City of Chicago Department of Fleet and Facility Management (2FM), Department of Public Health (CDPH), and Community Commission for Public Safety and Accountability (CCPSA) on November 27, 2024.

WCG received a response from 2FM on December 6, 2024. The response indicated that an NFR Letter for a LUST incident on the subject property was issued on April 8, 1999. No additional information was provided. WCG has listed the historical LUST incident at the subject property as a Finding, as discussed in **Section 7**.

According to a FOIA response form CCPSA dated December 10, 2024, no records were available responsive to our request.

According to a CDPH FOIA response dated December 5, 2024, no records are on file for the subject property. Copies of the FOIA request and response are included in **Appendix E – Environmental Records and Interview Documentation**.

## 4.4 Historical Use Information

The objective in consulting historical sources is to develop a history of the previous uses or occupancies of the subject property, adjoining properties, and the surrounding area in an effort to identify those uses or occupancies that are likely to have resulted in the presence of a Finding in connection with the subject property. ASTM E 1527-21 specifies that uses of the subject property should be identified from the present back to the subject property's first developed use, or back to 1940, whichever is earlier.

### 4.4.1 Standard Historical Sources

WCG requested and reviewed the following standard historical sources as part of this report:

- Historical aerial photographs (years reviewed: 1938, 1951, 1962, 1972, 1983, 1988, 1994, 1999, 2005, 2009, 2012, 2015, 2019);
- Fire Insurance Maps (years reviewed: 1924, 1940, 1951, 1975, 1987, 1988, 1993, 2004);
- Historical USGS 7.5-minute quadrangle maps (years reviewed: 1889, 1891, 1900, 1901, 1928, 1929, 1953, 1963, 1972, 1978, 1993, 1997, 2012, 2015, 2018, 2021); and
- Local Street Directories (years reviewed: 1923, 1928, 1931, 1932, 1941, 1947, 1949, 1951, 1957, 1961, 1966, 1971, 1976, 1981, 1986, 1992, 1993, 1995, 1999, 2000, 2005, 2010, 2014, 2017, 2020).

Copies of the historical records are included in **Appendix F – Historical Records Documentation**.

Summaries of the information provided with each standard historical source are discussed in the following sections.

#### *4.4.1.1 Subject Property Historical Records*

The following table provides a summary of our review of the historical records available for the subject property.

| Source | Dates | Observation |
|---|---|---|
| Topographic Maps | 1889-2021 | 1889-1901: The subject property appears improved with several streets, with no structures depicted.<br>1928: The subject property appears improved with at least three small structures in the southern portion with a rail spur extending north to south along its eastern perimeter. Railroad tracks appear improved along the eastern and western boundaries.<br>1953-1997: The subject property is shaded red indicating it is part of a developed area. No individual structures are depicted, but rail spurs are depicted along the eastern boundary.<br>2012-2021: No structures or shading are depicted on the maps and one rail spur is depicted in the eastern portion of the subject property. |

| Source | Dates | Observation |
|---|---|---|
| Fire Insurance Maps | 1924-2004 | Note: The approximate southern quarter of the subject property was not visible on the fire insurance maps provided by EDR.<br><br>1924: The subject property appears unimproved except for a rail spur in the southwestern portion.<br>1940: The northern portion of the subject property appears to be improved with a structure identified as a lumber shed occupied by Mayfair Lumber Co. Exterior lumber storage areas are identified around the structure. The eastern portion of the property is improved with three rail spurs extending north to south. The southern portion is improved with three smaller structures labeled "sawdust" and "cement storage."<br>1951: The subject property appears to remain generally unchanged except that a separate office building appears to have been constructed along Lawrence Avenue along with a second sawdust storage structure in the southern portion. In addition, one gasoline tank is depicted to the southeast of the Mayfair Lumber Co. building.<br>1975-1993: The northern portion of the subject property appears to remain occupied by Mayfair Lumber Co. with a larger area for lumber piles. The three southern structures appear to have been replaced with two larger structures.<br>2004: The subject property appears generally unchanged except a second gas tank is depicted in the northeastern portion along Lawrence Avenue.<br><br>Addresses associated with the subject property include 4825, 4825A, and 4853 W. Lawrence Ave. |
| Aerial Photographs and Google Earth Imagery | 1938-2024 | 1938: The subject property appears improved with one large building and several ancillary structures in the northern portion, and several smaller ones on the southern portion. The eastern portion of the property is with several rail spurs extending north to south. Lumber storage is apparent throughout the subject property.<br>1951: The subject property remains generally unchanged except that several additional structures appear to have been constructed in the northern and southern portions.<br>1962: The southern structures appear to have been razed replaced by two larger structures. One smaller building also appears to have been constructed in the northwestern portion of the subject property.<br>1972-2009: An addition appears to have been constructed on the southern portion of the building in the southern portion of the subject property.<br>2009-2019: The subject property appears generally unchanged, but the exterior areas in the northern portion no longer appear to be utilized for lumber storage and are sometimes utilized for vehicle parking.<br>2021-2022: The buildings in the northern portion of the subject property appear to have been demolished. An apparent salt pile appears visible in the southeast corner of the property.<br>2023-2024: Smaller material piles appear present in the northeast corner of the property. |

| Source | Dates | Observation |
|---|---|---|
| City Directories | 1951 | 4823 W Lawrence: Mayfair Lumber Co.<br>4825 W Lawrence: Mayfair Awning Co. |
| | 1957 | 4825 W Lawrence: Mayfair Labor Co.<br>Koenen Len OFC |
| | 1961-2014 | 4825 W Lawrence: Mayfair Lumber Co. |

Our review of the historical records identified historical industrial operations including lumber storage and an associated gasoline tank on the subject property. WCG has identified the historical industrial use and presence of gasoline tanks at the subject property as a Finding in connection with the subject property as further discussed in **Section 7**.

4.4.1.1.1 Historical Reports

WCG also reviewed the following historical environmental report and document for the subject property:

- Plat of Survey, November 13, 2014, prepared by Accurate Survey Service, Inc.;
- Phase I ESA, Mayfair Lumber Site, December 20, 2019, prepared by August Mack Environmental, Inc.; and
- Phase II Subsurface Investigation, Cost Model, December 20, 2019, prepared by August Mack Environmental, Inc.

The following describes the findings of our review of the Phase I ESA and Phase II Subsurface Investigation reports.

- 2019 Phase I ESA: It should be noted that the entire document was not provided. According to the report, three recognized environmental conditions were reported in connection with the subject property as follows:
    - "The unknown disposition of up to four (4) historical USTs, as well as the elevated concentrations of benzene and benzo(a)pyrene in soil samples collected from both known excavations.
    - "The long-term use of the Site for treating and storing lumber, and the presence of the rail spur on the eastern portion since at least 1938.
    - "The significant data gap associated with the inaccessibility of multiple Site buildings and the unknown disposition of a possible fuel oil storage tank associated with the northern office building."
- 2019 Phase II Subsurface Investigation: It should be noted that the entire document was not provided. The subsurface investigation was conducted to assess if subsurface conditions on the

subject property had been impacted by the noted recognized environmental conditions listed in the 2019 Phase I ESA. Seven soil borings were advanced and fourteen (14) soil samples were collected (two from each soil boring). Two soil borings were converted into temporary, 1-inch diameter PVC monitoring wells for collection of groundwater samples. The samples were analyzed for VOCs, Semi-Volatile Organic Compounds (SVOCs), Polynuclear Aromatic Hydrocarbons (PAHs), Resource Conservation and Recovery Act (RCRA) 8 Metals [arsenic, barium, cadmium, chromium, lead, mercury, selenium, silver], and total corrosivity (pH) analysis.

The analytical data was not provided as part of this report; however, it was noted that the laboratory analyses of the soil samples indicated that VOCs, PAHs, and SVOCs were below applicable Tier 1 SROs for Industrial/Commercial Properties, and total chromium and lead exceeded the Tier 1 SROs for the Soil Component of the Groundwater Ingestion Exposure Route. In addition, the report notes that one groundwater sample was collected, and PAHs [benzo(b)fluoranthene, benzo(g,h,i)perylene, benzo(k)fluoranthene, chrysene, fluoranthene, and pyrene] and metals [arsenic, total chromium, mercury, and lead] were above applicable GROs.

A figure of the soil boring and temporary monitoring well locations was not provided. WCG has identified the reported impacts on the subject property as a Finding as further discussed in **Section 7**.

#### *4.4.1.2 Adjoining Property Historical Records*

##### 4.4.1.2.1 Northern Adjoining Property

The following table provides a summary of our review of the historical records available for the northern adjoining property:

| Source | Dates | Observation |
|---|---|---|
| Topographic Maps | 1889-2021 | 1889-1928: The northern adjoining property appears improved with a street followed by unimproved land.<br>1953-1997: The property is shaded red indicating it is part of a developed area labeled as "Ashmore Park", although no individual structures are depicted. The property appears generally unchanged through at least 1997.<br>2012-2021: No structures or shading are depicted on the maps. |
| Fire Insurance Maps | 1924-2004 | 1924-1951: The property appears to be unimproved land across W. Lawrence Avenue.<br>1975-1987: The western portion of the property addressed 4448-4858 W. Lawrence Avenue appears to be improved with one building labeled Ostrom Tool Co. tool manufacturing and a parking lot. The eastern portion addressed 4820 W. Lawrence Avenue appears improved with a building labeled "N C." |

| Source | Dates | Observation |
|---|---|---|
| | | 1988: The property appears generally unchanged except the eastern building appears to have been razed and replace with a smaller building.<br>1993-2004: The property appears generally unchanged except the eastern portion is labeled as an Auto Wash facility. |
| Aerial Photographs and Google Earth Imagery | 1938-2024 | 1938-1951: The property appears unimproved.<br>1962: The property appears to have been improved with a building in the western portion.<br>1972: The eastern portion of the property appears to have been improved with a building, with parking between the two property buildings.<br>1994-2018: The eastern building appears to have been razed and redeveloped with another commercial building.<br>2019-2024: The eastern building appears to have been razed and replaced with another commercial building. |

| Source | Dates | Observation |
|---|---|---|
| | 2020 | 4820 Lawrence Ave: Express Car Wash<br>4848 Lawrence Ave: East West Trading Co.<br>Sunbelt Pools Inc.<br>Harry Kim |

Based on the presence of intervening roads and associated utilities, and the presumed groundwater flow direction to the north/northeast, our review of the historical records revealed no indications of apparent conditions that would represent a Finding for the subject property.

4.4.1.2.2 Eastern Adjoining Property

The following table provides a summary of our review of the historical records available for the eastern adjoining property:

| Source | Dates | Observation |
|---|---|---|
| Topographic Maps | 1889-2021 | 1889-2021: The property appears unimproved except for a rail line extending north to south labeled "C and NW RR" from at least 1900 through 1928. |
| Fire Insurance Maps | 1924-2004 | 1924-2004: The property appears to consist of unimproved land and multiple rail lines extending north to south labeled "C and NW RR". |
| Aerial Photographs and Google Earth Imagery | 1938-2024 | 1938: The property appears improved with multiple, rail lines extending north to south.<br>1951-2011: Some of the rail lines appear to have been abandoned or removed and the area appears to have become vegetated.<br>2012-2024: The remaining rail lines appear to have been abandoned or removed and become vegetated. |
| City Directories | 1923-2020 | None available for 4600 N Cicero Ave |

Our review of the historical records revealed no indications of apparent conditions that would represent a Finding for the subject property.

4.4.1.2.3 Southern Adjoining Property

The following table provides a summary of our review of the historical records available for the southern adjoining property:

| Source | Dates | Observation |
|---|---|---|
| Topographic Maps | 1889-2021 | 1889-2021: The area appears to consist of unimproved land between the intersection of the two rail lines that run along the western and eastern perimeters of the subject property. |
| Fire Insurance Maps | 1924-2004 | The southern adjoining property is not depicted on the fire insurance maps. |

| Source | Dates | Observation |
|---|---|---|
| Aerial Photographs and Google Earth Imagery | 1938-2024 | 1938-2011: The area appears to consist of unimproved land between the intersection of the two rail lines that run along the western and eastern perimeters of the subject property.<br>2012-2024: The property appears generally unchanged except the east rail line appears abandoned and the area has become vegetated. |
| City Directories | 1923-2020 | None available for 4600 N Cicero Ave |

Our review of the historical records revealed no indications of apparent conditions that would represent a Finding for the subject property.

4.4.1.2.4 Western Adjoining Property

The following table provides a summary of our review of the historical records available for the western adjoining property:

| Source | Dates | Observation |
|---|---|---|
| Topographic Maps | 1889-2021 | 1889-2021: The property appears improved with a rail line extending northwest to southwest labeled on several maps as “Milwaukee & St. Paul Railroad”. |
| Fire Insurance Maps | 1924-2004 | 1924-2004: The property appears improved with three rail lines. |
| Aerial Photographs and Google Earth Imagery | 1938-2024 | 1938-2024: It appears that the property is improved with multiple rail lines, extending northwest-southeast. |
| City Directories | 1923-2020 | None available for 4826 N Cicero Ave |

Our review of the historical records revealed no indications of apparent conditions that would represent a Finding for the subject property.

## 4.4.2 Historical Use Information on the Subject Property

Based on our review of historical records, the subject property appears improved with several streets and no structures until approximately 1924. By 1928, the subject property appears improved with at least three small structures in the southern portion with a rail spur extending north to south along its eastern perimeter. By 1938, the northern portion appears improved with several buildings and an additional building appears to have been constructed in the southern portion. By 1940, the northern portion of the subject property appears to be occupied by Mayfair Lumber Co. and the southern portion appears to be occupied by an unnamed lumber company. There appear to be lumber storage areas throughout the property. By 1951, various additional structures appear to have been constructed including an office building in the northern portion, various sawdust storage structures, and a gasoline tank to the southeast of the Mayfair Lumber Co. building. With the exception of demolition and/or construction of various

structures associated with the lumber company operations, the subject property appears generally unchanged until at least 1993. By 2004, an additional gasoline tank appeared improved in the northeastern portion of the property. By 2009, the northern portion no longer appears to be utilized for lumber storage and it remains generally unchanged through at least 2019. By 2021, the buildings in the northern portion appear to have been demolished and an apparent salt pile appears visible in the southeast corner of the property. By 2023, several smaller material piles appear visible in the northeastern corner. The subject property remained generally unchanged through the date of the site visit, with only one building remaining in the southern portion.

According to city directories, the northern portion of the subject property was historically occupied by Mayfair Lumber Company from at least 1951 through 2014. Based on our review of the Radius Report database listings, the southern portion of the property was historically occupied by Miller Brothers Lumber in the 1990's. According to the key site manager, the subject property has been occupied by the CDWM and Chicago Streets and Sanitation Department for five to ten (10) years.

WCG has identified the historical industrial use and presence of gasoline tanks at the subject property as a Finding in connection with the subject property as further discussed in **Section 7**.

### 4.4.3 Historical Use Information on Adjoining Properties and Surrounding Area

Based on our review of historical records, the northern adjoining property appeared to be unimproved as early as 1889 and until at least 1951. By 1953, the property is shaded red on topographic maps, indicating it is part of a developed area. By 1962, the property appears to have been improved with a building in the western portion. By at least 1972 and through 1987, the eastern portion of the property appears to have been improved with a building, with parking between the two property buildings. By 1988, the eastern building appears to have been razed and replaced and from at least 1993 to 2004, the building is labeled as an auto wash facility. The property remained generally unchanged through 2018. By 2019, the eastern building appeared to have been razed and replaced. The property remained generally unchanged through the date of the site visit. Based on our review of city directories, the northern adjoining property has been occupied by various commercial tenants since at least 1928, including an auto repair facility in 1947; Ostrom Tool Company from at least 1957 through 2005; various commercial tenants from 205 through 2020; and car wash facilities from at least 1999 through 2020.

The eastern adjoining property appeared to be improved as early as 1889 with a rail line extending north to south and labeled "C and NW Railroad". By 1951, some of the rail lines appear to have been abandoned or removed and by 2011, the remaining rail lines appear to have been abandoned or removed. The property appeared generally unchanged through the date of the site visit.

The southern adjoining property appeared to consist of unimproved land between the intersection of the two rail lines that run along the western and eastern perimeters of the subject property as early as 1889. The property appeared generally unchanged through the date of the site visit.

The western adjoining property appeared to be improved as early as 1889 with a rail line extending northwest to southwest labeled as “Milwaukee & St. Paul Railroads”. The property appeared generally unchanged through the date of the site visit.

According to our review of historical records, the surrounding area appears to have been utilized as industrial and commercial land from at least 1889 through present day. No Findings were identified associated with the surrounding area.

# 5 INTERVIEWS

WCG representative Ms. Jeana Burke and Ms. Allison Fournier conducted interviews of select individuals possessing knowledge of the current and past subject property uses in an effort to obtain information concerning the potential presence of recognized environmental conditions. Such individuals consist of persons or local agency officials that may have records or knowledge of events or conditions that are not evident during the site reconnaissance or records review.

## 5.1 Interview with Owner, Key Site Manager, and Occupants

WCG interviewed Mr. Grzegorz (Gregory) Owerczuk of the CDWM, identified by Mr. Jose Barajas as the key site manager of the subject property and representative of the owner, concerning the current and past use of the subject property and the facility operations. WCG obtained Mr. Owerczuk's interview responses during our site visit. In addition, WCG interviewed Mr. John Gallagher of CDWM and Mr. Ben Sanders of the Chicago Streets and Sanitation Department during portions during the site visit. Furthermore, an employee of the CDWM completed the Environmental Site Assessment Questionnaire included in **Appendix E – Environmental Records and Interview Documentation.** The interview responses are included throughout the report.

## 5.2 Interviews with Past Owner, Operators, and Occupants

WCG was not provided information concerning the past owners, operators, or occupants; therefore, past owners, operators, and occupants were not interviewed as part of this Phase I ESA. Based on information obtained from other sources as summarized in this report, WCG believes that an interview with the past owners, operators, or occupants would be duplicative of information already obtained and would not provide additional material information concerning the potential for contamination at the subject property. Therefore, WCG has not identified this lack of an interview as a data gap.

## 5.3 Interviews with Adjoining Property Owners or Occupants

The subject property is not abandoned; therefore, ASTM E 1527-21 does not require interviews of the adjoining property owners or occupants.

## 5.4 Interviews with Local Government Officials

As discussed in **Section 4.3,** records were sought from the following federal, state, and local government agencies during the Phase I ESA to obtain environmental information associated with the subject property:

- USEPA;
- IEPA;

- OSFM;
- CCDPH;
- CCDES;
- Cook County Assessor Office; and
- City of Chicago (various departments).

Copies of each FOIA request and the responses, if applicable, received to date are included in **Appendix E – Environmental Records and Interview Documentation**.

As of the date of this report, the IEPA, CCDES, and CDPH records have not been made available for review. WCG will forward any information of interest to Public Building Commission of Chicago after it becomes available for review, if it significantly impacts our conclusions presented herein. WCG identified this lack of information as a data gap (see **Section 7.3**).

## 5.5 Interviews with Others

WCG did not interview any others beyond those parties described in this report.

# 6 NON-SCOPE CONSIDERATIONS

According to ASTM E 1527–21, there are certain constituents of potential concern not necessarily covered by CERCLA's "all appropriate inquiries", which are considered "additional services". As such, the user may choose not to include these items. ASTM identifies these items as follows:

- Suspect Asbestos-Containing Materials;
- Biological Agents;
- Cultural and Historic Resources;
- Ecological Resources;
- Endangered Species;
- Health and Safety;
- Indoor Air Quality (unrelated to releases into the environment);
- Industrial Hygiene;
- Lead-Based Paint;
- Lead in Drinking Water;
- PCB-Containing Building Materials;
- Substances Not Defined as Hazardous Substances;
- Mold;
- Radon;
- Regulatory Compliance; and
- Wetlands.

No additional non-scope services were requested by the user as part of this Phase I ESA; therefore, for the purpose of this Phase I ESA, these items are excluded.

# 7 FINDINGS AND OPINIONS

WCG has performed this Phase I ESA, in general compliance with the scope and limitations of ASTM E 1527-21. Exceptions to or deviations from this practice are described in **Section 1.6** and **Section 7.4** of this report.

## 7.1 Findings and Opinions

WCG has identified the following Findings in connection with the subject property. A description of the Finding as well as our opinion of whether the Finding represents a recognized environmental condition, historical recognized environmental condition, controlled recognized environmental condition, or de minimis condition is summarized below.

- The potential presence of impacts associated with the current use of the subject property for vehicle storage and upkeep, and apparent associated staining.

The subject property is currently occupied by the CDWM and the City of Chicago Streets and Sanitation Department as a meeting area, for equipment storage and upkeep, and for material storage. Various vehicles and equipment are stored at the subject property including dump trucks, snow plows, backhoes, dozers, and skid steers.

WCG observed apparently stained soil in the southern portion of the subject property including staining on paved areas and gravel south and southeast of the subject property building, and staining on unpaved areas south of the salt pile on the southeastern portion. The staining appeared to be dark colored and oily, and consisted of stains ranging in size from four to twenty-five (25) square feet in size. According to our observations, the asphalt and concrete pavement areas exhibiting staining were observed to be in poor to fair condition with some evidence of cracks, joints, and/or unpaved gravel-covered areas. According to the occupant, spills are typically associated with broken hoses on garbage trucks and other facility equipment. Upon discovery, the stains are reportedly covered with sand to absorb the materials, prior to being swept up for off-site disposal.

Due to the size of the spills observed in the southern portion of the subject property and the condition of the surfaces on which the spills were observed, WCG has identified this Finding as a recognized environmental condition.

- The potential presence of impacts associated with the storage of hazardous substances and petroleum products and associated staining within the subject property building.

During the site visit, WCG observed hydraulic oil, lubricant, and vehicle fluids storage at the subject property, utilized in the general upkeep of vehicles and equipment. Apparent de minimis stains were observed in the CDWM vehicle and equipment storage area of the subject property during the site visit.

The staining observed in the storage area consisted of multiple stains less than approximately one square foot in size. According to our observations, the concrete floor surfaces near the areas exhibiting staining were observed to be in good general condition with no visual indications of cracks or joints.

Based on the size of the apparent stains and condition of the stained surfaces, WCG has identified this Finding as a de minimis condition.

- The known presence of impacts identified during the 2019 Phase II Subsurface Investigation.

The user provided WCG with a portion of the 2019 Phase II Subsurface Investigation, prepared by August Mack Environmental, Inc. The subsurface investigation was conducted to assess if subsurface conditions on the subject property had been impacted by the recognized environmental conditions listed in a 2019 Phase I ESA. Seven soil borings were advanced and fourteen (14) soil samples were collected (two from each soil boring). Two soil borings were converted into temporary, 1-inch diameter PVC monitoring wells for collection of groundwater samples. The samples were analyzed for VOCs, SVOCs, PAHs, RCRA 8 Metals [arsenic, barium, cadmium, chromium, lead, mercury, selenium, silver], and total corrosivity (pH) analysis.

The analytical data was not provided as part of this report; however, it was noted that the laboratory analyses of the soil samples indicated that VOCs, PNAs, and SVOCs were below applicable Tier 1 SROs for Industrial/Commercial Properties, and total chromium and lead exceeded the Tier 1 SROs for the Soil Component of the Groundwater Ingestion Exposure Route. In addition, the report notes that one groundwater sample was collected, and PAHs [benzo(b)fluoranthene, benzo(g,h,i)perylene, benzo(k)fluoranthene, chrysene, fluoranthene, and pyrene] and metals [arsenic, total chromium, mercury, and lead] were above applicable GROs. A figure depicting the sample locations was not provided.

Based on reported impacts, WCG has identified this Finding as a recognized environmental condition.

- The potential presence of impacts associated with the historical presence of four registered USTs with two associated closed LUST incidents.

According to the Radius Report, the subject property addressed 4825 West Lawrence is listed on the TANKS and UST databases with Facility ID 2001430 and three historical USTs, as summarized on the following table:

| Tank Number | Chicago Tanks Database | | | | UST Database | | | |
|---|---|---|---|---|---|---|---|---|
| | Capacity (gallons) | Contents | Installation Date | Removal Date | Capacity | Contents | Installation Date | Removal Date |
| 2 | 500 | Gasoline | NR | NR | 1,000 | Gasoline | 1/1/1946 | 5/24/1999 |
| 3 | 1,000 | Diesel | NR | NR | 500 | Diesel | 1/1/1946 | 5/24/1999 |
| 4 | 500 | Heating Oil | 5/20/1952 | NR | 1,000 | Heating Oil | 1/1/1950 | 5/24/1999 |

NR – Not Recorded

Note that neither listing referenced a "Tank Number 1." Based on our review of records obtained from the OSFM, "Tank 1" was a 500-gallon heating oil located within the basement of the former office building on the subject property. The "UST" was reportedly situated on supports approximately ten (10) inches above the floor surface.

According to the Chicago Inspections, SPILLS, and LUST/RGA LUST databases, the subject property is listed with IEPA BOL ID 0316155028 for LUST Incident Number 991239, which was reported in response to a release of gasoline, diesel, and other petroleum during the removal of the three USTs on May 25, 1999. The City of Chicago inspection narrative indicated, "strong evidence of contamination was found in the excavation of the 1000 gasoline and 500 diesel tanks [and] corrosion holes were found in the shell." An NFR Letter was issued for the incident on February 25, 2000. Based on our review of the NFR Letter obtained from the IEPA Document Explorer database, there are no restrictions associated with the NFR Letter. Additionally, in a FOIA response dated December 24, 2024, the IEPA provided documentation regarding the LUST incident 991239 on the subject property. According to IEPA 45-Day Report Corrective Action Completion Report dated August 1999, prepared by United Environmental Consultants, Inc. for Mayfair Lumber Company, two USTs were located in one excavation (1,000-gallon gasoline and 500-gallon diesel) and the 1,000-gallon fuel oil UST was located in a second excavation. Soil samples were collected following UST removal and excavation of impacted soil. The samples were analyzed for BTEX and PNAs and concentrations were below IEPA Tier 1 SROs. In addition, according to the report, saturated conditions and/or groundwater were not encountered within the UST excavation. No information regarding sampling for MTBE or lead was provided.

Additionally, according to a 1951 Sanborn Map, a gasoline tank was depicted southwest of the former Mayfair Lumber Co. building (Main Shed/Garage). The tank was depicted through at least 2004. It should be noted that this tank is depicted in the same general location as the 1,000-gallon gasoline UST associated with LUST incident 991239. Therefore, this may be the same tank.

Additionally, as Miller Brothers Lumber Co. located at 4808 W Wilson Ave, the subject property is listed on the TANKS, UST, and LUST databases with Facility ID 2014869 and IEPA BOL ID 0316115120. According to the databases, one 4,000-gallon UST was historically present in the southern portion of the subject property. LUST Incident 972507 was reported during the removal of the UST on December 30, 1997. According to our review of the City of Chicago Log of UST Removal, the UST appeared to be empty and in good condition upon removal. The log noted that impacts appeared minor and were limited to the sand backfill. As a result, the inspector noted that a release may have been related to overfilling. An NFR Letter with no restrictions was issued for the LUST incident on April 8, 1999. Additional records were obtained from the IEPA FOIA response dated January 2, 2025, regarding this LUST incident. According to Amended 45-Day/Corrective Action Completion Report dated January 27, 1999, prepared by EPS Environmental Services, Inc. for Miller Brothers Lumber Company, Inc., soil samples collected following UST removal and

excavation of impacted soil were analyzed for BTEX, and concentrations were below Tier 1 SROs. In addition, according to the report, saturated conditions and/or groundwater were not encountered within the UST excavation. No information regarding sampling for MTBE or lead was provided.

Although NFR Letters were issued for these incidents with no restrictions, the post-removal samples were not analyzed for the full list of indicator contaminants as required by the IEPA (i.e., no MTBE or lead). Therefore, WCG has identified this Finding as a recognized environmental condition.

- The potential presence of impacts associated with historical industrial use of the subject property including the use, storage, and alleged dumping of hazardous materials and a potential existing gasoline tank.

Based on our review of historical records, from at least 1940 to 2004, the northern and southern portions of the subject property appeared to be occupied by lumber companies. Additionally, a gasoline tank is depicted in the 2004 Sanborn Map on the northern-central portion of the subject property. No installation or removal records associated with this tank were reviewed as part of this Phase I ESA.

According to the Radius Report, the subject property is listed as Mayfair Lumber Co on the RCRA NonGen/NLR database as a non-generator and historical SQG of ignitable wastes. The subject property is also listed on the Tier 2 database in 2010, 2011, 2013, 2014 with reported use of chemicals including, but not limited to aromatic hydrocarbons, saturated hydrocarbons, chlorofluorocarbons, formaldehyde, toluene, polystyrene/polyisocyanurate foam, copper oxides, magnesium silicate, and mineral spirits. According to the database report, two violations associated with “generators - general” were identified in 2011.

According to information obtained from an IEPA FOIA response, a complaint was submitted to the IEPA of the alleged violator Mayfair Lumber Company. The complaint indicated that the employees were instructed to dump the used by-products of the wood staining process on the property. During the IEPA’s follow-up visit, they interviewed the owner Mr. Chip Koenen. Mr. Koenen denied such activity ever took place during his tenure. Additionally, the IEPA noted that there was no visible evidence of open dumping observed in the area near the railroad tracks described by the complainant. The inspection report shows a stain shed, diesel AST, heating oil AST in the basement of the office, and metal containers stored in three buildings. A notice on June 11, 2013 stated that the facility had returned to compliance with the apparent violations.

Based on the length of time that the subject property was utilized for industrial purposes (at least since 1928), the known use and storage of hazardous substances and petroleum products, and the absence of removal records associated with the gasoline tank depicted in the 2004 Sanborn Map, WCG has identified this Finding as a recognized environmental condition.

## 7.2 Vapor Encroachment Screen

WCG conducted a Tier 1 VES in general accordance with Section 8 of the ASTM E 2600-22 Standard (VES Standard) as part of this Phase I ESA. This included a review of potential vapor encroachment sources through information provided by the Radius Report, historical records, and observations made during our site reconnaissance.

As described by the VES Standard, properties located within the area of concern (AOC) must be taken into consideration when determining the presence of a Vapor Encroachment Condition (VEC). The approximate minimum search distance for the AOC is based upon the type of hazardous substances or petroleum products present. The approximate minimum search distance may be expanded or reduced by the environmental professional conducting the Tier 1 VES based upon experience in the local area and applying professional judgment to factors such as groundwater flow direction, hydrogeological and hydrologic considerations, subsurface geologic features, topographical gradients, and/or manmade features.

The VES Standard indicates that when groundwater flow direction can be estimated or determined, the cross-gradient or down-gradient AOC distances can be significantly reduced. The VES Standard provides the following default AOC distances when considering groundwater flow direction:

- Contaminants of Concern (COCs; i.e., chlorinated VOCs, mercury, etc.): 1,760 feet (1/3 mile); and
- Petroleum hydrocarbons: 528 feet (1/10 mile).

In order to evaluate the presence of a suspect VEC for the subject property, information provided by a Radius Report, a review of historical sources, interview documentation, and knowledge of the history of the subject property and adjoining/surrounding properties must be taken into account when reviewing properties within the AOC.

Consideration of vapor encroachment from a suspect source within the AOC consists of a review of available information and use of professional judgement in determining whether the identified soil or groundwater contamination is suspected to exist within a Critical Distance of the subject property. Per the VES Standard, Critical Distance is defined as the maximum distance at which vapor encroachment may occur. Generally, Critical Distances are 100 feet for COCs and thirty (30) feet for petroleum hydrocarbons.

Based on our review of available information as discussed throughout this report, WCG has identified the following VEC in connection with the subject property:

- REC-1: The likely presence of impacts associated with the current use of the subject property for vehicle storage and upkeep, and apparent associated staining.

- REC-3: The likely presence of impacts associated with the historical presence of four registered USTs with two associated closed LUST incidents.
- REC-4: The likely presence of impacts associated with historical industrial use of the subject property including the use, storage, and alleged dumping of hazardous materials and a potential existing gasoline tank.

A complete assessment under the ASTM E 2600-22 is beyond the scope of this ASTM E 1527-21 Phase I ESA.

## 7.3 Data Gaps

ASTM E 1527-21 defines a data gap as lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information. A significant data gap is defined as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

WCG has not identified a data gap that would be significant in our assessment of recognized environmental conditions in connection with the subject property

## 7.4 Deviations

Limiting conditions and exceptions from ASTM E 1527-21 during this Phase I ESA are described in **Section 1.6** of this report.

The user did not provide WCG with land title records, identify whether environmental liens or AULs exist, or authorize WCG to perform a recorded land title records review for the subject property. As a result, this lack of information could result in a determination that "all appropriate inquiries" was not completed.

In addition, the user did not provide WCG with a copy of the completed User-Questionnaire as part of this Phase I ESA. As a result, this lack of information could result in a determination that "all appropriate inquiries" was not completed.

# 8 CONCLUSIONS

WCG performed this Phase I ESA, in general compliance with the scope and limitations of ASTM E 1527-21. Exceptions to, or deviations from, this practice are described in **Section 1.6** and **Section 7.4** of this report.

Based upon the assessments described in this report, this Phase I ESA has revealed the following recognized environmental conditions in connection with the subject property:

- REC-1: The likely presence of impacts associated with the current use of the subject property for vehicle storage and upkeep, and apparent associated staining.
- REC-2: The known presence of impacts identified during the 2019 Phase II Subsurface Investigation.
- REC-3: The likely presence of impacts associated with the historical presence of four registered USTs with two associated closed LUST incidents.
- REC-4: The likely presence of impacts associated with historical industrial use of the subject property including the use, storage, and alleged dumping of hazardous materials and a potential existing gasoline tank.

In addition, based upon the assessments described in this report, this Phase I ESA has revealed the following de minimis conditions in connection with the subject property:

- The storage of hazardous substances and petroleum products and associated staining within the subject property building.

Based upon the assessments described in this report, this Phase I ESA has revealed no evidence of historical recognized environmental conditions or controlled recognized environmental conditions in connection with the subject property. In addition, no significant data gaps were identified during the assessments conducted for this Phase I ESA.

# 9 ENVIRONMENTAL PROFESSIONAL STATEMENT

"I declare that I have completed this Phase I ESA under the direct supervision of an environmental professional" (see below).

Jeana Burke
Project Engineer

"I, declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312" and

"I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

This Phase I ESA was performed by, or under direct supervision of, the undersigned environmental professional. Resumes are included in **Appendix G - Personnel Qualifications**.

Colin Pannier
Project Manager

Allison Fournier
Senior Project Manager

# APPENDIX A - GLOSSARY OF TERMS

## GLOSSARY OF TERMS

This appendix provides definitions, descriptions of terms, and a list of acronyms for many of the words used in ASTM E 1527-21. These terms are an integral part of ASTM E 1527-21 and are critical to understanding ASTM E 1527-21 and its use.

**Definitions:**

***Abandoned property*** – *Property* that can be presumed to be deserted, or an intent to relinquish possession or control can be inferred from the general disrepair or lack of activity thereon such that a reasonable person could believe that there was an intent on the part of the current *owner* to surrender rights to the *property*.

***Activity and use limitations*** – (*AULs*) Legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil, soil vapor, groundwater, and/or surface water on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or *engineering controls*, are intended to prevent adverse impacts to individuals or populations that may be exposed to *hazardous substances* and *petroleum products* in the soil or ground water on the *property*. See NOTE 1.

NOTE 1 – The term *AULs* is taken from Guide E2091 to include both legal (that is, institutional) and physical (that is, engineering) controls within its scope. Other agencies, organizations, and jurisdictions may define or utilize these terms differently (for example, EPA and California do not include physical controls within their definitions of *"institutional controls."* Department of Defense and International County/City Management Association use "Land Use Controls." The term "land use restrictions" is used but not defined in the *Brownfields Amendments*).

***Actual knowledge*** – Knowledge actually possessed by an individual who is a real person, rather than an entity. *Actual knowledge* is to be distinguished from constructive knowledge that is knowledge imputed to an individual or entity.

***Adjoining properties*** – Any real *property* or *properties* the border of which is contiguous or partially contiguous with that of the *property*, or that would be contiguous or partially contiguous with that of the *property* but for a street, road, or other public thoroughfare separating them.

***Aerial photographs*** – Photographs taken from an aerial platform with sufficient resolution to allow identification of development and activities. See 8.3.4.1 of this practice.

***All Appropriate Inquiries*** – That inquiry constituting *all appropriate inquiries* into the previous ownership and uses of the *subject property* consistent with good commercial and customary practice as defined in CERCLA, 42 U.S.C. §9601(35)(B) and 40 C.F.R. Part 312, that will qualify a party to a *commercial real estate transaction* for one of the threshold criteria for satisfying the *LLPs* to CERCLA liability (42 U.S.C. §9601(35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense. See Appendix X1.

***Approximate Minimum Search Distance*** – The area for which records must be obtained and reviewed pursuant to Section 8 subject to the limitations provided in that section. This may include areas outside the *subject property* and shall be measured from the nearest *subject property* boundary. This term is used in lieu of radius to include irregularly shaped *properties*.

***Bona Fide Prospective Purchaser[42 U.S.C §9607(r)]*** – A person may qualify as a *bona fide prospective purchaser* if, among other requirements, such person made "*all appropriate inquiries* into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices." Knowledge of contamination resulting from *all appropriate inquiries* would not generally preclude this liability protection. A person must make *all appropriate inquiries* on or before the date of purchase. The facility must have been purchased after January 11, 2002. See Appendix X1 for the other necessary requirements that are beyond the scope of this practice.

***Brownfields Amendments*** – Amendments to CERCLA pursuant to the Small Business Liability Relief and Brownfields Revitalization Act, Pub. L. No. 107-118 (2002), 42 U.S.C. §9601 *et seq*.

***Building Department Records*** – Those records of the local government in which the *subject property* is located indicating permission of the local government to construct, alter, or demolish improvements on a *property*. See 8.3.4.7.

***Business Environmental Risk*** – *(BER)* A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of *commercial real estate*, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of *BER* issues may involve addressing one or more non-scope considerations, some of which are identified in Section 13.

***Commercial Real Estate*** – Any real *property* except a *dwelling* or *property* with no more than four *dwelling* units exclusively for residential use (except that a *dwelling* or *property* with no more than four *dwelling* units exclusively for residential use is included in this term when it has a commercial function, as in the building of such *dwellings* for profit). This term includes but is not limited to undeveloped real *property* and real *property* used for industrial, retail, office, agricultural, other commercial, medical or

educational purposes; *property* used for residential purposes that has more than four residential *dwelling* units; and *property* with no more than four *dwelling* units for residential use when it has a commercial function, as in the building of such *dwellings* for profit.

***Commercial Real Estate Transaction*** – A transfer of title to or possession of real *property* or receipt of a security interest in real *property*, except that it does not include transfer of title to or possession of real *property* or the receipt of a security interest in real *property* with respect to an individual *dwelling* or building containing fewer than five *dwelling* units, nor does it include the purchase of a lot or lots to construct a *dwelling* for occupancy by a purchaser, but a *commercial real estate* transaction does include real *property* purchased or leased by persons or entities in the business of building or developing *dwelling* units.

***Construction Debris*** – Concrete, brick, asphalt, and other such building materials discarded in the construction of a building or other improvement to *property*.

***Contaminated Public Wells*** – Public wells used for drinking water that have been designated by a government entity as contaminated by *hazardous substances* (for example, chlorinated *solvents*) or *petroleum products*, or as having water unsafe to drink without treatment.

***Contiguous Property Owner [42 U.S.C. §9607(q)]*** – A person may qualify for the *contiguous property owner liability protection* if, among other requirements, such person owns real *property* that is contiguous to, and that is or may be contaminated by *hazardous substances* from other real *property* that is not owned by that person. Furthermore, such person conducted *all appropriate inquiries* at the time of acquisition of the *subject property* and did not know or have reason to know that the *subject property* was or could be contaminated by a *release* or threatened *release* from the contiguous *property*. The *all appropriate inquiries* must not result in knowledge of contamination. See Appendix X1 for the other necessary requirements that are beyond the scope of this practice.

***Controlled recognized environmental condition*** – *recognized environmental condition* affecting the *subject property* that has been addressed to the satisfaction of the applicable regulatory authority or authorities with *hazardous substances* or *petroleum products* allowed to remain in place subject to implementation of required controls (for example, *activity and use limitations* or *other property use limitations*). A condition considered by the *environmental professional* to be a *controlled recognized environmental condition* shall be listed in the findings section of the *Phase I Environmental Site Assessment report*, and as a *recognized environmental condition* in the conclusions section of the *Phase I Environmental Site Assessment report*.

***Data Failure*** – A failure to achieve the historical research objectives in 8.3.1 even after reviewing the *standard historical sources* in 8.3.4.1 through 8.3.4.8 that are *reasonably ascertainable* and likely to be useful. *Data failure* is one type of *data gap*. See 8.3.6.

***Data Gap*** – A lack of or inability to obtain information required by this practice despite *good faith* efforts by the *environmental professional* to gather such information. *Data gaps* may result from incompleteness in any of the activities required by this practice, including, but not limited to, *site reconnaissance* (for example, an inability to conduct the *site visit*), and *interviews* (for example, an inability to interview the *key site manager*, regulatory officials, etc.). See 12.6.

***De Minimis Condition*** – a condition related to a *release* that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be *de minimis conditions* is not a *recognized environmental condition* nor *controlled recognized environmental condition*.

***Demolition Debris*** – Concrete, brick, asphalt, and other such building materials discarded in the demolition of a building or other improvement to a *property*.

***Drum*** – A container (typically, but not necessarily, holding 55 gal (208 L) of liquid) that may be used to store *hazardous substances* or *petroleum products*.

***Dry Wells*** – Underground areas where soil has been removed and replaced with pea gravel, coarse sand, or large rocks. *Dry wells* are used for drainage, to control storm runoff, for the collection of spilled liquids (intentional and non-intentional), and *wastewater* disposal (often illegal).

***Due Diligence*** – The process of inquiring into the environmental characteristics of *commercial real estate* or other conditions, usually in connection with a *commercial real estate* transaction. The degree and kind of *due diligence* vary for different *properties* and differing purposes. See Appendix X1.

***Dwelling*** – Structure or portion thereof used for residential habitation.

***Engineering controls*** – Physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the *property*. *Engineering controls* are a type of *activity and use limitation* (*AUL*).

***Environment*** – *Environment* shall have the same meaning as the definition of *environment* in CERCLA 42 U.S.C. § 9601(8)). For additional background information, see Legal Appendix (Appendix X1) to X1. 1.1 "Releases and Threatened Release."

***Environmental Compliance Audit*** – The investigative process to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations. This term should not be used to describe this practice, although an *environmental compliance audit* may include an *environmental site assessment* or, if prior audits are available, may be part of an *environmental site assessment*.

***Environmental Lien*** – A charge, security, or encumbrance upon title to a *property* to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of *hazardous substances* or *petroleum products* upon a *property*, including (but not limited to) liens imposed pursuant to CERCLA 42 U.S.C. §§9607(1) & 9607(r) and similar state or local laws.

***Environmental Professional*** – A person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). For the convenience of the reader, this section is reprinted in Appendix X2. The person may be an independent contractor or an employee of the *user*.

***Environmental Site Assessment (ESA)*** – The process by which a person or entity seeks to determine if a particular *subject property* is subject to *recognized environmental conditions*. At the option of the user, an *environmental site assessment* may include more inquiry than that constituting *all appropriate inquiries* or, if the *user* is not concerned about qualifying for the *LLPs*, less inquiry than that constituting *all appropriate inquiries*. An *environmental site assessment* is both different from and often less rigorous than an *environmental compliance audit*.

***ERNS list*** – EPA's emergency response notification system list of reported CERCLA *hazardous substance releases* or spills in quantities greater than the reportable quantity, as maintained at the National Response Center. Notification requirements for such *releases* or spills are codified in 40 CFR Parts 302 and 355.

***Fill Dirt*** – Dirt, soil, sand, or other earth, that is obtained off-site, that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real *property*. It does not include material that is used in limited quantities for normal landscaping activities.

***Fire Insurance Maps*** – Maps originally produced for fire insurance purposes that indicate uses of *properties* at specified dates.

***Good Faith*** – The absence of any intention to seek an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one's obligations in the conduct or transaction concerned.

***Hazardous substance*** – A substance defined as *hazardous substance* pursuant to CERCLA 42 U.S.C. §9601(14), as interpreted by EPA regulations and the courts: "(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any *hazardous waste* having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§6901 *et seq*.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 U.S.C. §7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof, which is not otherwise specifically listed or designated as a *hazardous substance* under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)." (See Appendix X1.)

***Hazardous waste*** – Any *hazardous waste* having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a *hazardous waste*, at 42 U.S.C. §6903, as: "a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may:(A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."

***Hazardous Waste/Contaminated Sites*** – Sites on which a *release* has occurred, or is suspected to have occurred, of any *hazardous substance, hazardous waste*, or *petroleum products*, and that *release* or suspected *release* has been reported to a government entity.

***Historical Recognized Environmental Condition*** – A previous *release of hazardous substances* or *petroleum products* affecting the *subject property* that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the *subject property* to any controls (for example, *activity and use limitations* or other *property use limitations*). A *historical recognized environmental condition* is not a *recognized environmental condition*. A past *release* that qualified as a

*historical recognized environmental condition* may no longer qualify as a *historical recognized environmental condition* if new conditions or information have been identified such as, among other things, a change in regulatory criteria or a subsequently identified *migration* pathway that was not previously known or evaluated.

***IC/EC Registries*** – Databases of *institutional controls* or *engineering controls* that may be maintained by a federal, state or local environmental agency for purposes of tracking sites that may contain residual contamination and *AULs*. The names for these may vary from program to program and state to state, and include terms such as, but not limited to the following: Declaration of Environmental Use Restriction database (Arizona), Land Use Restriction Sites (California Department of Toxic Substances Control), Sites with Deed Restrictions (California State Water Resources Control Board), Environmental Covenant List (Washington), Sites With Environmental Covenants and Use Restrictions (Colorado), Institutional Control Registry (Indiana), Environmental Site Tracking and Research Tool (Missouri), and the Pennsylvania Activity and Use Limitation (PA *AUL*) Registry.

***Innocent Landowner [42 U.S.C. §§9601(35) & 9607(b)(3)]*** – A person may qualify as one of three types of innocent landowners: (1) a person who "did not know and had no reason to know" that contamination existed on the *subject property* at the time the purchaser acquired the *subject property*; (2) a government entity which acquired the *subject property* by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (3) a person who "acquired the facility by inheritance or bequest." To qualify for the *innocent landowner* defense, such person must have made *all appropriate inquiries* on or before the date of purchase. Furthermore, the *all appropriate inquiries* must not have resulted in knowledge of the contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the *innocent landowner defense*. See Appendix X1 for the other necessary requirements that are beyond the scope of this practice.

***Institutional Controls (IC)*** — A legal or administrative restriction (for example, "deed restrictions," restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to *(1)* reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the property, or (*2*) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An *institutional control* is a type of *activity* or *use limitation* (*AUL*).

***Interviews*** – Those portions of this practice that are conducted to gather information from an individual or individuals in person, by telephone, in writing, or via other electronic media to meet the objectives of this practice.

***Key Site Manager*** – The person identified by the *owner* or *operator* of a *subject property* as having good knowledge of the uses and physical characteristics of the *subject property*. See 10.5.1.

***Land Title Records –*** Records that affect the title of real estate, which may include, among other things, deeds, mortgages, leases, land contracts, court orders, easements, liens, and *AULs* recorded within the recording systems or land registration systems created by state statute in every state and ordinarily administered in the local jurisdiction (usually the county) in which the *subject property* is located, and available by performing a title search. Such records are publicly accessible, though the process of performing a title search to find *land title records* often requires specialized expertise or knowledge of the local system (see 5.4 – *AULs* and *Environmental Liens in Land Title Records*). Information about the title to the *subject property* that is filed or stored in any place other than where *land title records* are, by law or custom, recorded for the local jurisdiction in which the *subject property* is located, are not considered *land title records*.

***Landfill*** – A place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term *solid waste disposal site* and is also known as a garbage dump, trash dump, or similar term.

***Landowner Liability Protections (LLPs)*** – A defense to CERCLA available *bona fide prospective purchasers, contiguous property owners*, and *innocent landowners.* See 42 U.S.C. §§9601(35)(A), 9601(40), 9607(b), 9607(q), 9607(r).

***Local Government Agencies*** – Those agencies of municipal or county government having jurisdiction over the *subject property*. Municipal and county government agencies include but are not limited to cities, parishes, townships, and similar entities.

***Local Street Directories*** – Directories published by private or government entities that list the *occupant(s)* if a specific address at the time the *occupant* data where collected, typically within a year of the publication date of the directory.

***Major Occupants*** – Those tenants, subtenants, or other persons or entities each of which uses at least 40% of the leasable area of the *subject property* or any anchor tenant when the *subject property* is a shopping center.

***Material safety data sheet (MSDS)*** – See *safety data sheet.*

***Material threat*** – *Obvious* threat which is likely to lead to a *release* and that, in the opinion of the *environmental professional*, would likely result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a *hazardous substance* and

which shows evidence of damage. The damage would represent a *material threat* if it is deemed serious enough that it may cause or contribute to tank integrity failure with a *release* of contents to the *environment*.

***Migrate/migration*** – For the purposes of this practice, "*migrate*" and "*migration*" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. See NOTE 4.

NOTE 4 –Vapor *migration* in the subsurface is described in Guide E2600; however, nothing in this practice should be construed to require application of the Guide E2600 standard to achieve compliance with *all appropriate inquiries*.

***National Priorities List (NPL)*** – List compiled by the EPA, pursuant to CERCLA 42 U.S.C. §9605(a)(8)(B) of sites with the highest priority for cleanup pursuant to EPA's Hazard Ranking System. See 40 C.F.R. Part 300.

***Obvious*** – That which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer.

***Occupants*** – Those tenants, subtenants, or other persons or entities using the *property* or a portion of the *property*.

***Operator*** – Person responsible for the overall operation of a facility.

***Other historical sources*** – Any source or sources other than those designated in 8.3.4.1 through 8.3.4.8 that are credible to a reasonable person and that identify past uses of the *properties*. See 8.3.4.9.

***Owner*** – Generally the fee *owner* of record for the *property*.

***Petroleum Exclusion*** – The exclusion from CERCLA liability provided in 42 U.S.C. §9601(14), as interpreted by the courts and EPA: "The term (*hazardous substance*) does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a *hazardous substance* under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

***Petroleum products*** – Those substances included within the meaning of the *petroleum exclusion* to CERCLA, 42 U.S.C.§9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a *hazardous substanc*e under Subparagraphs (A) through (F) of 42 U.S.C. §9601(14), natural gas, natural gas liquids, liquefied

natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to *Standard Definitions of Petroleum Statistics*.[1])

***Phase I Environmental Site Assessment*** – The process described in this practice.

***Physical Setting Sources*** – Resources that provide information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of the area that includes the *subject* property. See 8.2.1 of E 1527-21.

***Pits, ponds, or lagoons*** – Manmade or natural depressions in a ground surface that are likely to hold liquids or sludge containing *hazardous substances* or *petroleum products*. The likelihood of such liquids or sludge being present is determined by evidence of factors associated with the pit, pond, or lagoon, including, but not limited to, discolored water, distressed vegetation, or the presence of an *obvious wastewater* discharge.

***Practically Reviewable*** – Information that is *practically reviewable* means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the *subject property* without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the *user* can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the *property* or a geographic area in which the *subject property* is located are not generally *practically reviewable*. Most databases of public records are *practically reviewable* if they can be obtained from the source agency by the county, city, zip code, or other geographic area of the facilities listed in the record system. Records that are sorted, filed, organized, or maintained by the source agency only chronologically are not generally *practically reviewable*. Listings in *publicly available* records which do not have adequate address information to be located geographically are not generally considered *practically reviewable*. For large databases with numerous records (such as RCRA hazardous waste generators and registered *underground storage tanks*), the records are not *practically reviewable* unless they can be obtained from the source agency in the smaller geographic area of zip codes. Even when information is provided by zip code for some large databases, it is common for an unmanageable number of sites to be identified within a given zip code. In these cases, it is not necessary to review the impact of all of the sites that are likely to be listed in any given zip code because that information would not be *practically reviewable*. In other words, when so much data is generated that it cannot be feasibly reviewed for its impact on the *subject property*, it is not *practically reviewable*.

[1] *Standard Definitions of Petroleum Statistics*, American Petroleum Institute, Fourth Edition, 1988.

***Property*** – Real *property,* including buildings and other fixtures and improvements located on and affixed to the land.

***Property Use Limitation –*** Limitation or restriction on current or future use of a *property* in connection with a response to a *release*, in accordance with the applicable regulatory authority or authorities that allows *hazardous substances* or *petroleum products* to remain in place at concentrations exceeding in restricted use criteria.

***Property Tax Files*** – Files kept for *property* tax purposes by the local jurisdiction which include records of past ownership, appraisals, maps, sketches, photographs, or other information.

***Publicly Available*** – Information that is *publicly available* means that the source of the information allows access to the information by anyone upon request.

***RCRA Generators*** – Those persons or entities that generate *hazardous waste*, as defined and regulated by RCRA.

***RCRA Generators List*** – List kept by the EPA of those persons or entities that generate *hazardous wastes* as defined and regulated by RCRA.

***RCRA TSD facilities*** – Those facilities on which treatment, storage, and/or disposal of *hazardous wastes* takes place, as defined and regulated by RCRA.

***RCRA TSD facilities list*** – List kept by the EPA of those facilities at which treatment, storage, and/or disposal of *hazardous wastes* takes place, as defined and regulated by RCRA.

***Reasonable time and cost*** – Information that is obtainable within reasonable time and cost constraints means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is *reasonably ascertainable* if the visit is permitted by the source within 20 days of request.

***Reasonably ascertainable*** – Information that is (1) *publicly available,* (2) obtainable from its source within reasonable time and cost constraints, and (3) *practically reviewable*.

***Recognized Environmental Conditions*** – (1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* or likely *release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* under conditions that pose a *material threat* of a future *release* to the

*environment*. For the purposes of this definition, "likely" is that which is neither certain nor proved, but can be expected or believed by a reasonable observer based on the logic and/or experience of the *environmental professional*, and/or available evidence, as stated in the *report* to support the opinions given therein. *De minimis conditions* are not *recognized environmental conditions*.

***Records review*** – That part that is contained in Section 8 of this practice that addresses which records shall or may be reviewed.

**Release** – A *release* of any *hazardous substance* or *petroleum product* shall have the same meaning as the definition of "release" in CERCLA 42 U.S.C. § 9601(22). There are a number of statutory exclusions from the definition of *release* that may impact the *environmental professional's* opinions and conclusions, such as the normal application of fertilizer. For additional background information, see Legal Appendix (Appendix X1) to X1.1.1 "*Releases* and Threatened *Release*s."

***Report*** – Written *report* prepared by the *environmental professional* and constituting part of a *"Phase I Environmental Site Assessment,"* as required by this practice.

***Safety Data Sheets*** – Written or printed material that is prepared by chemical manufacturers and importers for distributors' and employers' use that provides comprehensive information regarding a hazardous chemical pursuant to OSHA's Hazard Communication Standard (HCS), 29 C.F.R. §1910.1200.

***Significant Data Gap*** – A *data gap* that affects the ability of the *environmental professional* to identify a *recognized environmental condition*. See 12.6.2.

***Site Reconnaissance*** – That part that is contained in Section 9 of this practice and addressed what should be done in connection with the *site visit*. The *site reconnaissance* includes, but is not limited to, the *site visit* done in connection with such a *Phase I Environmental Site Assessment*.

***Site Visit*** – The visit to the *subject property* during which observations are made constituting the *site reconnaissance* section of this practice.

***Solid Waste Disposal Site*** – A place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term *landfill* and is also known as a garbage dump, trash dump, or similar term.

***Solvent*** – A chemical compound that is capable of dissolving another substance and may itself be a *hazardous substance*, used in a number of manufacturing/industrial processes including, but not limited to, the manufacture of paints and coatings for industrial and household purposes, equipment clean-up, and surface degreasing in metal fabricating industries.

***Standard Environmental Record Sources*** – Those records specified in 8.2.2.

***Standard Historical Sources*** – Those resources of information about the history of uses of *properties* specified in 8.3.4.

***Standard Physical Setting Source*** – Recent *USGS 7.5 Minute Topographic Map* (or equivalent) showing contour lines and the area on which the *subject property* is located, and site-specific physical setting information obtained pursuant to agency file review. See 8.2.1.

***Standard practice*** – The activities set forth in this practice.

***Standard sources*** – Sources of environmental, physical setting, or historical records specified in Section 8 of this practice.

***State registered USTs*** – State lists of *underground storage tanks* required to be registered under Subtitle I, Section 9002 of RCRA.

***Subject Property***—The *property* that is the subject of the *environmental site assessment* described in this practice.

***Sump*** – A pit, cistern, cesspool, or similar receptacle where liquids drain, collect, or are stored.

***TSD facility*** – Treatment, storage, or disposal facility (see *RCRA TSD facilities*).

***Underground injection*** – The emplacement or discharge of fluids into the subsurface by means of a well, improved sinkhole, sewage drain hole, subsurface fluid distribution system or other system, or groundwater point source.

***Underground storage tank (UST)*** – Any tank, including underground piping connected to the tank, that is or has been used to contain *hazardous substances* or *petroleum products* and the volume of which is 10% or more beneath the surface of the ground.

***User*** – The party seeking to use Practice E1527 to complete an *environmental site assessment* of the *property*. A user may include, without limitation, a potential purchaser of *subject property*, a potential tenant of *subject property*, an *owner* of the *subject property*, a lender, or a *property* manager. A *user* seeking to qualify for an *LLP* to CERCLA liability, or a *user* that is an EPA Brownfield Assessment and Characterization grantee, has specific responsibilities for completing a successful application of this practice as outlined in Section 6..

***USGS 7.5 Minute Topographic Map***—USGS Topographic Map, including the current US Topo 7.5-Minute Series or the historical 7.5-Minute Topographic Series, which is available from the United States Geologic Survey and showing the *subject property*.

***Visually and/or physically observed*** – During a *site visit* pursuant to this practice, this term means observations made by visual, auditory, or olfactory means while performing the *site reconnaissance*.

***Wastewater*** – Water that *(1)* is or has been used in an industrial or manufacturing process, *(2)* conveys or has conveyed sewage, or *(3)* is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. *Wastewater* does not include water originating on or passing through or adjacent to a site, such as stormwater flows, that has not been used in industrial or manufacturing processes, has not been combined with sewage, or is not directly related to manufacturing, processing, or raw materials storage areas at an industrial plant.

***Zoning/land use records*** – Those records of the local government of areas encompassing the *subject property* indicating the uses permitted by the local government in particular zones within its jurisdiction. The records may consist of maps and/or written records. They are often located in the planning department of a municipality or county. See 8.3.4.8

**Acronyms:**

***AULs*** – Activity and Use Limitations.

***CERCLA***—Comprehensive Environmental Response, Compensation and Liability Act of 1980 (as amended, 42 U.S.C. §§9601 *et seq*.).

***CERCLIS***—Comprehensive Environmental Response, Compensation and Liability Information System (maintained by EPA).

***CFR***—Code of Federal Regulations.

***CORRACTS***—Facilities subject to corrective action under RCRA.

***EPA***—United States Environmental Protection Agency.

***EPCRA***—Emergency Planning and Community Right to Know Act (also known as SARA Title III), 42 U.S.C. §§11001-11050 *et seq*.).

***ERNS***—Emergency response notification system.

***ESA***—Environmental site assessment (different than an *environmental compliance audit,3.2.27*).

***FOIA***—U.S. Freedom of Information Act (5 U.S.C. 552 *et seq*.).

***FR***—Federal Register.

***ICs*** – Institutional Controls.

***LLP*** – Landowner Liability Protections under the Brownfields Amendments.

***LUST***—Leaking Underground Storage Tank.

***MSDS***—Material Safety Data Sheet.

***NCP***—National Contingency Plan.

***NFRAP*** – Former CERCLIS sites where no further remedial action is planned under CERCLA.

***NPDES*** – National Pollutant Discharge Elimination System.

***NPL*** – National Priorities List.

***PCBs*** – Polychlorinated biphenyls.

***PRP*** – Potentially Responsible Party (pursuant to CERCLA 42 U.S.C. §9607(a)).

***RCRA*** – Resource Conservation and Recovery Act (as amended, 42 U.S.C. §§6901 *et seq*.).

***SARA*** – Superfund Amendments and Reauthorization Act of 1986 (amendment to CERCLA).

***TSDF*** – *Hazardous waste* treatment, storage, or disposal facility.

***USC*** – United States Code.

***USGS*** – United States Geological Survey.

***UST*** – Underground Storage Tank.

# APPENDIX B - USER-PROVIDED INFORMATION

# WEAVER CONSULTANTS GROUP
## Environmental Site Assessment Questionnaire

***WCG utilizes the following questionnaire as a tool to facilitate the Environmental Site Assessment (ESA) process. Please answer the following questions to the best of your knowledge. You have been selected to answer this questionnaire because you are (1) a current or past owner of the subject property, (2) a current or past occupant of the subject property, (3) a key site manager with respect to the subject property, or (4) a person that may have specific knowledge regarding current or historical operations at the subject property and adjoining properties. If you do not know an answer, please select "unknown". If possible and if applicable, please provide additional detail in the "Comments" section.***

***WCG requests that the respondent signs the last page of the form which affirms that the respondent has answered all questions to the best of the respondent's actual knowledge and in good faith. WCG would like to take this opportunity to thank you for your time and effort in assisting us with this task.***

**SUBJECT PROPERTY DATA**

Date Completed 12/17/2024

Subject Property Address 4825 West Lawrence Avenue

City Chicago County Cook State Illinois Zip 60630

Subject Property is _____ Vacant Land _____ Improved

Respondent's Name _____ Relationship to the Subject Property _____

Company _____ Title _____

Address _____

City _____ State _____ Zip _____

Phone _____ Fax _____

**1.** **To the best of your knowledge, is the subject property used for an industrial use? If yes, describe the current operations.**

Respondent:

Yes ✓ No _____ Unknown _____

Comments: DWM x Streets and Sanitation + Winter Salt

**2.** **To the best of your knowledge, is any adjoining property used for an industrial use? If yes, describe the current operations.**

Respondent:

Yes _____ No ✓ Unknown _____

Comments: The site is surrounded by railroad track, Lawrence Avenue, Wilson Avenue, and Cicero Ave / I-94. There is no adjacent property

**3.** **To the best of your knowledge, has the subject property been used for an industrial use in the past? If yes, describe the past operations.**

Respondent:

Yes ✓ No _____ Unknown _____

Comments: Lumber yard + Streets and Sanitation Operation. Streets and sanitation has been located there for at least a decade

**4.** **To the best of your knowledge, has any adjoining property been used for an industrial use in the past? If yes, describe the past operations.**

Respondent:

Yes _____ No ✓ Unknown _____

Comments: The property is isolated

**5.** **To the best of your knowledge, is the subject property currently used or has formerly been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?**

Respondent:

Yes ✓ No _____ Unknown _____

Comments: Streets and Sanitation, and lumber yard. There have been vehicles on property such as garbage trucks, which may have leaked/spilled. The lumber yard had buried tanks, with the material unknown. Diesel is speculated

**If yes, please indicate which type of use and time period:** _____

**6.** **To the best of your knowledge, is any adjoining property currently used or has been formerly used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?**

Respondent:

Yes ✓ No _____ Unknown _____

Comments: Streets and Sanitation Operations

**If yes, please indicate which type of use and time period:** _____

## WEAVER CONSULTANTS GROUP
## Environmental Site Assessment Questionnaire

**7.** **To the best of your knowledge, are there currently, or to the best of your knowledge have there been previously, any damaged or discarded batteries, or pesticides, paints, or other chemicals in containers of greater than 5 gal (19L) in volume or 50 gal (190L) in the aggregate, stored on or used at the subject property?**

Respondent:
Yes ✓ No ____ Unknown ____

Comments: Streets and sanitation operations. Waiting for pickup of kerosene storage tanks from property, unknown what Streets and Sanitation Operations used

**8.** **To the best of your knowledge, are there currently, or to the best of your knowledge have there been previously, any drums (typically 55 gal (208L)) or sacks of chemicals located on the subject property?**

Respondent:
Yes ✓ No ____ Unknown ____

Comments: 55 gallon drums of potentially kerosene are being tested, for removal by a different group

**9.** **Did you observe evidence or do you have prior knowledge that fill dirt has been brought onto the subject property? If yes, where did the fill dirt originate?**

Respondent:
Yes ____ No ✓ Unknown ____

Comments:

**10.** **To the best of your knowledge, are there currently, or have there been previously, any pits, ponds, or lagoons located on the subject property?**

Respondent:
Yes ____ No ✓ Unknown ____

Comments:

**11.** **Is there currently, or to the best of your knowledge has there been previously, any stained soil on the subject property?**

Respondent:
Yes ____ No ____ Unknown ✓

Comments:

**12.** **Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (above or underground) located on the subject property?**

Respondent:
Yes ____ No ✓ Unknown ____

Comments:

**13.** **Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways protruding from the ground on the Property or adjacent to any structure located on the subject property?**

Respondent:
Yes ____ No ✓ Unknown ____

Comments:

**14.** **Is there currently, or to the best of your knowledge have there been previously, any evidence of leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the subject property?**

Respondent:
Yes ____ No ✓ Unknown ____

Comments:

**15.** **Is the subject property currently, or to the best of your knowledge has the subject property been previously served by a private well or non-public water system?**

Respondent:
Yes ____ No ✓ Unknown ____

Comments:

**16.** **Is the subject property currently, or to the best of your knowledge has the subject property been previously served by a septic system?**

Respondent:
Yes ____ No ✓ Unknown ____

Comments:

# WEAVER CONSULTANTS GROUP
## Environmental Site Assessment Questionnaire

**17.** **Do you have any knowledge of environmental liens or governmental notifications relating to past or recurrent violations of environmental laws with respect to the subject property or know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the subject property?**

Respondent: Comments:

Yes ____ No ✓ Unknown ____

**18.** **To the best of your knowledge, does the subject property discharge waste water (not including sanitary waste or stormwater) on or adjacent to the subject property and/or into a stormwater or sanitary sewer system?**

Respondent: Comments:

Yes ____ No ✓ Unknown ____

**19.** **To the best of your knowledge, have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the subject property?**

Respondent: Comments:

Yes ____ No ✓ Unknown ____

**20.** **To the best of your knowledge, is there a transformer, capacitor, or any hydraulic equipment on the subject property? If yes, do you have any knowledge of records indicating the presence of PCBs?**

Respondent: Comments:

Yes ____ No ✓ Unknown ____

**21.** **To the best of your knowledge, can you list any and all known past owners of the subject property including time period of ownership and use of the subject property during ownership. Please include any contact information that you may have.**

This property was previously Mayfair Lumber yard before the site was purchased by the City of Chicago within the last 10 years

**22.** **To the best of your knowledge, can you list any and all known past occupants of the subject property including time period of occupancy and use of the subject property during occupancy. Please include any contact information that you may have.**

Mayfair lumber yard until 2021

**23.** **To the best of your knowledge, can you list the structures currently present on the subject property including age, dates of renovations (if any), size and building materials.**

There may be manholes, catch basins, and other structures of that nature

**24.** **To the best of your knowledge, can you list the structures formerly present on the subject property (if any) including age, dates of renovations (if any), size and building materials.**

Lumber yard building, previous structure is unknown

**25.** **To the best of your knowledge, can you list the current providers of the following utilities at the subject property (if applicable): drinking water, sanitary sewer, stormwater run-off, electricity, heat source, and telephone.**

City of Chicago - DWM, ComEd, AT&T, Peoples Gas

## WEAVER CONSULTANTS GROUP
## Environmental Site Assessment Questionnaire

**To the best of your knowledge, do you know if any of the environmental documents noted below exist for the Property:**

- **Prior environmental assessment, investigation, or audit reports (e.g., Phase I/II ESAs, subsurface investigations, remedial action reports, tank removal reports, etc.)**

Respondent:
Yes ____ No ____ Unknown ✓

- **Environmental permits (e.g., stormwater, wastewater, air, water withdrawal, etc.)**

Respondent:
Yes ____ No ____ Unknown ✓

- **Safety Data Sheets (SDS)**

Respondent:
Yes ____ No ____ Unknown ✓

- **The subject property's community right-to-know plan (e.g., Tier II, Form R, etc.)**

Respondent:
Yes ____ No ____ Unknown ✓

- **Spill prevention and other safety/preparedness plans (e.g., SPCC, SWPPP, etc.)**

Respondent:
Yes ____ No ____ Unknown ✓

- **Reports regarding hydrogeologic conditions on the property and/or the surrounding area**

Respondent:
Yes ____ No ____ Unknown ✓

- **Hazardous waste generator notices, manifests, or reports**

Respondent:
Yes ____ No ____ Unknown ✓

- **Geotechnical studies**

Respondent:
Yes ____ No ____ Unknown ✓

TABLE A NOTES:

ALTA/ACSM LAND TITLE SURVEY TABLE A REQUIREMENTS

1. MONUMENTS WILL BE ESTABLISHED AFTER FINAL REVIEW OF THIS SURVEY.
2. THE ADDRESS OF THE SUBJECT PROPERTY IS 4825 W. LAWRENCE AVENUE, CHICAGO, IL.
3. THE FLOOD ZONE CLASSIFICATION OF THE SUBJECT PROPERTY IS ZONE "X" PER F.I.R.M. PANEL 17031C 0403J, PANEL NOT PRINTED
4. THE GROSS LAND AREA OF THE SURVEYED PROPERTY IS 253,606.5 S.F. OR 5.822 ACRES

6(b). THE CURRENT ZONING DISTRICT IS M-1. THE ZONING DISTRICT CRITERIA WAS NOT PROVIDED BY THE INSURER.

7(a). THE EXTERIOR DIMENSIONS OF ALL BUILDINGS AT GROUND LEVEL IS AS SHOWN.

7(b)(1). THE SQUARE FOOTAGE OF THE EXTERIOR FOOTPRINT OF EACH BUILDING IS SHOWN INSIDE EACH BUILDING.

8. SUBSTANTIAL FEATURES OBSERVED IN THE PROCESS OF THIS SURVEY ARE AS SHOWN.
9. THERE ARE NO STRIPED PARKING AREAS.

11(a). ALL OBSERVED EVIDENCE OF UTILITIES ARE AS SHOWN.

13. NAMES OF ADJOINING OWNERS ARE AS SHOWN.
14. THE DISTANCE TO THE NEAREST INTERSECTING STREET IS AS SHOWN.
16. THERE WAS NO EVIDENCE OF CURRENT EARTH MOVING WORK, BUILDING CONSTRUCTION OR BUILDING ADDITIONS.
17. THERE WAS NO INFORMATION OF PROPOSED CHANGES IN STREET RIGHT OF WAY LINES OR OBSERVED EVIDENCE OF RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIRS.
18. THERE WAS NO EVIDENCE THAT THE SITE WAS USED AS A SOLID WASTE DUMP, SUMP OR SANITARY LANDFILL.

20(a). THERE WAS NO INFORMATION PROVIDED TO THE SURVEYOR REGARDING OFFSITE EASEMENTS OR SERVITUDES BENEFITTING THE SUBJECT PROPERTY.

21. PROFESSIONAL LIABILITY INSURANCE IN THE AMOUNT OF $2,000,000 IS IN EFFECT.

**Mayfair Lumber Site**
**4825 W. Lawrence Avenue**
**Chicago, Illinois**
**August Mack Project Number: JT2361.719.0001**

Dear Mr. Asaro & Ms. Huffman:

August Mack Environmental, Inc., (August Mack) has completed the Phase I Environmental Site Assessment (Phase I ESA) for the above-referenced Site. The final report was prepared in accordance with the Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E-1527-13) issued by the American Society for Testing and Materials. This Phase I ESA is valid for a period of 365 days from November 20, 2019. After 180 days from this date and prior to using the information contained herein, components of the report are required to be updated in accordance with the ASTM standards and federal regulations. We trust that this submittal is responsive to your needs. Please contact us if you have any questions or comments regarding this submittal, or if we can be of additional service to you.

Sincerely,

Josh Spence

ENVIRONMENTAL

FILED DATE: 2/3/2020 9:37 PM 2014L050629

**distance of the former tank in relation to the Site, and the lack of reported releases or violations, it is the opinion of the EP that this finding does not constitute a REC.**

- NEM Lamon LLC/Fixture Hardware Co./Verizon Wireless at 4701-4711 N. Lamon Avenue (adjoining west) was listed on the SRP, Inst Control, Eng Controls, UST, and AST databases. A 2019 FSIR was completed for this facility following its enrollment in the SRP to investigate potential impacts from former USTs and unknown manufacturing activities. The report indicated that soil and groundwater impacts by PNAs were limited to the southern portion of the building, over 140-feet west of the Site. Groundwater flow on this property was determined to be to the west at a depth of approximately 16-feet bg. An NFR was issued in August 2019 with continuing obligations related to the maintenance of the existing slab on grade floor, and the restriction of any future buildings to be of slab on grade construction. **Given the NFR status, the direction of groundwater flow on this property away from the Site, and the distance of remaining contaminants in relation to the Site, it is the opinion of the EP that this finding does not constitute a REC.**

- Historical sources revealed a tooling manufacturer known as Ostrom Tool Co. at 4848 W. Lawrence Avenue (adjoining north) from at least 1957 to 2005. No regulatory database listings were identified for this property. **Given the lack of regulatory database listings and the cross-gradient location across W. Lawrence Avenue, it is the opinion of the EP that this finding does not constitute a REC.**

### 7.2 Data Gaps

The following data gap was identified during this assessment:

- At the time of the Site inspection, the northern office building, the main lumber building, and the southernmost lumber storage building were locked and inaccessible by August Mack. The disposition and nature of a possible fuel oil storage tank associated with the northern office building and presence of any additional petroleum products and/or hazardous substances that may be stored within the buildings could not be confirmed.

### 7.3 Conclusions

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of the identified Study Site. Any exceptions to, or deletions from, this practice are described in Section 2.5 of this report. ***This assessment has revealed no evidence of RECs in connection with the Study Site except for the following:***

FILED DATE: 2/3/2020 9:37 PM 2014L050629

- ***The unknown disposition of up to four (4) historical USTs, as well as the elevated concentrations of benzene and benzo(a)pyrene in soil samples collected from both known excavations.***
- ***The long-term use of the Site for treating and storing lumber, and the presence of the rail spur on the eastern portion since at least 1938.***
- ***The significant data gap associated with the inaccessibility of multiple Site buildings and the unknown disposition of a possible fuel oil storage tank associated with the northern office building.***

**Re: Phase II Subsurface Investigation, Cost Model**
**Mayfair Lumber Site**
**4825 West Lawrence Avenue**
**Chicago, Illinois 60630**
**August Mack Project Number JT2361.719.0002**

Dear Mr. Asaro & Ms. Huffman:

August Mack Environmental, Inc. (August Mack) has completed subsurface investigation activities at the above-referenced Site. During a recent Phase I Environmental Site Assessment (ESA) performed by August Mack (Project JT2361.719.0001), the following recognized environmental conditions (RECs) were identified:

- *The unknown disposition of up to four (4) historical USTs on the Site, as well as the elevated concentrations of benzene and benzo(a)pyrene in soil samples collected from both known tank excavations.*
- *The long-term use of the Site for treating and storing lumber, and the presence of the rail spur on the eastern portion since at least 1938.*
- *The significant data gap associated with the inaccessibility of multiple Site buildings and the unknown disposition of a possible fuel oil storage tank associated with the northern office building*

The purpose of this investigation is to determine if subsurface conditions on the subject Site have been impacted by these RECs. This report includes a description of the scope of work, a summary of field activities, sampling procedures, laboratory analytical results, and conclusions. Additionally, cost modeling was completed to evaluate the data available from the Site Phase I and Phase II investigations to estimate what actions and associated costs would likely need to be completed to address liabilities related to historic fuel ASTs and USTs, as well as potential impacts to future residents from vapor intrusion.

**EXHIBIT H**

FILED DATE: 2/3/2020 9:37 PM 2014L050629

This report was prepared at the request of Mr. Lenny Asaro of Dinsmore & Shohl, LLP and Ms. Charlotte M. Huffman of Neal & Leroy, LLC. Reliance on the information and conclusions presented in this report by any other party(ies) is not authorized by August Mack.

## PHASE II SUBSURFACE INVESTIGATION

### Investigation Locations

August Mack mobilized to the Site on November 27, 2019, to perform subsurface investigation activities. Prior to boring, ground penetrating radar (GPR), electromagnetic (EM) locating, and other utility locating tools were utilized to clear the boring locations and survey within the area of historical USTs, suspect fill ports, and proposed boring footprints to evaluate the presence of underground storage tanks, disturbed soils, and/or cavities.

A total of seven (7) soil borings (SB-1 through SB-7) were advanced on-Site using a Geoprobe® direct push dual-tube sampling system for the purpose of collecting soil and groundwater samples. Information regarding soil boring locations is provided below, and boring locations are depicted on **Figure 1**.

The locations of the soil borings are described as follows:

- SB-1: Located along the western exterior of the northern lumber storage building, near two (2) historical underground storage tanks (USTs);
- SB-2: Located along the northeastern exterior of the northern lumber storage building near a historical UST and rail spur;
- SB-3: Located along the southern exterior of the north office building, near a suspect fuel oil fill port and tank vent;
- SB-4: Located along the eastern side of the Site, near rail spurs and historical lumber storage;
- SB-5: Located in the southern portion of the Site, near rail spurs and historical lumber storage;
- SB-6: Located along the eastern exterior of the southern lumber storage building;
- SB-7: Located in the central portion of the Site, near a historical lumber storage area.

### Soil and Groundwater Sampling Methodology

Two (2) soil borings (SB-1 and SB-2) were advanced to a depth of 20-feet below grade (ft bg), two (2) soil borings (SB-4 and SB-5) were advanced to a depth of 16 ft bg due to encountering apparent groundwater, and three (3) soil borings (SB-3, SB-6, and SB-7) were advanced between 18.5 and 19 ft bg due to probe refusal. The purpose of the borings was to field screen soils, determine geologic conditions, and collect soil and groundwater samples for laboratory analysis. All soil sample intervals were inspected in the field for

FILED DATE: 2/3/2020 9:37 PM 2014L050629

odors and staining, and field screened using a photoionization detector (PID). Field screening results and soil lithological information are provided on soil boring logs included as **Attachment A**.

Two (2) soil sample intervals from SB-1 through SB-7 were selected for laboratory analysis based on field observations and PID screening results. These soil samples were collected in each boring from the unsaturated intervals with the highest PID screening results. The soil samples were submitted to Pace Analytical Services, LLC (Pace) located in Schaumburg, Illinois, for volatile organic compounds (VOCs), Semi-Volatile Organic Compounds (SVOCs) including Polynuclear Aromatic Hydrocarbons (PAHs), Resource Conservation and Recovery Act (RCRA) 8 Metals (arsenic, barium, cadmium, chromium, lead, mercury, selenium, silver), and total corrosivity (pH) analysis.

Two (2) borings (SB-4 and SB-5) were converted into temporary, 1-inch diameter PVC monitoring wells for collection of groundwater samples; however, after one hour, SB-4 did not produce a sufficient amount of groundwater for sampling. The groundwater sample collected from SB-5 (SB-5-GW-6-16) was submitted to Pace for laboratory analysis of VOCs, SVOCs/PAHs, and RCRA Metals.

August Mack field procedures for direct push soil and groundwater sampling are provided in **Attachment B**.

**Field Observations**

Inspection of collected soil samples revealed that the subsurface geology consists primarily of silty clay and clay to depths of at least 20 ft bg (maximum depth explored). In addition, a layer of sandy gravel was encountered in SB-2 from 2.75 to 4 ft bg, in SB-5 from 3 to 7 ft bg, and in SB-7 from 4.25 to 7.75 ft bg. A layer of gravely sand was encountered in SB-6 from 0.75 to 4 ft bg.

Field observations and PID measurements collected from the soil borings revealed evidence of elevated PID readings. Readings ranged from 0.0 to 9.9 parts per million (ppm) in SB-1, 10.6 to 34.9 ppm in SB-2, 1.9 to 21.4 ppm in SB-3, 14.6 to 42.9 ppm in SB-4, 2.5 to 95.3 ppm in SB-5, 8.0 to 174.5 ppm in SB-6, and 0.9 to 360 ppm in SB-7.

Moist to saturated conditions were encountered in silty clay and sandy gravel layers at depths of 7 ft bg in SB-5 and 10 ft bg in SB-4. After development, the depth to groundwater was measured in SB-5 at 3.60 ft bg. It should be noted that SB-5 was in close proximity to an area of standing water that was pooled via a drainage pathway from the surrounding area. The infiltration of this surface water to the subsurface likely created perched groundwater conditions, from which the sample was collected.

The results of the geophysical survey concluded that an anomaly consistent with that of a possible UST pit, previous excavation, change in soil type, or other subsurface feature

FILED DATE: 2/3/2020 9:37 PM 2014L050629

was identified in the scanned area along the eastern exterior of the main lumber storage building (near SB-1). No anomalies were identified in the scanned area surrounding SB-2 and SB-3. A copy of the geophysical survey is included in **Attachment C.**

**Soil Analytical Results**

The soil analytical results were compared to the Title 35 of Illinois Administrative Code, Part 742 Tiered Approach to Corrective Action Objectives (TACO) Background Soil for Chicago Area (BSCA)[1] and Tier 1 Soil Remediation Objectives (ROs) for Industrial/Commercial Properties[2]. The laboratory analysis revealed the following results:

*VOCs:*

- Ethylbenzene was identified at a concentration above its laboratory reporting limit (LRL) in SB-1(6-8′), but below the applicable ROs.

*PAHs:*

- The laboratory analysis identified multiple PAH constituents at concentrations above their LRLs for SB-2(1-3′), SB-3(18-20′), and SB-5(1-3′), but below the applicable ROs.

*SVOC:*

- The laboratory analysis identified bis(2-Ethylhexyl)phthalate above the LRLs for SB-3(18-20′), but below the applicable ROs.

*Metals:*

- Arsenic was identified at a concentration above the BSCA level but below its respective RO in SB-4(14-16′).
- Barium was identified at concentrations exceeding LRLs for all seven (7) boring locations, and above the BSCA level but below its respective RO in SB-1(6-8′) and SB-2(1-3′).
- Cadmium was identified at concentrations above the BSCA level but below its respective RO in SB-1(18-20′), SB-4(1-3′), and SB-5(1-3′).
- Total chromium was identified at concentrations above the BSCA level but below its respective RO[3] in SB-2(1-3′) and SB-4(14-16′), and exceeding the RO for Soil

[1] **Section 742 Appendix A, Table G**: Concentrations of Inorganic Chemicals in Background Soils; **Table H**: Concentrations of Polynuclear Aromatic Hydrocarbon Chemicals in Background Soils

[2] **Section 742 Appendix B, Table B**: Tier 1 Soil Remediation Objectives for Industrial/Commercial Properties; **Table C**: pH Specific Soil Remediation Objectives for Inorganics and Ionizing Organics for the Soil Component of the Groundwater Ingestion Route (Class I Groundwater); **Table D**: pH Specific Soil Remediation Objectives for Inorganics and Ionizing Organics for the Soil Component of the Groundwater Ingestion Route (Class II Groundwater)

[3] Soil component of the Class I Groundwater ROs for chromium is based on hexavalent chromium toxicity as total chromium toxicity is not established.

FILED DATE: 2/3/2020 9:37 PM 2014L050629

Component of the Groundwater Ingestion Route (Class I Groundwater) for SB-1(6-8'), SB-1(18-20'), SB-2(18-20'), SB-3(8-10'), SB-3(18-20'), and SB-4(1-3').

- Lead was identified at concentrations exceeding LRLs for all seven (7) boring locations, and above the BSCA level but below its respective RO in SB-2(1-3'), and exceeding both the BSCA and RO for the Soil Component of the Groundwater Ingestion Route (Class I Groundwater) in SB-4(1-3').
- Mercury was identified at concentrations exceeding LRLs in SB-2(1-3'), SB-4(1-3'), SB-4(14-16'), SB-5(1-3'), and SB-7(6-8'), and above the BSCA level for SB-2(1-3'), SB-4(1-3'), and SB-5(1-3'), but below the applicable ROs.
- Selenium and silver were not detected at concentrations exceeding LRLs in any of the soil samples.

*pH (total corrosivity):*

- pH ranged from 8.26 to 8.54 at SB-1, 8.28 to 9.37 at SB-2, 8.17 to 8.46 at SB-3, 7.65 to 7.79 at SB-4, 7.72 to 7.94 at SB-5, 7.80 to 7.88 at SB-6, and 7.76 to 7.97 at SB-7.

Soil analytical results are summarized in **Table 1** and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment D**.

**Groundwater Analytical Results**

The groundwater analytical results were compared to the TACO ROs for Class I (Potable) and Class II (Non-Potable) Groundwater[4], and Minimum Groundwater Component of Indoor Air ROs[5]. The laboratory analysis revealed the following results for SB-5-GW-6-16:

*VOCs:*

- The laboratory analysis did not identify VOC constituents at concentrations above the LRLs, which are below the applicable ROs.

*PAHs:*

- Benzo(b)fluoranthene, benzo(g,h,i)perylene, benzo(k)fluoranthene, chrysene, fluoranthene, and pyrene were detected at concentrations above the LRLs but below the applicable Class I and Class II Groundwater ROs.
- Benzo(g,h,i)perylene was detected at a concentration above the LRLs; however, a RO for this constituent is not established.

*SVOCs:*

- The laboratory analysis did not identify SVOC constituents at concentrations above the LRLs, which are below the applicable ROs.

[4] **Section 742 Appendix B, Table E:** Tier 1 Groundwater Remediation Objectives for the Groundwater Component of the Groundwater Ingestion Route

[5] **Section 742 Appendix B, Table H:** Tier 1 Soil Gas and Groundwater Remediation Objectives for the Indoor Inhalation Exposure Route – Diffusion and Advection

FILED DATE: 2/3/2020 9:37 PM 2014L050629

*Metals:*

- The laboratory analysis identified concentrations of barium and selenium above the LRLs, but below the applicable ROs.
- Arsenic, total chromium, and mercury were detected at concentrations above ROs for Class I Groundwater, but below the ROs for Class II Groundwater.
- Lead was detected at concentrations above the Class I and Class II Groundwater ROs.
- Cadmium and silver were not detected at concentrations exceeding LRLs in any of the soil samples.

Groundwater analytical results are summarized in **Table 2** and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment D**.

## PHASE II SUMMARY AND CONCLUSION

August Mack has completed a Phase II Subsurface Investigation at 4825 West Lawrence Avenue in Chicago, Illinois. A total of seven (7) soil borings (SB-1 through SB-7) were advanced on-Site to determine if subsurface conditions at the Site have been impacted by the RECs identified during the previous Phase I ESA. The results of the geophysical survey concluded that an anomaly consistent with that of a possible UST pit, previous excavation, change in soil type, or unknown anomaly was identified in the scanned area located east of the northern lumber storage building. During field screening activities, evidence of elevated PID readings were encountered in the seven (7) borings. Two (2) soil samples were collected from each borehole, and one (1) groundwater samples was collected from SB-5.

Laboratory analysis of soil samples revealed no VOC or SVOC constituents detected at concentrations above their respective ROs. Several metals were detected at concentrations exceeding LRLs or the BSCA at each borehole location. Of the detected metals, chromium was present in the soil at concentrations exceeding the RO for the Soil Component of the Groundwater Ingestion Route (Class I Groundwater) at all borehole locations. Lead was also detected in soil at concentrations exceeding the RO for the Soil Component of the Groundwater Ingestion Route (Class I Groundwater) in a shallow sample collected from SB-4; however, the concentration was below the Soil Component of the Groundwater Ingestion Route (Class II Groundwater). Arsenic, total chromium, lead, and mercury were detected in the groundwater sample at concentrations exceeding their respective ROs for Class I Groundwater; however, only lead was detected at a concentration that also exceeded the RO for Class II Groundwater. Although the groundwater results show various metals at concentrations exceeding the Class I criteria, it is noted that the groundwater is not considered potable water per Section 620.210 of Title 35 of the Illinois Administrative Code.

FILED DATE: 2/3/2020 9:37 PM 2014L050629

On December 18, 2019, August Mack was provided with a completed owner questionnaire and environmental reports detailing the removal and closure of the two (2) USTs (depicted in orange on the attached figure) that were not targeted for investigation during the Phase II. No Further Remediation (NFR) status was awarded by the Illinois EPA for these USTs, and no land use restrictions were recorded. The owner also indicated that three ASTs are or were in place within the northern, central, and southwestern buildings. August Mack was not granted interior access to these buildings; therefore, the condition of the tanks is unknown. The possibility of significant leaks/spills from these ASTs cannot be ruled out. The completed owner questionnaire and prior environmental reports are included in August Mack's Phase I ESA, which is provided under a separate cover.

Based on the above, data gaps were identified during our analysis of the site and will require further site investigation. August Mack may also recommend additional sampling from any areas that will be excavated during redevelopment. Soil sample analysis from these areas in advance of development may assist in the appropriate and cost-effective disposal of these soils.

## COST MODEL

### Objective of Cost Model

The objective of this cost modeling was to evaluate the data available from the Site Phase I and Phase II investigations to estimate what actions, and their associated costs, would likely need to be completed to address liabilities related to historic fuel ASTs and USTs, as well as potential impacts to future residents from vapor intrusion. This was accomplished by first identifying potential future activities and their costs, then assigning probability values to the likelihood of those activities needing to be performed and assigning probabilities to the potential range of costs for each activity. This group of assumptions and probabilities was then evaluated with Monte-Carlo analysis to determine the probable total cost to bring this site to regulatory closure, within the given range of certainty.

### Model Assumptions

Like all numerical models, this cost model makes a number of broad assumptions which must be taken into account when interpreting the results. A partial list of the major model assumptions include the following:

1. The regulatory environment will remain unchanged into the future. We assume that the regulations governing environmental investigation and remediation, and the associated clean-up levels, will remain as they are today.
2. That responsible parties will take prudent action. We assume that remediation will proceed in a timely fashion to avoid the spread of contamination and creation of a wider area of impact, with subsequent additional exposure pathways or a longer term of remediation and associated monitoring.

FILED DATE: 2/3/2020 9:37 PM 2014L050629

3. That costs will remain unchanged into the future. This simplifying assumption ignores the future cost of money for the purposes of this model. This is a minor issue for most activities, since they are anticipated to occur in the next few years, but may skew predictions of longer term costs if they extend over decades.
4. That technology or state-of-the-art will remain unchanged. We assume that the technologies available for remediation and monitoring will be those available in the future and we do not account for technological improvements.

**Monte-Carlo Theory**[6]

Monte Carlo simulation is a computerized mathematical technique that allows people to account for risk in quantitative analysis and decision making. The technique is used by professionals in such widely disparate fields as finance, project management, energy, manufacturing, engineering, research and development, insurance, oil & gas, transportation, and the environment.

Monte Carlo simulation furnishes the decision-maker with a range of possible outcomes and the probabilities they will occur for any choice of action. The technique was first used by scientists working on the atom bomb; it was named for Monte Carlo, the Monaco resort town renowned for its casinos. Since its introduction in World War II, Monte Carlo simulation has been used to model a variety of physical and conceptual systems.

Monte Carlo simulation performs risk analysis by building models of possible results by substituting a range of values—a probability distribution—for any factor that has inherent uncertainty. It then calculates results over and over, each time using a different set of random values from the probability functions. Depending upon the number of uncertainties and the ranges specified for them, a Monte Carlo simulation could involve thousands or tens of thousands of recalculations before it is complete. Monte Carlo simulation produces distributions of possible outcome values.

By using probability distributions, variables can have different probabilities of different outcomes occurring. Probability distributions are a much more realistic way of describing uncertainty in variables of a risk analysis.

**Model Variables**

The variables defined for this model included what we believed to be the likely steps which may have to be taken to delineate the extent of groundwater and vapor intrusion impacts as well as potential remediation and long-term monitoring costs. The details of the variables are described in the model input spreadsheet presented in **Attachment E**. The variable categories are summarized below:

1. Additional Investigation
    a. Data gaps remain after completion of the initial Phase II investigation
    b. Proposed additional work includes soil borings and soil gas samples
    c. Projection of future costs based on findings of the subsurface investigation
2. UST Excavation and Disposal

[6] Adapted from: Palisade. 2018. https://www.palisade.com/risk/monte_carlo_simulation.asp

FILED DATE: 2/3/2020 9:37 PM 2014L050629

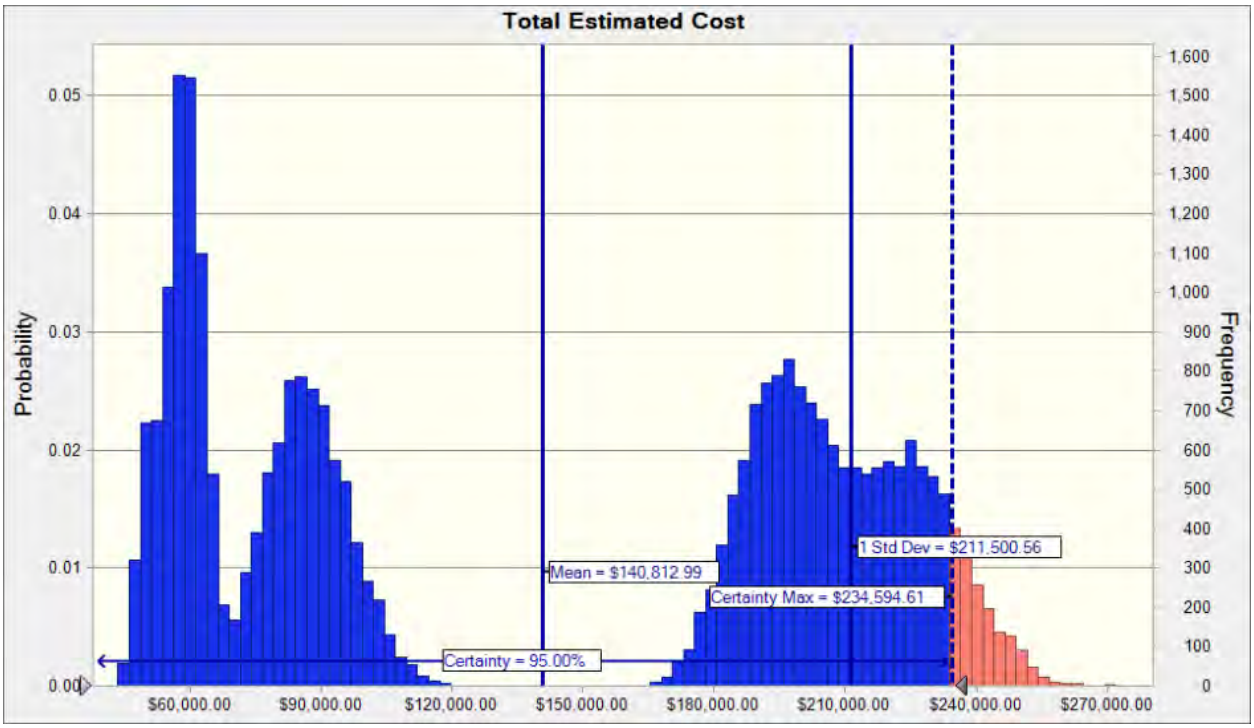
a. Potential for discovery of up to four USTs at the Site during redevelopment activities
b. Excavation and disposal of USTs and contents
c. Excavation of up to 500 tons of fuel-impacted soils

3. AST Removal and Disposal
    a. Potential for discovery of up to three ASTs at the Site during redevelopment activities
    b. Removal and disposal of ASTs and contents
    c. Excavation of up to 100 tons of fuel-impacted soils
4. Vapor Intrusion Mitigation of Future Residential Development
    a. Assumption of 38 new residential structures on the Site, each with footprint of approximately 1,350 $ft^2$
    b. Passive mitigation systems to be installed if needed
    c. Assumption that either all of none of the structures will require vapor mitigation systems
    d. Assumption that systems will be installed at the time of construction
5. Project Management and Reporting
    a. Addressing environmental issues at the Site will require interactions with State regulatory agencies and reporting
    b. Costs for management of field activities, reporting and regulatory interaction.

**Model Results**

The modeled variables, as presented in Attachment A, were run for 30,000 iterations and produce the following probability graph for Total Cost:

FILED DATE: 2/3/2020 9:37 PM 2014L050629



This chart indicates 95% confidence, given the available information and variables considered, that the future site liabilities associated with fuel tanks and vapor intrusion will have a total cost less than $235,000, with a mean projected cost of approximately $141,000. The basic statistics for this analysis are presented below:

| **Statistics:** | **Forecast values** |
|---|---|
| Trials | 30,000 |
| Mean | $140,812.99 |
| Median | $171,731.17 |
| Standard Deviation | $70,687.57 |
| Minimum | $43,521.56 |
| Maximum | $274,428.70 |
| Range Width | $230,907.14 |

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

**EDR RECOVERED GOVERNMENT ARCHIVES**

***Exclusive Recovered Govt. Archives***

RGA HWS ---- Recovered Government Archive State Hazardous Waste Facilities List
RGA LF ---- Recovered Government Archive Solid Waste Facilities List

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1

CORRACTS site within approximately 1 mile of the target property.

| Lower Elevation | Address | Direction / Distance | Map ID | Page |
|---|---|---|---|---|
| ***AMERDEC INC*** | ***4425 W MONTROSE AVE*** | ***SE 1/2 - 1 (0.520 mi.)*** | ***167*** | ***324*** |
| EPA ID:: ILD005167077 | | | | |

***Lists of Federal RCRA generators***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |
|---|---|---|---|---|

| EPA ID:: ILR000211490 | | | | |

***Lists of state and tribal leaking storage tanks***

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Illinois Environmental Protection Agency's LUST Incident Report.

A review of the LUST list, as provided by EDR, and dated 07/15/2024 has revealed that there are 33 LUST sites within approximately 0.5 miles of the target property.

LUST TRUST: In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

A review of the LUST TRUST list, as provided by EDR, and dated 06/06/2016 has revealed that there are 2 LUST TRUST sites within approximately 0.5 miles of the target property.

***Local Lists of Registered Storage Tanks***

TANKS: This dataset contains Aboveground Storage Tank (AST) and Underground Storage Tank (UST) information from the Department of Public Healtha??s (CDPH) Tank Asset Database. The Tank Asset Database contains tank information from CDPH AST and UST permit applications as well as UST records imported from the

historic Department of Environment (DOE) database. This dataset also includes AST records from the historic DOE and pre-1992 UST records from the Building Department.

A review of the TANKS list, as provided by EDR, and dated 08/21/2024 has revealed that there are 40 TANKS sites within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

***Records of Emergency Release Reports***

COMPLAINTS: Environmental complaints received by the Department of Environment (DOE) from January 1993 to December 31, 2011 and by the Department of Public Health (CDPH) since January 1, 2012. On January 1, 2012, the DOE was disbanded and all its inspection, permitting, and enforcement authorities were transferred to the CDPH.

A review of the COMPLAINTS list, as provided by EDR, and dated 08/21/2024 has revealed that there are 3 COMPLAINTS sites within approximately 0.001 miles of the target property.

***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

EPA ID:: ILD005183348

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 31 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

# EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 8 UST FINDER sites within approximately 0.25 miles of the target property.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |
|---|---|---|---|---|
| PEOPLES GAS AND LIGH | 3955 NORTH KILPATRIC | SSE 1/2 - 1 (0.847 mi.) | 168 | 328 |

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist

Inspection Name: MAYFAIR LUMBER CO.
Inspection Category: MISCELLANEOUS INSPECTION
Inspection Sub-Category: A8
Inspector: 9
Inspection Date: 05/08/2009
Narrative: THIS IS A TIER II INSPECTION. I MET WITH THE PROPERTY/BUSINESS OWNER, MR. CHIP KOENEN AND HE PROVIDED ME WITH HIS TIER II REPORT FOR REVIEW WHICH WAS IN ORDER AT THE TIME. HOWEVER, I OBSERVED A 1,000 GALLON DIESEL FUEL AST ON SITE WHICH WAS NOT PERMITTED BY US (DOE), CONSEQUENTLY, I MADE A REFERRAL TO OUR UST SECTION. MR. KOENEN INDICATED THE TANK IS UTILIZED TO FUEL THEIR FORKLIFTS ON SITE.

Inspection Category: TANK INSPECTIONS
Inspection Sub-Category: Not reported
Inspector: 43
Inspection Date: 05/11/2009
Narrative: AFTER I ARRIVED AT THIS MAYFAIR LUMBER YARD , I SPOKE TO THEIR PRESIDENT CHARLES KOENEN ( 773 / 283 - 3300 ) ABOUT THEIR 1,000 GALLON DIESEL AST. HE SAID THE TANK WAS NEVER GIVEN A PERMIT , SO I TOLD HIM TO APPLY FOR ONE WITH OUR DEPARTMENT. I WROTE HIM A CITATION FOR ILLEGAL AST. ( SEE ATTACHED DOCUMENT ).

**(Continued)** **S117504954**

Inspection Date: 05/11/2009
Narrative: AFTER I ARRIVED AT THIS MAYFAIR LUMBER CO, I MET WITH PRESIDENT CHARLES KOENEN (773 283-3300). HE SHOWED ME THE AREA WHERE A 1,000 GALLON DIESEL AST WAS BEING USED. I ASKED HIM IF A LEGAL PERMIT FOR INSTALLATION WAS EVER GIVEN TO THIS TANK. HE SAID NO PERMIT WAS EVER APPLIED FOR TANK WAS DELIVERED MANY YEARS AGO BY OIL COMPANY. I CHECKED OVER THE TANK, IT DID NOT APPEAR TO BE ELECTRICALLY GROUNDED. I TOLD MR. KOENAN HE MUST HIRED A LICENSED TANK CONTRACTOR, WHO MUST OBTAIN A PERMIT FROM OUR OFFICE AND RETRO-FIT THE TANK TO MEET CITY CODES (FOR ABOVE GROUND PETROLEUM TANKS). I ISSUED HIM CITY CITATION (E000010081 12), FOR ILLEGAL AST INSTALLATION. MR. KOENEN MUST APPEAR IN COURT REGARDING THIS MATTER ON 6/25/2009 AT 1 PM. (SEE ATTACHED DRAWING AND PHOTO'S).

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

| Inspector: | 417325 |
| Inspection Date: | 10/05/2023 |
| Narrative: | On October 5, 2023, Chicago Department of Public Health (CDPH) Senior Environmental Inspector Barnes responded to a noise complaint at 4931 |

**(Continued)** **S131589705**

W. Lawrence Ave.  Inspector Barnes arrived at 9:55AM to survey the location (Photos A, B, & C).An anonymous complaint filed with the City of Chicago?s 311 system stated loud noises were emanating in the area of the above listed address.  During the survey, Inspector Barnes did not observe the sound or detect a potential source for the sound at the center of the complaint.  Additionally, Inspector Barnes did observe extensive noise resulting from adjacent vehicle / CTA traffic in the area.  Informational noise meter readings taken of the surrounding ambient sounds were greatly impacted by the adjacent noise.Due to the complainant not leaving any contact information with their complaint, no additional follow up could be conducted.  CDPH determined no citations were required.

Inspection Log: [INSPECTION LOG #: 20666101 05-OCT-23 10:10:00] ON OCTOBER 5, 2023, CHICAGO DEPARTMENT OF PUBLIC HEALTH (CDPH) SENIOR ENVIRONMENTAL INSPECTOR BARNES RESPONDED TO A NOISE COMPLAINT AT 4931 W. LAWRENCE AVE. INSPECTOR BARNES ARRIVED AT 9:55AM TO SURVEY THE LOCATION (PHOTOS A, B, C).AN ANONYMOUS COMPLAINT FILED WITH THE CITY OF CHICAGO?S 311 SYSTEM STATED LOUD NOISES WERE EMANATING IN THE AREA OF THE ABOVE LISTED ADDRESS.DURING THE SURVEY, INSPECTOR BARNES DID NOT OBSERVE THE SOUND OR DETECT A POTENTIAL SOURCE FOR THE SOUND AT THE CENTER OF THE COMPLAINT. ADDITIONALLY, INSPECTOR BARNES DID OBSERVE EXTENSIVE NOISE RESULTING FROM ADJACENT VEHICLE / CTA TRAFFIC IN THE AREA. INFORMATIONAL NOISE METER READINGS TAKEN OF THE SURROUNDING AMBIENT SOUNDS WERE GREATLY IMPACTED BY THE ADJACENT NOISE.DUE TO THE COMPLAINANT NOT LEAVING ANY CONTACT INFORMATION WITH THEIR COMPLAINT, NO ADDITIONAL FOLLOW UP COULD BE CONDUCTED. CDPH DETERMINED NO CITATIONS WERE REQUIRED.

| Inspection Log: | [INSPECTION LOG #: 20714971 03-OCT-23 13:30:00] ON 10/3/2023, CHICAGO DEPARTMENT OF PUBLIC HEALTH (CDPH) ENVIRONMENTAL ENGINEER KENDRA GRAHAM RESPONDED TO A CITIZEN 311-COMPLAINT FOR NOISE AND DUST CLOUDS IN A CITY OWNED LOT LOCATED 4819 W LAWRENCE AVE. PRIOR TO ARRIVAL, I SPOKE WITH THE COMPLAINANT WHO STATED THERE IS INCREASED NOISE DUE TO CAR HORNS AND BACK UP ALARMS ON CITY VEHICLES AND DUST FROM VEHICLES ENTERING AND EXITING THE LOT ESPECIALLY IN THE EVENING. UPON ARRIVAL, I OBSERVED AN ACCUMULATION OF TRACK OUT ALONG OGDEN AVENUE AND AT THE ENTRANCE APRON OF THE CITY OWNED LOT. I OBSERVED SEPARATED PILES OF SAND, GRAVEL AND OTHER GRANULATED MATERIALS STORED ALONG THE EAST END OF THE LOT NEAR THE CHAIN LINK FENCE HOWEVER, THERE IS NO FABRIC MESH ALONG THE FENCE TO CONTAIN DUST AND DIRT. I OBSERVED A FUGITIVE DUST BEING KICKED UP AS CARS WERE EXITING THE UNPAVED LOT. I DROVE TO THE SOUTH END (REAR) OF THE LOT AND ENTERED A BUILDING ON SITE. I SPOKE WITH PATRICK SANDERS, STREETS AND SANITATION DIVISION SUPERINTENDENT AND INFORMED HIM OF THE COMPLAINT. PATRICK STATED THE NORTH END OF THE LOT, COMPLAINT SITE, IS OWNED/OPERATED BY THE WATER DEPARTMENT THE AND |

**(Continued)** **S118873210**

THE SOUTH END IS OWNED/OPERATED BY STREETS AND SANITATION. THERE WERE NO SITE SUPERVISORS FROM WATER ON SITE DURING THE INSPECTION. CDPH MANAGEMENT HAS BEEN MADE AWARE OF THE OBSERVATIONS AND NO CITATION WAS ISSUED AS A RESULT OF THIS INSPECTION.

| Inspection Date: | 10/11/2023 |
| Narrative: | On 10/3/2023, Chicago Department of Public Health (CDPH) Environmental Engineer Kendra Graham responded to a citizen 311-complaint for noise and dust clouds in a city owned lot located 4819 W Lawrence Ave. Prior to arrival, I spoke with the complainant who stated there is increased noise due to car horns and back up alarms on city vehicles and dust from vehicles entering and exiting the lot especially in the evening. Upon arrival, I observed an accumulation of track out along Ogden Avenue and at the entrance apron of the city owned lot. I observed separated piles of sand, gravel and other granulated materials stored along the east end of the lot near the chain link fence however, there is no fabric mesh along the fence to contain dust and dirt. I observed a fugitive dust being kicked up as cars were exiting the unpaved lot. I drove to the south end (rear) of the lot and entered a building on site. I spoke with Patrick Sanders, Streets and Sanitation Division |

**(Continued)** **S118873210**

Superintendent and informed him of the complaint. Patrick stated the north end of the lot, complaint site, is owned/operated by the Water Department the and the south end is owned/operated by Streets and Sanitation. There were no site supervisors from Water on site during the inspection. CDPH management has been made aware of the observations and no citation was issued as a result of this inspection.

Narrative: Super Carwash In response to a complaint I arrived to the area and canvassed for noise from Super carwash. During the inspection I detected noise from carwash dryer blower motors as cars exited the mechanical carwash bays. I interviewed Mr. Tom Mruk, manager, regarding the complaint. Tom stated that the mechanical blower motors are shut off at 8pm to minimize noise as not to disturb neighbors. I informed Tom of the noise ordinance and potential for tickets if the noise ordinance is violated. Tom stated that he would check the timers to ensure the units are shutting off at 8pm.

| Inspection Sub-Category: | DEMOLITION/ASBESTOS |
| Inspector: | 425726 |
| Inspection Date: | 04/15/2021 |
| Narrative: | Date: 4/15/2021Inspector: Francisco Flores SilvaInspection Type: Asbestos Location: 4819 N. Lawrence Ave. Notes:Upon arrival the reporting inspector met with the Illinois Department of Public Health (IDPH) licensed asbestos abatement supervisor on site.  There was also one other IDPH licensed asbestos worker on site. The reporting inspector observed plastic barriers had been place.  A generator and negative pressure air scrubber was stationed on site. The workers were clearing debris from the area. The reporting inspection issued a warning for the workers on site. Asbestos signage was missing. This inspection is now considered closed. |

Environmental Interest/Information System:
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

| Complaint Date: | 6/9/2022 |
| Complaint Detail: | Not reported |
| Inspection Log: | [INSPECTION LOG #: 16862875 10-JUN-22 08:40:00] ON JUNE 10, 2022, SENIOR ENVIRONMENTAL INSPECTORS TRACY RICKER AND FELIPE GARCIA RESPONDED TO A 311 COMPLAINT AT 5007 W LAWRENCE AV. THE COMPLAINT ALLEGED AIR POLLUTION, ODOR, OR DUST ASSOCIATED WITH CHICAGO METAL MAINTENANCE, A BUSINESS WHO OCCUPIES THE SITE.AT THE TIME OF INSPECTION, THE FRONT (NORTH) SIDE OF THE BUILDING WAS UNOCCUPIED. THE INSPECTORS OBSERVED THAT THE BACK (SOUTH SIDE) OF THE BUILDING WAS OCCUPIED BY CHICAGO METAL MAINTENANCE VIA A LARGE INDUSTRIAL (GARAGE TYPE) DOOR. THE INSPECTORS ENCOUNTERED A REPRESENTATIVE FROM CHICAGO METAL MAINTENANCE WHO TOLD THEM THAT THE FACILITY IS USED ONLY FOR STORAGE. THE INSPECTORS DID NOT OBSERVE SIGNS OF A PAINT BOOTH OR OTHER INDUSTRIAL WORK GOING ON INSIDE THE STORAGE AREA. OBSERVATIONS OF THE SITE INTERIOR AT THE TIME OF INSPECTION WERE CONSISTENT WITH A STORAGE AREA.NO CITATIONS WERE ISSUED IN RESPONSE TO THIS INSPECTION. |

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

| Inspection Category: | DOE GENERAL FLOW |
| Inspection Sub-Category: | MISC INSPECTIONS |
| Inspector: | 417325 |
| Inspection Date: | 02/01/2022 |
| Narrative: | On February 1, 2022, Chicago Department of Public Health (CDPH) Senior Environmental Inspector Justin Barnes conducted a Surficial Cleansing Ordinance Inspection of the Shell gas station at 4401 N. Cicero Ave.  Per the Office of State Fire Marshall (OSFM), the owner of the tanks at the facility is: Mont Cic Holdings, LLC, 8060 Lawndale Ave., Skokie, IL 60076 (Photo A).  Inspector Barnes arrived at 11:40AM to survey the site (Photos B, C, D, & E).Following the site survey, Inspector Barnes met with the station representative, Janet Maria Sanchez.  Ms. Sanchez put Inspector Barnes in contact with the station manager, Andrei Ordan, via telephone.  Mr. Ordan stated that daily waste removal requirements and spill or overfill containment/cleanup requirements were being met.  Mr. Ordan stated surficial cleansing of the Vehicular Use Areas of the facility had only been performed one time during the 2021 calendar year.  Ms. Sanchez was able to provide the documentation for the Vehicular Use Area cleaning operations for the 2020 calendar year.  However, neither Ms. Sanchez nor Mr. Ordan was able to provide all records related to surficial cleansing for the past three years as required.Inspector Barnes discovered during his visual inspection of the facility?s Vehicle Use Area several areas stained by apparent spills or overfills (Photos F & G).  The stains appear to result from failure to immediately address the spill/overfill at time of occurrence.  No excessive amounts of trash or debris around |

**TRUE NORTH ENERGY #1933 (Continued)** **S111913289**

| | |
|---|---|
| | the Vehicle Use Area was observed.Inspector Barnes reviewed with Mr. Ordan the requirements laid out in sections 4-108-350(A)(2) and 4-108-355(A) of the Municipal Code of Chicago stating, ?Each operator shall contain and immediately clean up a spill or overfill from a U.S.T. system ? The operator shall immediately clean up all spilled material and ove |

Environmental Interest/Information System:

**UNITED REMANUFACTURING CO INC (Continued)** **1000399007**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Agency Compliance and Enforcement Systems (ACES) application

**KLEFSTAD PARTNERSHIP (Continued)** **1000613490**

supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

| Inspection Sub-Category: | MISC INSPECTIONS |
| Inspector: | 417325 |
| Inspection Date: | 08/09/2021 |
| Narrative: | On August 9, 2021, Chicago Department of Public Health (CDPH) Senior Environmental Inspector Justin Barnes conducted a Surficial Cleansing Ordinance Inspection of the BP gas station at 4219 N. Milwaukee Ave.  Per the Office of State Fire Marshall (OSFM), the owner of the tanks at the facility is: Thattamattom, Inc., 4219 N. Milwaukee Ave., Chicago, IL 60641 (Photo A).  Inspector Barnes arrived at 9:30AM to survey the site (Photos B, C, D, & E).  During Inspector Barnes? survey, no trash, debris, or uncontained spills/overfills were observed. Following the site survey, Inspector Barnes met with the station representative.  The station representative stated that daily waste removal requirements, spill or overfill containment/cleanup requirements, and surficial cleansing of the Vehicular Use Area requirements were being met.  Additionally, the station representative verified surficial cleansing operations, as well as proper related waste water disposal operations, by providing the related records when requested.  However, Inspector Barnes requested of the station representative that both better record keeping standards and stricter facility hygiene measures be adhered to.Inspector Barnes determined the facility?s Vehicle Use Area to be at the minimum of compliance with the Municipal Code of Chicago. |

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal NPL (Superfund) sites***

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/25/2024
Date Data Arrived at EDR: 10/01/2024

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/25/2024

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Next Scheduled EDR Contact: 11/28/2011
Data Release Frequency: No Update Planned

***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/25/2024

***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/07/2024
Date Data Arrived at EDR: 06/25/2024
Date Made Active in Reports: 09/19/2024
Number of Days to Update: 86

Next Scheduled EDR Contact: 01/09/2025
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 09/25/2024

Data Release Frequency: Quarterly

***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 09/25/2024

***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/03/2024

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/03/2024

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Local Brownfield lists***

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Data Release Frequency: Varies

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted. Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

**COUNTY RECORDS**

COOK COUNTY:

CHICAGO ASBESTOS: CDPH Asbestos and Demolition Notification Listing

Notices of Intent (NOI) for demolition and asbestos abatement per Chapter 11-4 Article XVIII of the Municipal Code (see American Legal Publishing Corporation) submitted to the Department of Environment (DOE) for work started January, 1993 to December 31, 2011 or submitted to the Department of Public Health (CDPH) for work beginning on or after January 1, 2012. On January 1, 2012, the DOE was disbanded and all its inspection, permitting, and enforcement authorities were transferred to the CDPH.

**OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

| Version Date: | 2021 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

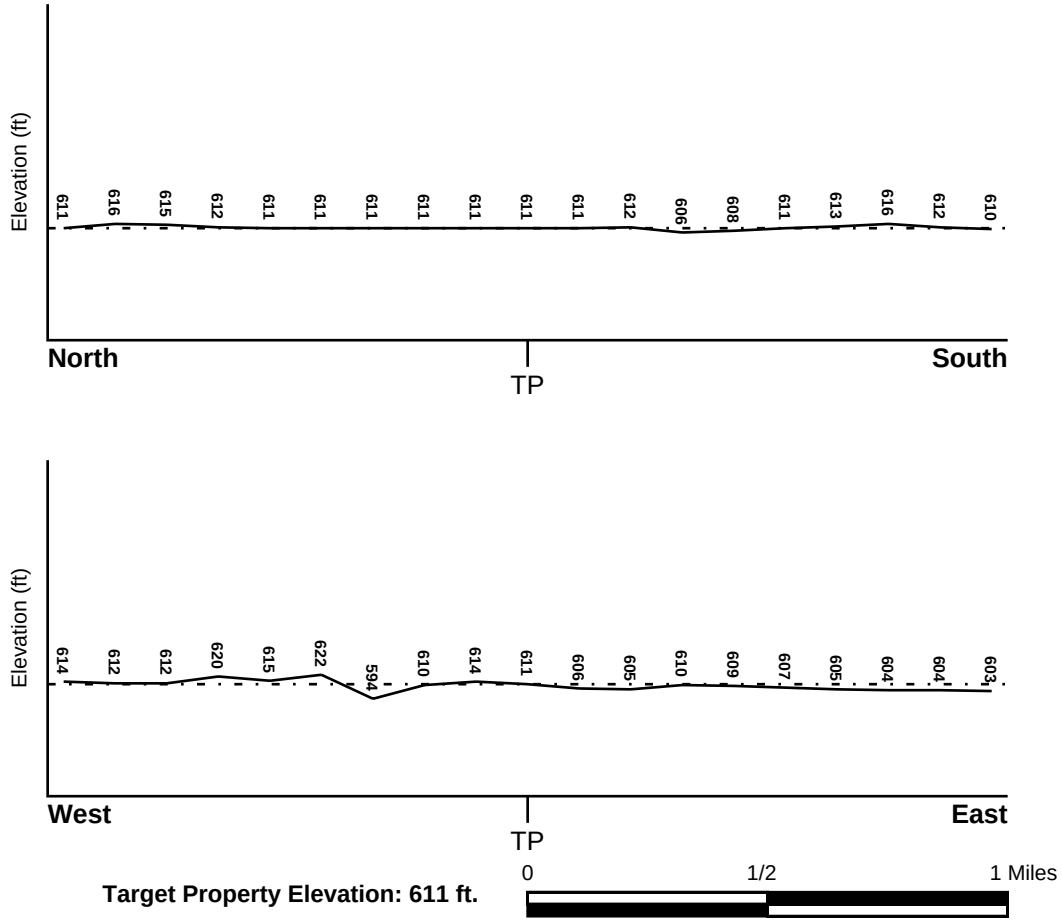
**TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

**TARGET PROPERTY TOPOGRAPHY**

General Topographic Gradient: General NE

**SURROUNDING TOPOGRAPHY: ELEVATION PROFILES**



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

| Flood Plain Panel at Target Property | FEMA Source Type |
|---|---|
| 1700740035B | FEMA Q3 Flood data |

| Additional Panels in search area: | FEMA Source Type |
|---|---|
| 17031C0385J | FEMA FIRM Flood data |
| 17031C0382J | FEMA FIRM Flood data |
| 17031C0401J | FEMA FIRM Flood data |
| 1700740036B | FEMA Q3 Flood data |

### NATIONAL WETLAND INVENTORY

| NWI Quad at Target Property | NWI Electronic Data Coverage |
|---|---|
| CHICAGO LOOP | YES - refer to the Overview Map and Detail Map |

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

***Site-Specific Hydrogeological Data*:***

| | |
|---|---|
| Search Radius: | 1.25 miles |
| Status: | Not found |

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| MAP ID | LOCATION FROM TP | GENERAL DIRECTION GROUNDWATER FLOW |
|---|---|---|
| 38 | 1/4 - 1/2 Mile NE | Not Reported |
| 1G | 1/4 - 1/2 Mile NE | Not Reported |

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

**ROCK STRATIGRAPHIC UNIT**

| | |

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

**DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBANLAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Bedrock Max: > 0 inches

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|---|---|---|---|---|---|---|---|
| | Boundary | | | Classification | | | |
| Layer | Upper | Lower | Soil Texture Class | AASHTO Group | Unified Soil | Permeability Rate (in/hr) | Soil Reaction (pH) |
| 1 | 0 inches | 60 inches | variable | Not reported | Not reported | Max: 0.00<br>Min: 0.00 | Max: 0.00<br>Min: 0.00 |

**OTHER SOIL TYPES IN AREA**

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
fine sandy loam
loam
fine sand

Surficial Soil Types: silt loam
fine sandy loam
loam
fine sand

Shallow Soil Types: sandy loam

Deeper Soil Types: silt loam
sand
loamy sand
loam

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

**WELL SEARCH DISTANCE INFORMATION**

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Illinois State Geological Survey
Telephone: 217-333-4747

## HYDROGEOLOGIC INFORMATION

AQUIFLOW$^{R}$ Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

Oil and Gas Wells Listing
Source: Illinois State Geological Survey

State Database: IL Radon
Source: Department of Nuclear Safety
Telephone: 217-785-9958
County Radon Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

RE: PUBLIC RECORDS REQUEST of November 27, 2024, Reference # F090269-112724.

Dear Nikki Chavez,

This correspondence is in response to the Freedom of Information Act ("FOIA") request received by the City of Chicago Department of Fleet and Facility Management (2FM) on November 27, 2024. You requested:

**"Pursuant to the federal Freedom of Information Act, HC & Associates LLC on behalf of Weaver Consultants Group North Central, LLC is requesting any paper and microfiche documents that may be on file concerning current or historical:**

**• risk management plans**
**• building permits**
**• underground or aboveground storage tanks**

RE: PUBLIC RECORDS REQUEST of November 27, 2024, Reference # A090272-112724

Dear Nikki Chavez,

This correspondence is in response to the Freedom of Information Act ("FOIA") request received by the City of Chicago Community Commission for Public Safety and Accountability on November 27, 2024. You requested:

**"Pursuant to the federal Freedom of Information Act, HC & Associates LLC on behalf of Weaver Consultants Group North Central, LLC is requesting any paper and microfiche documents that may be on file concerning current or historical:**

- **risk management plans**
- **building permits**
- **underground or aboveground storage tanks**
- **hazardous materials incidents**
- **environmental conditions**
- **environmental inspections**
- **environmental releases**
- **environmental violations**

**Parcel Index Numbers:**
**PIN (Cook County Parcel Viewer) Addresses**

**13-16-207-003-0000 4825 West Lawrence Ave, Chicago, IL**
**13-16-207-005-0000 4825 West Lawrence Ave, Chicago, IL**
**13-16-207-007-0000 4825 West Lawrence Ave, Chicago, IL"**

The Commission has no responsive documents to your request.

Please note that each City department is a separate “public body” under Section 2 of FOIA. 5 ILCS 140/2(a); Duncan Publishing, Inc. v. City of Chicago, 304 Ill. App. 3d 778, 784 (1st Dist. 1999) (“Clearly, each of the individual departments are subsidiary bodies of the City and are ‘public bodies’ as defined by the FOIA"). A FOIA request must be directed to the Department that maintains the records you seek. In this case, we believe you have sent this request to the wrong Department, as the Commission is not responsible for anything related to the records described in your request. Please go to https://www.chicago.gov/city/en/narr/foia/foia_docs_by_dept.html to review a list of City Departments and the records each one is responsible for maintaining.

You have the right to have a denial reviewed by the Public Access Counselor (PAC) at the Office of the Illinois Attorney General, 500 S. 2nd Street, Springfield, Illinois 62701, (877) 299-3642. You may also seek judicial review of a denial under 5 ILCS 140/11 of FOIA.

If you have any questions or need additional information, please feel free to contact me via GovQA.

Sincerely,

Charles Isaacs
Assistant Director
Community Commission for Public Safety and Accountability

OFFICE OF THE ILLINOIS STATE FIRE MARSHAL

JB Pritzker, Governor
James A. Rivera, State Fire Marshal

December 4, 2024

Jeana Burke
35 East Wacker Drive, Suite 1250
Chicago, Illinois 60601

Dear Jeana Burke:

The Office of the State Fire Marshal received your request for documents, pursuant to the Freedom of Information Act ("Act"), on 12/03/2024. Enclosed, and pursuant to the Act, please find those documents responsive to your request that are prepared or maintained by the Office of the State Fire Marshal.

Please note that certain information (including dates of birth, financial information and other personal information) may have been redacted from these records, pursuant to either section 7(1)(b) of FOIA (5 ILCS 140/7(1)(b)) which permits the withholding of "private information," as that phrase is further defined in section 2(c-5) of FOIA (5 ILCS 140/2(c-5)), or section 7(1)(c) which exempts from disclosure "[p]ersonal information contained within public records, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, unless the disclosure is consented to in writing by the individual subjects of the information," or both.

Pursuant to Section 9.5 of the Act, "any person whose request to inspect or copy a public record is denied by a public body, may file a request for review with the Public Access Counselor established in the Office of the Attorney General not later than 60 days after the date of the final denial." Such requests must be in writing, signed by the requester and include (1) a copy of the request for access to records, and (2) any response from the OSFM. For further information on such requests contact:

Public Access Counselor
Office of the Attorney General
500 S. 2nd Street
Springfield, Illinois 62706
Phone: 1-877-299-FOIA
(1-877-299-3642)
Fax: (217) 782-1396

For your convenience, and to most efficiently track and respond to FOIA requests received by the OSFM, we offer and recommend the electronic submission of all FOIA requests. To submit a request electronically, please go to OSFM FOIA Request and simply fill out the online FOIA request form.

Should you have further questions regarding this matter, please contact me at your earliest convenience.

Sincerely,

Nancy Robinson

CERTIFIED MAIL - RECEIPT REQUESTED #Z 082 410 419

June 28, 1999

Mayfair Lumber Co.
4825 W. Lawrence Ave.
Chicago, IL 60630

In Re: Facility No. 2-001430
IEMA Incident No. 99-1239
Mayfair Lumber Co.
4825 W. Lawrence Ave.
Chicago, Cook Co., IL

Dear Applicant:

The Reimbursement Eligibility and Deductible Application received on June 14, 1999 for the above referenced occurrence has been reviewed. The following determinations have been made based upon this review.

It has been determined that you are eligible to seek payment of costs in excess of $10,000. The costs must be in response to the occurrence referenced above and associated with the following tanks:

Eligible Tanks

Tank 2 1,000 gallon Gasoline
Tank 3 500 gallon Diesel
Tank 4 1,000 gallon Heating Oil

You must contact the Illinois Environmental Protection Agency to receive a packet of Agency billing forms for submitting your request for payment.

An owner or operator is eligible to access the Underground Storage Tank Fund if the eligibility requirements are satisfied:

1. Neither the owner nor the operator is the United States Government,

2. The tank does not contain fuel that is exempt from the Motor Fuel Tax Law,

3. The costs were incurred as a result of a confirmed release of any of the following substances:

   "Fuel", as defined in Section 1.19 of the Motor Fuel Tax Law

   Aviation fuel

   Heating oil

   Kerosene

Used oil, which has been refined from crude oil used in a motor vehicle, as defined in Section 1.3 of the Motor Fuel Tax Law.

4. The owner or operator registered the tank and paid all fees in accordance with the statutory and regulatory requirements of the Gasoline Storage Act.

5. The owner or operator notified the Illinois Emergency Management Agency of a confirmed release, the costs were incurred after the notification and the costs were a result of a release of a substance listed in this Section. Costs of corrective action or indemnification incurred before providing that notification shall not be eligible for payment.

6. The costs have not already been paid to the owner or operator under a private insurance policy, other written agreement, or court order.

7. The costs were associated with "corrective action".

This constitutes the final decision as it relates to your eligibility and deductibility. We reserve the right to change the deductible determination should additional information that would change the determination become available. An underground storage tank owner or operator may appeal the decision to the Illinois Pollution Control Board (Board), pursuant to Section 57.9 (c) (2). An owner or operator who seeks to appeal the decision shall file a petition for a hearing before the Board within 35 days of the date of mailing of the final decision, (35 Illinois Administrative Code 105.102(a) (2)).

For information regarding the filing of an appeal, please contact:

Dorothy Gunn, Clerk
Illinois Pollution Control Board
State of Illinois Center
100 West Randolph, Suite 11-500
Chicago, Illinois 60601
(312) 814-3620

If you have any questions regarding the eligibility or deductibility determinations, please contact our Office at (217) 785-1020 or (217) 785-5878 between 3:00 - 4:00 p.m.

Sincerely,

Melvin H Smith

## Underground Storage Tank Fund
## Eligibility and Deductibility Application

This application must be submitted by all underground storage tank owners or operators planning to seek reimbursement of corrective action costs from the Underground Storage Tank (UST) Fund. Instructions and definitions to aid in completing the application are attached.

The application must be completed in its entirety. All signatures and seals must be originals signed in ink. Incomplete applications will be returned to the applicant. Any revisions to the original application must be dated and initialed by the person entering the new information. This must be the same person who signs the application. If a facility is not in compliance with registration requirements your application will be returned. Do not submit bills with the application.

To ensure proper routing, DO NOT submit the application with reports, with copies of reports or inside reports. A duplicate copy of the application is not required.

Following the review of your application, you will receive a letter stating whether you are eligible and the applicable deductible amount.

Facility # 2001430

Dear Linda:

As per our phone conversation this afternoon, I am sending a copy of the information that we submitted to your office by Federal Express on 6/30/92. I am also returning invoice #27188 due 8/31/92 as you instructed.

Included in this information is a copy of a letter of explanation and a copy of a check in the amount of $100 to register one Heating Oil UST(we were led to believe that payment was also due by 7/1/92). Although we have not yet received last month's bank statement, our bank has verified that the check cleared on 7/7/92.

As the enclosed letter of explanation(6/29/92) indicates, when we attempted to check the status of our registration with Stephanie on 6/26/92, she found our initial registration dated 2/27/86 in the computer but did not immediately find the amended information that we had sent on 7/12/88. After some searching(in what I had the impression were non-computerized files), she did find this info. As you can see, our letter of 6/26/92 further amends the previous file info. I would judge from the invoice we just received, however, that somehow you are operating from the original 2/27/86 registration rather than the updated information.

I hope that I haven't served to confuse you, but I am concerned that our file is correct, that we are properly registered and that we have been credited with paying the appropriate fees. Your help in this matter is greatly appreciated. Should you have any questions, please contact me at the above number. Thank you so much.

Sincerely,

Charles L. Koenen

A review of your letter as the result of an invoice for registration or the 1988 annual fees has prompted our office to issue the following response marked below:

1. ___ The $500 late registration fee is owed by the party who had legal title to the tank(s) as of September 24, 1987.

2. ___ The $500 late registration fee is owed if the tank(s) was/were in the ground and not registered as of September 24, 1987. These fees are owed even if the tank(s) has/have been removed or abandoned.

3. ___ The 1988 $100 annual fee is owed if the tank(s) was/were in the ground at any time in 1988 regardless of when it was registered. These fees are owed even if the tank(s) has/have been removed or abandoned.

4. ___ There is no authority to waive the late registration fees.

5. ___ Our records indicate the tank(s) was/were installed prior to September 24, 1987, but they were not registered prior to that date.

6. ___ The party responsible for the 1988 annual fee is generally the party who last owned the tank(s) in 1988.

7. ___ This receipt is for your file to indicate that the addressed fees have been paid.

8. ___ Enclosed is a Notification Form that needs to be completed and returned to our office showing your current ownership address and tank status to amend your old Notification Form.

9. ___ As stated in your letter these tanks do not meet the criteria to be registered. Therefore, our records will be changed accordingly.

10. ✓ Other: Your letter stated that either tank 1 or tank 4 was nonbillable. Please tell us which tank and why it is not an underground storage tank.

**As indicated, the invoice is valid and the fees in question remain due!**

Office of the State Fire Marshall--C/O Linda
Division of Petroleum and Chemical Safety
1035 Stevenson Drive
Springfield, Il. 62703-4259

Facility #2001430

Dear Linda:

In response to your Division's memo dated 8/12/92(copy attached), and as per our phone conversation of 8/21/92, I am sending further information pertaining to our Heating Oil Underground Storage Tank situation.

With regard to the question as to which tank is nonbillable, it is tank number one(#1). The reason for which we believe it to be nonbillable is based on two separate conversations with engineers in your office. On 6/26/92 I spoke with Bill Alderson and on 6/30/92, I spoke with Dan Covalli(my apologies for any misspelling). I explained that the tank in question is situated in our office basement. It sits on supports approximately 10 inches above the surface of the floor and is visible from all sides. Based on this description, both men stated that this would not be classified as an Underground Storage Tank.

Apparently, the person who originally registered our tanks in 1986 did not realize that this particular tank was excludable. We are simply trying to rectify this error so that our file is correct and up-to-date. We certainly want to make sure that we are in compliance with your registration requirements. Therefore, if for some reason, you do not believe that this tank meets the exclusion criteria, or you wish additional information, please let me know. Also, please be aware that we have already paid the registration fee on tank #4 of $100.00. It was submitted on 6/30/92 and we have already received the cancelled check back.

Again, thank you very much for your help in this matter.

Sincerely,

Charles L. Koenen

A review of your letter as the result of an invoice for registration or the 1988 annual fees has prompted our office to issue the following response marked below:

1. ___ The $500 late registration fee is owed by the party who had legal title to the tank(s) as of September 24, 1987.

2. ___ The $500 late registration fee is owed if the tank(s) was/were in the ground and not registered as of September 24, 1987. These fees are owed even if the tank(s) has/have been removed or abandoned.

3. ___ The 1988 $100 annual fee is owed if the tank(s) was/were in the ground at any time in 1988 regardless of when it was registered. These fees are owed even if the tank(s) has/have been removed or abandoned.

4. ___ There is no authority to waive the late registration fees.

5. ___ Our records indicate the tank(s) was/were installed prior to September 24, 1987, but they were not registered prior to that date.

6. ___ The party responsible for the 1988 annual fee is generally the party who last owned the tank(s) in 1988.

7. ___ This receipt is for your file to indicate that the addressed fees have been paid.

8. ___ Enclosed is a Notification Form that needs to be completed and returned to our office showing your current ownership address and tank status to amend your old Notification Form.

9. ___ As stated in your letter these tanks do not meet the criteria to be registered. Therefore, our records will be changed accordingly.

10. ✓ Other: Your letter stated that either tank 1 or tank 4 was nonbillable. Please tell us which tank and why it is not an underground storage tank.

As indicated, the invoice is valid and the fees in question remain due!

Date Received

## GENERAL INFORMATION

**Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1974, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.**

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or, in the absence of such records, your knowledge, belief, or recollection.

**Who Must Notify?** Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means—
(a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and
(b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

**What Tanks Are Included?** Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: **1.** gasoline, used oil, or diesel fuel, and **2.** industrial solvents, pesticides, herbicides or fumigants.

**What Tanks Are Excluded?** Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:
**1.** farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
**2.** tanks used for storing heating oil for consumptive use on the premises where stored;
**3.** septic tanks;
**4.** pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
**5.** surface impoundments, pits, ponds, or lagoons;
**6.** storm water or waste water collection systems;
**7.** flow-through process tanks;
**8.** liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
**9.** storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

**What Substances Are Covered?** The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

**Where To Notify?** Completed notification forms should be sent to the address given at the top of this page.

**When To Notify? 1.** Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974, but still in the ground, must notify by May 8, 1986. **2.** Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use.

**Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.**

## INSTRUCTIONS

Please type or print in ink all items except "signature" in Section V. **This form must be completed for each location containing underground storage tanks.** If more than 5 tanks are owned at this location, photocopy the reverse side, and staple continuation sheets to this form.

Indicate number of continuation sheets attached: ☐

CHEMICAL SAFETY

You must notify IEMA 1-800-782-7860 within 24 hours of leaks or contaminated soil. Removal must be in accordance with acceptable closure requirements and procedure such as API Bulletin 1604. A site assessment must be conducted to determine if a release has occurred.

4) Removal of Tanks:

A) Number and size of tanks being removed: (1) 1,000 GAL (2) 500 GAL

B Total number of all tanks removed: 3

C) Reason for removal of tanks: NO LONGER NEEDED

D) If tank is leaking, give IEMA incident number:

JAN

E) What products were stored in each tank? 1000 GAL DIESEL - 500 GAL GAS - 500 GAL HEATING OIL

F) If tanks contain products other than petroleum products, please indicate here: N/A

G) Date each tank was last used? 12/22/98

H) A written notice of removal shall be given to the City of Chicago, Department at least 30 days prior to the removal, giving location, number and size of tanks. This application will constitute that 30 day written notice. The 30 day period commences with this application completed and the fee received in our office.

I) Insufficient information supplied for permit review or omission of permit fee is grounds for application rejection. No work is to commence without a granted permit in hand and must be available upon request of inspectors. All work must be done by contractors registered with the State Fire Marshall's Office and by the City of Chicago, Department of Environment.

6) A permit fee of $100 for each facility must accompany this application. Checks or money orders (**From the contractor**) are to be made payable to the City of Chicago, Department of Environment. Do not send cash. **Any N.S.F. checks, closed accounts, etc. must be cleared up by the contractor before any permits will be issued to any other sites.**

**7) If the tank (s) were used prior to 1974, a letter from the owner stating the date the tank (s) were last used is required. If the tank (s) were used after 1974, the tank (s) must be registered with the Office of the State Fire Marshal.**

I certify under the penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that all submitted information is true, accurate and complete.

Name of Contractor's Representative GEORGE F. MONCEK

Title PRESIDENT

Signature of Contractor's Representative: [signature] Date: 12-22-98

The Office of the State Fire Marshall and the City of Chicago, Department of Environment are requesting information that is necessary to accomplish the statutory purpose as outlined in the Illinois Revised Statutes 127 1/2, Paragraph 9 Disclosure of this information is REQUIRED. Failure to provide any information will result in this form not being processed.

December 16, 2024

Jeana Burke
35 East Wacker Drive, Suite 1250
Chicago, Illinois 60601

Dear Jeana Burke:

The Office of the State Fire Marshal received your request for documents, pursuant to the Freedom of Information Act ("Act"), on 12/16/2024. Enclosed, and pursuant to the Act, please find those documents responsive to your request that are prepared or maintained by the Office of the State Fire Marshal.

Please note that certain information (including dates of birth, financial information and other personal information) may have been redacted from these records, pursuant to either section 7(1)(b) of FOIA (5 ILCS 140/7(1)(b)) which permits the withholding of "private information," as that phrase is further defined in section 2(c-5) of FOIA (5 ILCS 140/2(c-5)), or section 7(1)(c) which exempts from disclosure "[p]ersonal information contained within public records, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, unless the disclosure is consented to in writing by the individual subjects of the information," or both.

Pursuant to Section 9.5 of the Act, "any person whose request to inspect or copy a public record is denied by a public body, may file a request for review with the Public Access Counselor established in the Office of the Attorney General not later than 60 days after the date of the final denial." Such requests must be in writing, signed by the requester and include (1) a copy of the request for access to records, and (2) any response from the OSFM. For further information on such requests contact:

Public Access Counselor
Office of the Attorney General
500 S. 2nd Street
Springfield, Illinois 62706
Phone: 1-877-299-FOIA
(1-877-299-3642)
Fax: (217) 782-1396

For your convenience, and to most efficiently track and respond to FOIA requests received by the OSFM, we offer and recommend the electronic submission of all FOIA requests. To submit a request electronically, please go to OSFM FOIA Request and simply fill out the online FOIA request form.

Should you have further questions regarding this matter, please contact me at your earliest convenience.

Sincerely,

Nancy Robinson
Deputy General Counsel – FOIA Officer
Office of the State Fire Marshal

# Notification for Underground Storage Tanks

FOR TANKS IN **IL**

RETURN COMPLETED FORM TO: UST Coordinator, Division of Fire Prevention, P.O. Box 3803, Springfield, IL 62708-3803

I.D. Number: 2014869

STATE USE ONLY

Date Received

## GENERAL INFORMATION

**Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1974, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.**

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or, in the absence of such records, your knowledge, belief, or recollection.

**Who Must Notify?** Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means--

(a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and

(b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

**What Tanks Are Included?** Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: 1. gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

**What Tanks Are Excluded?** Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:

1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
2. tanks used for storing heating oil for consumptive use on the premises where stored;
3. septic tanks;
4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

**What Substances Are Covered?** The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

**Where To Notify?** Completed notification forms should be sent to the address given at the top of this page.

**When To Notify?** 1. Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974, but still in the ground, must notify by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use.

**Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.**

## INSTRUCTIONS

Please type or print in ink all items except "signature" in Section V. **This form must be completed for each location containing underground storage tanks.** If more than 5 tanks are owned at this location, photocopy the reverse side, and staple continuation sheets to this form.

Indicate number of continuation sheets attached: ☐

RECEIVED
JAN 10 1998
DIV. OF PETROLEUM & CHEMICAL SAFETY

You must notify IEMA 1-800-782-7860 within 24 hours of leaks or contaminated soil. Removal must be in accordance with acceptable closure requirements and procedure such as API Bulletin 1604. A site assessment must be conducted to determine if a release has occurred.

4) Removal of Tanks:

A) Number and size of tanks being removed: 1- 4000 gallon UST

B Total number of all tanks removed: 1

C) Reason for removal of tanks: Taking out of Service

D) If tank is leaking, give IEMA incident number:

RECEIVED
NOV 05 1997
By

E) What products were stored in each tank? Gasoline

F) If tanks contain products other than petroleum products, please indicate here:

G) Date each tank was last used? 11-1-97

H) A written notice of removal shall be given to the City of Chicago, Department at least 30 days prior to removal, giving location, number and size of tanks. This application will constitute that 30 day written notice. The 30 day period commences with this application completed and the fee received in our office

I) Insufficient information supplied for permit review or omission of permit fee is grounds for applica rejection. No work is to commence without a granted permit in hand and must be available upon reque inspectors. All work must be done by contractors registered with the State Fire Marshall's Office and by City of Chicago, Department of Environment.

6) A permit fee of $100 for each facility must accompany this application. Checks or money orders (From contractor) are to be made payable to the City of Chicago, Department of Environment. Do not send cash. Any N checks, closed accounts, etc. must be cleared up by the contractor before any permits will be issued to any o sites.

7) If the tank (s) were used prior to 1974, a letter from the owner stating the date the tank (s) were last use required. If the tank (s) were used after 1974, the tank (s) must be registered with the Office of the State Marshal.

I certify under the penalty of law that I have personally examined and am familiar with the information submitte this and all attached documents, and that based on my inquiry of those individuals immediately responsible obtaining the information, I believe that all submitted information is true, accurate and complete.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by HC & Associates LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

# EXECUTIVE SUMMARY

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1923 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

## RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

## RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

# APPENDIX G - PERSONNEL QUALIFICATIONS

Weaver Consultants Group

# Allison Fournier

Senior Project Manager

**EDUCATION**

B.S. Environmental Science, University of Illinois at Urbana-Champaign, Illinois, 2010

**CERTIFICATIONS**

OSHA 40-Hour HAZWOPER Certification

OSHA 8-Hour HAZWOPER Annual Refresher

OSHA 10-Hour Construction Health and Safety

e-Rail SAFE Contractor for BNSF, CN, & CP Railways

American Heart Association Heartsaver CPR/AED Certified

**AFFILIATIONS**

Illinois Association of Environmental Professionals (IAEP)

Midwestern States Environmental Consultants Association (MSECA)

## Professional Summary

Ms. Fournier serves as a Senior Project Manager for Weaver Consultants North Central, LLC. She has over twelve years of experience conducting and managing a wide variety of environmental assessment and remediation projects. Ms. Fournier has managed multiple Phase I and II Environmental Assessments, Leaking Underground Storage Tank (LUST) projects, and voluntary cleanup programs. She is responsible for the review, data management, and generation of technical reports for submittal to various industry, state, and federal regulatory agencies. She has successfully managed projects from inception through regulatory closure, including proposal and scope of work development, client and regulatory communications, and management of site investigations, remediation, and reporting.

## Select Project Experience

Due Diligence Activities

Ms. Fournier has participated in numerous due diligence-related environmental assessments in support of property transactions and other mergers and acquisitions. Ms. Fournier is responsible for evaluating available information and conducting site reconnaissances to identify known and potential environmental conditions associated with a property, and providing guidance on the regulatory framework applicable to addressing identified conditions. In addition, Ms. Fournier has experience preparing probable estimates of remedial costs in conjunction with proposed development plans, and providing pollution liability insurance support (i.e., presentations of findings to insurance market carriers). She has assisted clients with due diligence activities on several large-scale redevelopment projects in New Jersey, Maryland, California, Louisiana, and Illinois as well as large-scale acquisition projects including an industrial food manufacturing portfolio and two short-line railroads.

Brownfields Assessment Activities

Ms. Fournier manages a brownfields assessment and remediation contract with the Cook County Department of Environment and Sustainability (DES) for properties located within suburban Cook County, Illinois. Cook County DES was awarded $600,000 in United States Environmental Protection Agency assessment grant funding and $3,000,000 in American Rescue Plan Recovery Act funding to be utilized towards assessment and/or remediation activities at brownfields properties. Ms. Fournier serves as the manager and technical lead for the implementation of this work. As part of the assessment activities, Ms. Fournier has managed the completion of multiple Phase I and Phase II ESA, as well as remedial action planning, remediation oversight, and Illinois Environmental Protection Agency (IEPA) Site Remediation Program (SRP) activities. As part of the overall project, Ms. Fournier has supported site prioritization, community outreach, and participation of Disadvantaged Business Enterprise (DBE) companies to meet contract goals.

Weaver Consultants Group

IEPA LUST/SRP Activities – Various Developer Clients

Ms. Fournier has managed numerous projects under the SRP and Leaking Underground Storage Tank (LUST) programs resulting in the issuance of No Further Remediation (NFR) Letters from the IEPA. Ms. Fournier has obtained NFR Letters under residential and industrial/commercial land use scenarios, and utilizing risk-based closure applications (i.e., institutional controls, fate and transport modeling, site-specific objective calculations, etc.) in conjunction with limited remedial activities (i.e., soil excavation and off-site disposal, in-situ soil mixing, etc.).

Ms. Fournier has provided support to clients as part of due diligence activities as well as during redevelopment. Activities are frequently conducted on an accelerated schedule to meet the client's aggressive development schedules. Ms. Fournier assists clients in integrating remediation and redevelopment activities in order to reduce costs and expedite regulatory closure.

Weaver Consultants Group

# Colin Pannier

Project Manager

**EDUCATION**

B.S. Earth and Environmental Science, University of Illinois at Chicago

**CERTIFICATIONS**

OSHA 40-Hour HAZWOPER Certification

OSHA 8-Hour HAZWOPER Annual Refresher

OSHA 10-hour Construction Training

e-Rail SAFE Contractor for BNSF, CN, & CP Railways

American Heart Association Heartsaver CPR/AED Certified

**FIELDS OF EXPERTISE**

Environmental Monitoring; Soil-gas, Soil, Sediment, Surface Water, and Groundwater

Phase I and Phase II Environmental Site Assessments and Investigations

Voluntary Closure Programs

Risk-Based Corrective Action

Environmental Remediation

## Professional Summary

Mr. Pannier serves as a Project Manager for Weaver Consultants Group North Central, LLC. He has approximately ten (10) years of experience performing a wide variety of environmental investigation and remediation projects. Mr. Pannier has managed Phase I and II Environmental Assessments, Illinois Site Remediation Program (SRP) and Leaking Underground Storage Tank (LUST) activities, construction and demolition oversight, and remediation oversight. He is responsible for review and data management and generation of technical reports for submittal to various industry, state, and federal regulatory agencies. Mr. Pannier completes multiple phases of site environmental assessments including proposal preparation and cost estimating, scope of work development, coordination of field sampling of various media for the delineation of various subsurface contaminants, and report preparation.

## Select Project Experience

Mr. Pannier has managed numerous Phase I Environmental Site Assessments for commercial and industrial clients within Illinois, New York, Georgia, Pennsylvania, and California. The assessments, at a minimum, have generally complied with the ASTM E1527-13 standard. His experience in conducting Phase I ESAs includes evaluating on-site and off-site risks to determine whether recognized environmental conditions exist, site reconnaissance, and conducting reviews of federal and state records.

In support of Phase II Environmental Site Assessments conducted at project sites in Illinois, Indiana, and Texas, Mr. Pannier has managed and/or conducted various sampling events including observation of soil probe advancement activities, interpretation of subsurface soils and groundwater, and sample collection for laboratory analysis. Mr. Pannier has also been responsible for report review, writing, and data management.

Mr. Pannier has managed and performed multiple aspects of Illinois SRP and LUST site activities, including site investigation planning, sampling, and characterization. Mr. Pannier has also reviewed and written reports for SRP and LUST sites of varying sizes and property uses; as well as multiple remediation sites in Indiana.

Mr. Pannier has participated in or managed numerous field sampling events at a variety of commercial and industrial facilities. Responsibilities include conformance with established groundwater monitoring procedures and plans, Standard Operating Procedures and compliance with applicable Health and Safety Plans. He also has been responsible for analyzing and reporting the data collected during these field sampling activities.

Weaver Consultants Group

# Jeana Burke

Project Engineer

**EDUCATION**

M.Eng. Engineering Management, University of Louisville, 2018

B.S. Chemical Engineer, University of Louisville, 2017

**CERTIFICATIONS**

OSHA 40-Hour HAZWOPER Certification

OSHA 8-Hour HAZWOPER Annual Refresher

OSHA 10-Hour Construction Health and Safety

eRailSafe Training

## Professional Summary

Ms. Burke serves as a Project Engineer for Weaver Consultants Group North Central, LLC. She has five (5) years of environmental-related professional experience including data analysis, construction quality assurance, and regulatory compliance regarding assessment and remediation projects. This work has included performing and managing Phase I and II Environmental Site Assessments including per- and polyfluoroalkyl substances (PFAS) sampling, Underground Storage Tank (UST) closure, and voluntary cleanup for various vacant, agricultural, commercial, and industrial properties. She has successfully completed projects from inception through regulatory closure, including proposal and scope of work development, client and regulatory communications, and management of site investigations, remediation, and reporting.

## Select Project Experience

Due Diligence Activities – Property Acquisitions and Redevelopment

Ms. Burke has participated in numerous large-scale due diligence-related environmental assessments to support of property acquisition and redevelopment of former manufacturing facilities, PFAS impacted properties, agricultural, industrial, commercial, and vacant properties across Illinois. This includes Phase I Environmental Site Assessments (ESAs) requiring review of historical reports and regulatory records, site reconnaissance, and characterization of environmental conditions at each property. Prior to acquisition, this has also included Phase II ESAs involving development of environmental remediation investigation plans, design, costs; implementation and oversight; and reporting.

IEPA LUST/SRP Activities

Ms. Burke has assisted and led the completion of several projects through the Illinois Environmental Protection Agency's (IEPA) Site Remediation Program (SRP) and Leaking Underground Storage Tank (LUST) program resulting in the issuance of No Further Remediation (NFR) Letters from the IEPA. For IEPA reporting and obtaining NFR letters, Ms. Burke has utilized various risk-based closure applications including the implementation of institutional controls, fate and transport modeling, site-specific objective calculations, and remedial activity design (i.e., soil excavation and off-site disposal, in-situ soil mixing, etc.). She has obtained NFR Letters under industrial/commercial land use scenarios for various properties including historical industrial and manufacturing facilities and warehouses.

Remediation Design Support

Ms. Burke has supported a variety of clients in designing remediation plans to meet state and USEPA environmental regulations. These remediation designs have included sub-slab depressurization (SSD) systems, soil mixing, land-use controls, in-situ bioremediation and chemical reduction, air sparging, and other designs. Ms. Burke has also designed soil management zones to allow for on-site soil reuse to reduce costs in remediation design.
